Hello Kathy,

As of right now you have an extension until August 10, 2020. I appreciate the heads up on looking for end of the year right away but cannot confirm an extension at this time. Our managers are still working on what sort of flexibility we will be allowed to extend/ what business is going to look like and things are developing on a day to day basis. I can say that if extensions are not possible, you will be permitted to resubmit a new Part 1. Part of the reason for resubmission is we would need to redo some of the background paperwork relating to neighboring land owners. How we handle this will be figured out over the coming weeks and months, we have many similar inquiries coming in.

I will make note of the expiry in my calendar here though and check in with at a later date. If you do not hear from me and August is approaching feel free to send me another message or give me a phone call as a reminder. Sorry I can't give a clearer answer at this time, things are a bit crazy here too trying to keep our office going.

Take care and all the best, hope that helps for now,

Joe

Hello Joe. With the pandemic going on and closures due to this issue, we are having issues contacting companies to move forward with the planning and details of the project and are asking if we can get an extension to the deadline for submission of Part 2 to the end of 2020. Is this possible?

Thank you very much and hope you and your family are staying safe during these difficult times.
