Looks pretty close to ready James. I have a small list of things I still need included. Once you make the additions please resend to me and would should be good to prepare the public notice.

-I need a letter authorizing you to apply on behalf of Corners Pride. Just a short letter with signature would suffice.

-Page 5. If you could add:

- Proposed 1 (pens/ shelters)
- Proposed 2 (catch basin/ lagoon)
- Add the values in the columns below these even if they are 0 (no wells or springs based on when we looked around)

-Page 6, I need the legal land locations for the manure spreading lands entered or provided on another sheet of paper

-Page 7, add hydraulic conductivity. From report looks like borehole CP1-20 and HC of 2.0×10^{-8} cm/s

-Page 8, add hydraulic conductivity. From report looks like CP9-20 and HC of 2.5×10^{-7} cm/s.

I think adding the pertinent info and clarification should about do it otherwise. Feel free to give me a call if you have any more questions.

Good morning Joe,

Here is the completed Part 2 application. Please advise if you need any more information from us!

Thanks, and have a great day!
