As I stated before, with a compromised immune system, water safety is my major issue... and who pays for repeated water testing. I can't afford that on a fixed income.

I also can't attend a computer hearing, as I don't know how to. I can do emails.

Thank you for your attention throughout all this and your assistance. The actions of the Party involved seem to indicate their intent to flout restrictions and requirements by their historical actions.

I can only hope justice prevails in any follow up.

Cheers,
Terri
