(PROC	EEDINGS COMMENC	ED AT 9:04 A.M.)
THE C	HAIR:	Good morning, everyone.
	Technology is fa	ntastic, and I think it's working, but

		1
1	there's always seems to be opportunity for glitches.	
2	So welcome everyone, and good morning again.	
3	So we'll get started. My name is Peter Woloshyn,	
4	and I'll be chairing this panel, the Natural Resources	
5	Conservation Board, to hear the review of Approval	
6	Officer Decision LA21033 for Double H Feeders.	
7	Now, to help you identify the Panel, and I think	
8	you might be able to move tiles around anyway, and	
9	Kevin I think was going to do that for the participants	
10	down in Lethbridge, but the Panel and Bill Kennedy, our	09:05
11	general counsel, have this mountain kind of background	
12	with NRCB logo, and staff folks have the beige	
13	background with an NRCB logo; you see Laura Friend's	
14	there, for instance. So that might make it a bit	
15	easier at least for folks to identify the Panel we	
16	hope, because there's quite a few folks on the screen.	
17	I'll briefly introduce the Panel for you.	
18	Page Stuart and Page, if you just kind of wave there	
19	so people can find you on the screen Page was the	
20	general manager of a large feedlot in central Alberta	09:05
21	for a number of years and also chaired the Alberta	
22	Cattle Feeders Association and has championed several	
23	environmental sustainability initiatives in	
24	agriculture, including on a national roundtable. So	
25	clearly a lot of experience in agriculture, and	

welcome, Page.

7

16

17

18

19

20

21

Sandi Roberts -- and Sandi, there you go -- Sandi is an agricultural engineer and was an approval officer with the NRCB up until 2010. When she left the NRCB, she decided to get into some municipal politics and was municipal councillor for the Town of Carstairs and also has been an instructor with Olds College.

Earl Graham -- and Earl, you're there -- so we've 8 9 got a different view from here, so I don't see all the panels -- but Earl has extensive experience in 10 11 municipal politics, including serving as a deputy reeve 12 for Clearwater County and central zone director for 13 AAMDC, which is now RMA, as you know, and is a member of the subdivision and development appeal board in his 14 15 region.

And my name again, Peter Woloshyn. I grew up on a forage and beef farm near Devon, Alberta, and I was the CEO of the NRCB from 2006 up until my appointment as Chair in late 2017. I have a background in resource economics and policy, and have led several research divisions in both crops and livestock.

So assisting the Panel today -- and you've been chatting with these folks over the last number of weeks -- is Bill Kennedy, the board's general counsel -- and, Bill, are you there? I don't see 09:06

09:07

-- there you are. Okay, perfect, thank you. 1 2 Bill has been with the Board now 30 years, we just 3 gave him a 30-year-long service award, and has a ton of 4 experience obviously with the NRCB and in assisting 5 Panels through reviews. Laura Friend is our manager of Board reviews and 6 7 has been with the Board for 20 years. So if you have any technical difficulties today during the hearing, 8 9 you can just phone or text Laura at 403-620-8294. So once again, that number for Laura if you have 10 09:08 difficulties is 403-620-8294. 11 12 And depending on the issue and what's happening, 13 we may have to pause the hearing briefly to get folks, 14 if it's an IT issue and it's somebody that needs to be 15 obviously participating in the hearing so we may have 16 to pause. Hopefully we'll have no glitches today. 17 With Field Services, we've got a number of folks. 18 Carina Weisbach -- welcome, Carina -- Carina was the 19 approval officer who handled the application. 20 Fiona Vance, who is the chief legal officer for Field 09:09 21 Services. MS. VANCE: 22 Good morning. 23 THE CHAIR: Good morning, Fiona. 24 Andy Cumming, and Andy is the director of Field 25 Services and applications.

AMICUS REPORTING GROUP - A Veritext Company

1 MR. CUMMING: Good morning. 2 THE CHAIR: Good morning, Andy. And we have 3 two staff that will be doing the virtual on-screen 4 document management. So when we're operating in a 5 virtual hearing, we have the ability to have our documents up if and when we need them, and 6 7 Sylvia Kaminski and Carolyn Taylor will be assisting And Carolyn and Sylvia, are you online? 8 us. MS. KAMINSKI: 9 Yes, good morning. MS. TAYLOR: 10 Morning. 09:09 THE CHAIR: 11 Good morning, thanks. And they're 12 our expert document managers from Springbank, so 13 they've had a ton of experience, they ran that document manager, along with some other folks, on our Springbank 14 15 hearing, which was an 11-day hearing. So welcome and thank you, Sylvia and Carolyn. 16 17 So when you do want a document shared on the 18 screen, please clearly say the exhibit number and the 19 pdf page number that you'd like to refer to, and we'll 20 just give the document managers a few moments. They'll 09:10 21 get the document loaded and on the screen at the right 22 page. 23 So for -- our Zoom host is with MNP, Meyers Norris 24 Penny, who is our IT deliverer, and we have

AMICUS REPORTING GROUP - A Veritext Company

Mak Elhakim. And, Mak, are you online?

25

1 MR. ELHAKIM: Yeah, I'm with you. 2 THE CHAIR: Perfect. Okay, well, thank you 3 very much for your patience and getting everybody 4 onboard and into the hearing. Thank you very much. MR. ELHAKIM: You're welcome. 5 No problem. THE CHAIR: And our court reporters for today, 6 7 Ms. Vespa and Ms. DiPaolo. And who's on this morning? THE COURT REPORTER: It's Ms. Vespa, Lorelee. 8 9 THE CHAIR: Lorelee Vespa, okay, welcome. And Ms. Vespa and Ms. DiPaolo were also court reporters 10 11 with the Springbank hearing. We're thrilled to have 12 you back, you did a great job. So thank you very much. 13 And so during the hearing, we are transcribing. 14 We would ask when you're speaking, just identify 15 yourself and speak relatively slowly so that they can 16 get it. It's a tough job on the court reporter side, 17 and so if you can speak clearly and make sure you're not speaking too quickly, it's a lot easier for our 18 19 court reporters, and we can ensure we get the 20 transcript right. So we've also provided a YouTube link, and it's on 21 our website for members of the public to observe the 22

09:11

09:11

AMICUS REPORTING GROUP - A Veritext Company

These are typically -- well, they're

always open to the public, and if there's anyone that

wants to join, or if you were hoping that somebody

23

24

25

proceedings.

would be able to watch, you can just let them know that 1 2 they can go to our website and our main page, there will be a link there to the YouTube channel that they 3 4 can view the hearing live. 5 And if there's any members of the media on the YouTube feed, and if you have a question regarding 6 7 today's process, you can contact Janet Harvey, NRCB communications specialist, and Janet can be reached by 8 9 email at janet.harvey, and that's H-A-R-V-E-Y, janet.harvey@nrcb.ca, or you can reach her by telephone 10 09:12 at 780-720-2317. 11 12 So the purpose of the hearing is to review 13 Decision LA21033, dated November 25th, 2021, and was 14 issued by approval officer, Carina Weisbach. 15 The confined feeding operation is located at NE Section 22, Township 9, Range 22, west of the 4th 16 17 meridian in Lethbridge County, near the Town of 18 Coalhurst. 19 So the approval officer denied the Double H 20 Feeders' application to expand an existing poultry CFO. 09:13 21 The application was to construct two barns and increase 22 chicken broiler numbers by 65,000 to a total of 120,000 23 birds. 24 So, following that denial, a request for review or 25 RFR from the operator, Double H, was received by the

AMICUS REPORTING GROUP - A Veritext Company

3

4

5

6

7

8

9

10

11

filing deadline of December 16, 2021.

We received three rebuttals by the deadline December 23rd, 2021, from Ms. Schmid, Mr. and Mrs. Bedster, Mr. Clifton, who are all directly affected parties as determined by the approval officer.

9

So the Panel met on January 5th, 2022, and in its RFR Decision 2022-01 dated January 7th, 2022, advised that it made a decision to grant the RFR and hold a oral hearing, and that decision report provided the reasons for granting a review and the core issues that the Panel would have regard for at this hearing.

12 So the letter also directed that written 13 submissions by directly affected parties were to be 14 filed to the Board by no later than January 27th of 15 2022. Submissions were received from Field Services of 16 the NRCB, the Town of Coalhurst, County of Lethbridge, 17 Double H Farms, and Mr. Clifton.

18 Mr. Clifton did submit one submission by the 19 deadline, and he did submit one submission after the 20 filing deadline, and the Board allowed that late 21 filing, sent out the reasons for allowing the filing, 22 and we heard no objections to it.

23 So all Panel members have and are familiar with 24 the documents that parties have submitted as 25 evidentiary materials for this hearing, and so given 09:14

09:14

this, there is no need for you to reread into the record materials that you've already submitted. So in order to make the best use of our time, we request that each party use their presentation time to highlight or clarify the important and salient points that are relevant to the written submission.

Your participation in this hearing is very important to the Panel, and we look forward to the information you'll be providing, and recognize that our decision will have a significant impact on you and your 09:15 community.

12 The process that we follow is inherently formal, 13 it's a quasi-judicial proceeding, and so a certain 14 level of formality is appropriate. However, we do try 15 to minimize that formality to the extent possible so 16 that participants are comfortable presenting their 17 information to the Panel and also asking other parties 18 questions.

But we do encourage you to ask questions if you're unsure about the process or when you're allowed to interject. You know, the Panel gets that this is likely the first time at a hearing for many of you and many of the parties, and we have -- and we're here to -- for you to participate. So this is about you folks and about getting the best information we can to

09:16

1

2

3

4

5

6

7

8

9

10

make our decision.

1

2

3

4

5

6

7

8

9

10

11

12

25

So if you're unsure about the process at any time, please don't be shy. Just you can ask me the question, or you can ask for Mr. Kennedy for a few minutes to understand the process. Mr. Kennedy does this all the time. It's not an issue. And we would much rather you interrupt us and ask questions about the process if you're unsure than sort of go through the process and then feel afterwards that, you know, you may have had, you know, missed an opportunity that you should have taken. So please don't be shy and ask questions at any point.

13 So just a brief overview of the process for today: 14 We'll register all parties, and then each participant 15 will have an opportunity to address any preliminary 16 matters that you may have.

17 We will then begin the evidentiary or direct 18 evidence portion of the hearing, and the Board believes 19 it's beneficial for -- we have done this in the past 20 for NRCB Field Services to present their direct 21 evidence first, followed by Lethbridge County, Town of 22 Coalhurst, directly affected parties, and we'll have 23 Double H -- oh, sorry, we'll have Double H Feeders 24 follow the approval officer.

When it's your turn -- and we'll be highlighting

09:16

09:17

this as we go through the hearing -- when it's your 1 2 turn, you'll be sworn in or affirmed. So it's your 3 choice whether you're sworn in or affirmed by the court 4 reporter. And once you're sworn or affirmed, any new 5 evidence that you want us to consider can be entered 6 into the record on request. So if you have any paper 7 copies or electronic copies of evidence that you would like us to review for the purpose of the hearing, you 8 can enter that at that time, and we'll give it an 9 exhibit number. 10

And then we'll give you a chance to highlight or expand upon any points in your submission that you feel are particularly significant for the Panel. After you've presented that evidence, you'll be open to questions from other parties, including NRCB Field Services, the Board counsel, Mr. Kennedy, and Panel members.

18 Once questioning is complete, the party will 19 then -- that presented the evidence will have an 20 opportunity to reintroduce or redirect any evidence. 21 So, essentially, you know, once you've been asked all the questions, we'll give you a chance to submit any 22 23 further evidence or comments to address areas that may 24 have been raised in the questions that were posed to 25 you that you believe there's some additional

09:18

09:18

information that the Panel should have that you may 1 2 have missed during the questioning. 3 Once we've completed the direct evidence and 4 questioning of all parties, then Double H Feeders may provide any rebuttal evidence, and if there's any 5 rebuttal evidence that's provided by Double H at the 6 7 very end of the proceeding or near the end of the proceeding, then the other parties will have an 8 9 opportunity to ask questions based on that rebuttal evidence. And once that's done, every party will have 10 09:19 11 an opportunity to provide a final argument. Hopefully you've had a 12 So it's a lot to absorb. 13 chance to go through our hearing guide, but, once 14 again, as we move through the process, if you have any 15 questions, please don't hesitate to ask. 16 So we'll take a couple of breaks during the day. 17 It's always a bit of a guess as to how long a hearing 18 will take, but we'll take some breaks. We won't 19 necessarily set them now because if we're in the middle 20 of somebody's direct evidence, as an example, we'd like 09:19 21 to get through that. So, you know, we'll try to get 22 lunch around noon, if we're not done by lunch, and it's 23 hard to know when we'll finish up. I think in our 24 letter, we indicated that it would be 9 to 4:00. If 25 for some reason we needed to go past 4:00 -- and I'm

AMICUS REPORTING GROUP - A Veritext Company

h				1
1		confident that we ca	n get done by then but if we	
2		need to go past 4:00	, are there any other parties that	
3		are have other co	mmitments that would prevent us	
4		from going a little	bit later than 4:00 today?	
5	MR.	VAN'T LAND:	I have a hard out at 5:00, so just	
6		to make note of that		
7	THE	CHAIR:	At 5:00?	
8	MR.	VAN'T LAND:	Yes.	
9	THE	CHAIR:	Okay. Thank you.	
10	THE	COURT REPORTER:	I'm sorry, who spoke?	09:2
11	THE	CHAIR:	Who was that speaking?	
12	MR.	VAN'T LAND:	I'm sorry, this is	
13		Scott Van't Land fro	m Double H Feeders.	
14	THE	CHAIR:	Okay. And so we'll do our best to	
15		obviously be done by	5, and that would mean that we	
16		would need to move t	o another day if we can't wrap up,	
17		but let's all do our	best to see if we can wrap this up	
18		by, at the latest, 5	:00.	
19		Any other parti	es have time commitments that we	
20		should know about?		09:2 ⁻
21	MS.	HORVATH:	Mr. Chairman, it's Diane Horvath	
22		from the Town of Coa	lhurst. I won't be able to	
23		participate past 4:3	0 today.	
24	THE	CHAIR:	4:30. Okay. Thank you.	
25		Other parties?		

h			7
1		Okay. Hearing none, let's do our best to finish	
2		up by 4:30 and it may be the case, and Mr. Kennedy, if	
3		we needed to go past 4:30 and Ms. Horvath had to leave,	
4		that may still be possible, depending on where we're at	
5		with the evidentiary portion. Is that fair?	
6	MR.	KENNEDY: Yeah, I think we I'll keep an	
7		eye on the time and perhaps have a conversation with	
8		Ms. Horvath at some point in terms of what she might be	
9		missing should it look like 4:30 is an issue.	
10	THE	CHAIR: Okay. Great. Thank you very	09:22
11		much.	
12		Okay. So let's we need to formally register	
13		the parties.	
14		And for Field Services, Ms. Vance and	
15		Ms. Weisbach; correct?	
16	MS.	VANCE: Yes, thank you, Mr. Chair. And we	
17		also have Mr. Cumming.	
18	THE	CHAIR: Okay. Mr. Cumming will be	
19		registered, then? A party?	
20	MS.	VANCE: Yes.	09:22
21	THE	CHAIR: Thank you. And for	
22		Double H Feeders, Mr. Van't Land; correct?	
23	MR.	VAN'T LAND: Yes, that's me.	
24	THE	CHAIR: Thank you. And for	
25		Lethbridge County, Ms. Janzen.	
			l

1 MS. JANZEN: Yes, that's me. 2 THE CHAIR: And Town of Coalhurst, Ms. Hygge 3 (phonetic). MS. HORVATH: 4 Diane Horvath, yes. 5 THE CHAIR: Yeah, I'm just -- yeah, I've got 6 my list wrong. So it's Ms. Horvath only; is that 7 correct? MS. HORVATH: Correct. 8 9 THE CHAIR: Thank you. And directly affected parties, Ms. Schmid, Mr. Clifton, Mr. Bedster. Are we 10 09:23 11 missing anyone? MS. SCHMID: 12 Carol Ann Bedster. THE CHAIR: 13 Thank you. Do we have someone 14 else? That's it. Okay. Thank you very much. 15 All right. So if I missed no one, that's our 16 official registered participant list for today. 17 Thank you. 18 So are there any preliminary matters that anyone 19 has or any questions before we get started with the 20 direct evidence? 09:23 21 MS. VANCE: Mr. Chair, this is Fiona Vance 22 from NRCB Field Services. This is a really minor 23 procedural point, but in the order of proceedings under 24 Number 12, which is closing arguments, Field Services 25 is not listed.

AMICUS REPORTING GROUP - A Veritext Company

1 At this point, I don't actually anticipate having 2 a closing argument, but I would like to just reserve 3 the opportunity to do so if necessary. THE CHAIR: 4 Agreed. MS. VANCE: 5 Thank you. THE CHAIR: 6 Thank you. I'll just make a note 7 now. Thank you. Any other matters? Okay. Hearing none. 8 The exhibit list. We'd like to formally adopt the exhibit 9 list that is on our website, and just so that everybody 10 09:24 11 is clear about what that is, document managers, do you 12 have that handy? Could you throw that up on the screen for us? 13 14 Boom, there we go. Thank you very much. 15 So all parties, this is the listing that is on the 16 website, and there is a document on the website that 17 summarizes, just as you've seen on the screen. So if 18 there are no objections, we'd like to adopt that as our 19 exhibit list. And if there's anything new added, we 20 would start numbering, of course. And I think -- is 09:25 21 23 -- that is our last exhibit number. I think we 22 would start at 24 if there's anything new. 23 MS. FRIEND: That's correct, Mr. Chair. So are there any objections? 24 THE CHAIR: 25 Hearing none, we'll adopt that as our exhibit list.

Thank you.

1

25

2 Thanks, document managers. Appreciate it. 3 So we'll start with Field Services, the approval 4 officer, Ms. Weisbach, and Ms. Vance. Are you ready? MS. VANCE: 5 We are. Thank you. I wonder if it would be helpful -- maybe I'll just speak extremely 6 7 briefly just as by way of introduction. I act for both the approval officer and NRCB Field Services in this 8 9 hearing.

As I explained in the submissions we made, we take 10 09:26 11 no position on the outcome of this hearing. In other 12 words, we don't take a position on whether the Board 13 should be upholding the denial or directing the 14 approval officer to issue a permit. The decision 15 documents from the approval officer speak for 16 themselves.

17 That said, I did bring two witnesses today, and 18 the purpose of them is to assist the board in this 19 hearing. So I will have all of two questions for 20 Ms. Weisbach and probably none in direct for 21 Mr. Cumming, but I wanted to make them available for 22 questions from other parties. 23 THE CHAIR: Thank you. 24 MS. VANCE: So before moving -- well,

Ms. Weisbach, of course, is the approval officer. She

09:26

Ms. Vance examines the panel

h		न
1	prepared the documents that are Exhibits 2 and 3;	
2	that's the decision summary and the technical document.	
3	Mr. Cumming is the director of Field Services	
4	applications. He will not answer questions about this	
5	application in particular. It could be he will not	
6	have to answer any questions at all.	
7	The reason Mr. Cumming is potentially here as a	
8	witness is to answer questions about how the NRCB might	
9	consider Intermunicipal Development Plans and Municipal	
10	Development Plans if the Board decides to consider that	09:27
11	issue.	
12	THE CHAIR: Thank you.	
13	MS. VANCE: And if there's no questions for	
14	me, then maybe we could get to affirming the witnesses.	
15	THE CHAIR: Yes, thank you. Please proceed,	
16	Court Reporter. Ms. Vespa.	
17		
18	<u>C. WEISBACH, A. CUMMING</u> (For NRCB Field Services), affirmed	
19	MS. VANCE EXAMINES THE PANEL:	
20	MS. VANCE: Thank you, Madam Reporter.	09:29
21	Q. Ms. Weisbach, I'll ask you a couple of short questions	
22	first.	
23	And my first question is, this operation is	
24	located on a northwest quarter. There's also some	
25	discussion about an operation on the northeast quarter.	
11		1

AMICUS REPORTING GROUP - A Veritext Company

ľ

Ms. Vance examines the panel

1		To your knowledge, does the operation on the northeast	
2		quarter hold an NRCB-issued permit?	
3	Α.	MS. WEISBACH: No, it doesn't.	
4	Q.	Thank you. And when you received the application for	
5		LA21033, and you worked through that process in getting	
6		to your decision, did you consider the operation on	
7		that northwest quarter at all.	
8	Α.	MS. WEISBACH: No, I did not. It holds an MD	
9		permit at this point, which for us, it's deemed it's	
10		a deemed permit. So I did not consider this.	09:30
11	Q.	And just to clarify, the northwest quarter was not part	
12		of this application?	
13	Α.	MS. WEISBACH: No, it was not.	
14	Q.	Okay. Thank you. That's actually all the questions I	
15		have for you. But please answer any questions that	
16		other parties or the Board may have.	
17	THE	CHAIR: Okay, thank you. Thank you,	
18		Ms. Vance.	
19		Ms. Weisbach, thank you.	
20		So Lethbridge County, do you have any questions	09:30
21		for the approval officer?	
22	MS.	JANZEN: No, I don't.	
23	THE	CHAIR: Town of Coalhurst?	
24	MS.	HORVATH: I don't have any questions.	
25	THE	CHAIR: Ms. Schmid?	

Ī

Ms. Vance examines the panel

1

1	MS.	SCHMID:	No questions at this time.	
2	THE	CHAIR:	And Mr. and Mrs. Bedster?	
3	MR.	BEDSTER:	We have	
4	THE	CHAIR:	Sorry?	
5	MR.	BEDSTER:	no questions at this time.	
6	THE	CHAIR:	Thank you. Mr. Clifton?	
7	MR.	CLIFTON:	No questions.	
8	THE	CHAIR:	Mr. Van't Land.	
9	MR.	VAN'T LAND:	No questions at this time.	
10	MR.	KENNEDY:	I'm going to jump in. A couple of	09:31
11		people said "no	questions at this time." This is the	
12		only time that y	you would have to ask questions of the	
13		approval office	r. So I guess the advice is don't hold	
14		back.		
15	THE	CHAIR:	Thank you, Mr. Kennedy.	
16	MR.	KENNEDY:	And I'm also wondering, we	
17		didn't I don	't know whether we were going to receive	
18		any direct evide	ence from Mr. Cumming, and whether	
19		parties, you kno	ow, whether this would be the time to	
20		ask questions of	f Mr. Cumming as well so we move	09:31
21		through both wit	tnesses from this particular panel	
22		before		
23	THE	CHAIR:	Ms. Vance, was Mr. Cumming going	
24		to provide any o	direct?	
25	MS.	VANCE :	So I have no direct questions for	

AMICUS REPORTING GROUP - A Veritext Company

Cross-examined by Mr. Clifton

1		Mr. Cumming. As to whether the questions from other	
2		parties should go to both or one at a time, I'm in the	
3		board's hand on that one.	
4	THE	CHAIR: And often, I know in the past,	
5		we've had, say, Mr. Cumming and Ms. Weisbach sitting as	
6		the Panel, they can decide sometimes even who best	
7		might answer the question.	
8		But I guess the question is based on Mr. Kennedy's	
9		advice and direction, folks, this is your chance to ask	
10		Mr. Cumming or Ms. Weisbach, the NRCB, questions. Are	09:3
11		there any questions from directly affected parties or	
12		the Town or the County for that matter?	
13	MR.	CLIFTON: I have a question.	
14	THE	CHAIR: Okay. This is please identify	
15		yourself.	
16	MR.	CLIFTON: It's Mr. Clifton.	
17	THE	CHAIR: Go ahead, Mr. Clifton.	
18	<u>MR.</u>	CLIFTON CROSS-EXAMINES THE PANEL:	
19	Q.	In the approval officer's what she wrote there, she	
20		said there was no permit issued from the NRCB for this	09:3
21		operation on the northwest?	
22	Α.	MS. WEISBACH: Mrs. Vance asked me if there was	
23		an NRCB-issued permit for the northwest, and there is	
24		not.	
25		The northwest, however, holds an MD permit, a	

Cross-examined by Mr. Clifton

1		municipal permit or a development permit as it's also	
2		called. Those are deemed permits, but they are not	
3		NRCB-issued permits.	
4		So this the northwest holds a grandfathered or	
5		deemed permit at this point.	
6	Q.	Okay. And there was some conditions on that permit.	
7		Would they be carried forward if a new permit was	
8		issued?	
9	Α.	MS. WEISBACH: So we do have a policy when we do	
10		carry over municipal permit conditions into NRCB-issued	09:34
11		permits. And it says that any conditions that are	
12		written in these old permits, as I say, or grand	
13		deemed permits, if they are above and beyond AOPA, they	
14		will be carried over. That's what the policy says at	
15		this point.	
16		So I would carry over these permit conditions into	
17		a new permit.	
18	Q.	Okay. That's all I have.	
19	THE	CHAIR: Thank you, Mr. Clifton.	
20		Other parties? Before we get to Board counsel and	09:34
21		Panel questions?	
22		Hearing none, okay.	
23		Mr. Kennedy?	
24	MR.	KENNEDY: Yes, thank you. I will have	
25		questions for both of the witnesses.	

ļ

Questioned by Mr. Kennedy

1	<u>MR.</u>	KENNEDY QUESTIONS THE PANEL:	
2	Q.	My first set of questions goes to you, Ms. Weisbach.	
3		So if I could get the document managers to pull up	
4		Exhibit 7, pdf page 78. And Exhibit 7 is the	
5		Intermunicipal Development Plan, and it's pdf page 78.	
6		There is no numbered page 78. Well, there's only	
7		19 pages.	
8		So there is, in fact, if we use the I think we	
9		use the link in the here's what we have is the	
10		Intermunicipal Development Plan that has been pulled	09:36
11		up, and I'm not sure whether that's the link from the	
12		exhibit we've gotten. When I click on the link to the	
13		exhibit page, I get the full Intermunicipal Development	
14		Plan. This is a consolidated version, so yeah,	
15		Exhibit 7. So can we click on that and just see what	
16		comes up.	
17	MS.	FRIEND: This is Laura, Bill. I can	
18		confirm that the document does only have 19 pages, the	
19		one that is linked.	
20	MR.	KENNEDY: All right.	09:37
21	Q.	Well, within those 19 pages, I'm sorry, I don't have	
22		the pdf page number, there is a provision 4.1.5. And	
23		it might be that everybody is familiar with this	
24		provision. It's the provision in the IDP that talks	
25		about both new confined feeding operations and not	
			il i

AMICUS REPORTING GROUP - A Veritext Company

1			1
1		being permitted and then a provision that deals with	
2		the expansion of existing CFO operations.	
3		And so it's just the page	
4	MS.	KAMINSKI: Sorry, Bill, it lets me pull it	
5		up, but it won't show I don't know if it's too	
6		large.	
7	MR.	KENNEDY: Ah, okay.	
8	MS.	FRIEND: And this is Laura, and yeah, when	
9		I look in the other file, there's 541 pages in	
10		the at another place where it's saved. But in the	09:38
11		exhibit list, it is only 19 pages.	
12	MR.	KENNEDY: I'd like to be helpful, but I	
13		can't because I've got the whole document that keeps	
14		coming up on my page, but somewhere in here	
15	MS.	KAMINSKI: Sorry, which page?	
16	MR.	KENNEDY: Oh, you've got the whole thing	
17	MS.	KAMINSKI: I do.	
18	MR.	KENNEDY: Pdf page 78, and I may also be	
19		referring to page 79 which is a map, but we may not go	
20		there.	09:38
21	Q.	But, Ms. Weisbach, you're familiar with this provision?	
22	Α.	MS. WEISBACH: I am.	
23	Q.	But just to be clear, you didn't consider this decision	
24		when you were considering the Double H Feeders'	
25		application?	

Questioned by Mr. Kennedy

1	Α.	MS. WEISBACH: No, I didn't, because I came as	
2		I described in my decision summary, Exhibit 2,	
3		Appendix A, which should be page 6, my analysis was	
4		that the IDP is not sufficiently referenced in the MDP,	
5		and therefore on the AOPA, I would not consider the IDP	
6		for my final determination, consistency determination.	
7	Q.	Fair. And I think that is clear in your decision	
8		report.	
9		I'm going to ask you, though, in wearing your	
10		approval officer hat, to visit some of these conditions	09:39
11		and perhaps venture your opinion as to how, if you had	
12		considered this, they might be might apply to the	
13		Double H Feeders' expansion operation. And if I'm	
14		going beyond your level of comfort and asking you to	
15		answer a question that you just frankly don't feel	
16		comfortable answering, please let me know.	
17		But my questions are going to be pretty general,	
18		and they're going to focus on those kind of qualifier	
19		provisions that are stated in the last you know, the	
20		second part of Section 4 or Article 4.1.5, dealing	09:40
21		with the CFO expansion operations.	
22		So as if you were considering again, I'm going	
23		to ask you to answer these questions as if you were	
24		considering the Double H Feeders' application, but	
25		applying this IDP provision so without I don't	

Questioned by Mr. Kennedy

h			-
1		know that we need to pull up the next page, but the	
2		next page is a map, and it includes the exclusion zone	
3		for CFOs. Is it clear that the Double H Feeders'	
4		operation, both the west and east barns that are	
5		referred to, are within that exclusion zone?	
6	Α.	MS. WEISBACH: Yeah, they're both within.	
7	Q.	In your opinion, would the expansion as proposed	
8		upgrade or modernize the operation?	
9	Α.	MS. WEISBACH: So you're asking if the proposed	
10		expansion would be a monetization upgrade?	09:42
11	Q.	Yes. So in Section 4.1.5, it says, you know, if it is	
12		to upgrade and modernize, and then it's got within	
13		brackets	
14	THE	CHAIR: Mr. Kennedy, Mr. Kennedy, sorry to	
15		interrupt. Maybe if document managers could just go	
16		back up to 4.1.5, and then Carina can kind of continue	
17		to read, Ms. Weisbach. There we go. Thank you, yeah.	
18		Thanks. Okay, please proceed.	
19	Q.	MR. KENNEDY: So expansions are permitted under	
20		these kind of qualified conditions, and one of them is	09:42
21		to upgrade and modernize. And then it says: (as read)	
22		"within the requirements of the	
23		Agricultural Operation Practices Act and	
24		Regulations."	
25		So, within that context, would this application be	

Questioned by Mr. Kennedy

			1
1		considered an upgrade and modernization?	
2	Α.	MS. WEISBACH: To say I'm carrying the approval	
3		officer hat. So, for me, it's strictly does it meet	
4		the AOPA regulations. We do not look at facilities if	
5		they're being proposed if they're a modernization or an	
6		upgrade per se. We look at if these facilities do meet	
7		AOPA requirements in respect to liners, that is our	
8		primary goal I would say, and if they meet MDS, or the	
9		minimum distance separation, and if they're consistent	
10		with the MDP land use provisions.	09:43
11		So if I look at land use provisions, upgrade and	
12		modernize is the request that things can be approved if	
13		they're an upgrade or modernized, that would not be a	
14		land use provision per se.	
15		So, as an approval officer, I don't believe that I	
16		would look at a proposal in that respect.	
17	Q.	And then the next one is an outcome-based assessment,	
18		and it says: (as read)	
19		"Demonstrating changes will reduce	
20		negative impacts."	09:44
21		Could you venture an opinion as to whether the expansion	
22		will reduce negative impacts? And they use the example	
23		of odours, and I assume this is to nearby neighbours,	
24		residents.	
25	Α.	MS. WEISBACH: When mmm.	

Questioned by Mr. Kennedy

1	Q.	And, in fairness, it might be a bit of a challenge	
2		because what we are talking about is an expansion on	
3		one site and perhaps the decommissioning of another	
4		site. And so the effects on neighbours, depending on	
5		their proximity to either site, might be quite	
6		different.	
7	Α.	MS. WEISBACH: When when I look at that	
8		provision, I could not I would not be able to	
9		consider the the CFO on the northeast parcels, I	
10		think that's what you're referring to in respect to	09:45
11		decommissioning.	
12		So on the northwest, which is the site of the	
13		proposed expansion, to me demonstrating changes will	
14		reduce negative impacts. That, when I read that, I	
15		would I would interpret that as if you do have an	
16		existing facilities and you do upgrade that existing	
17		facility, that would not necessarily apply to an	
18		expansion, if you know what I mean.	
19	Q.	Yes. And part of the challenge and maybe I should	
20		back up a little bit because when we talked about	09:46
21		upgrading and modernizing, you said it's not a land use	
22		planning provision. But, overall, is 4.1.5 a land use	
23		planning provision?	
24	Α.	MS. WEISBACH: Mmm. I would interpret that as	
25		not being exactly a land use provision. Having said	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Mr. Kennedy

1		that, I that was a quick assessment of a section	
2		that I have not really thought about that in such	
3		detail, so	
4	Q.	Yeah, it's not my intention to put you in an awkward	
5		situation, but it's certainly when I put my	
6		questions together, I did so on the assumption that	
7		this was a land use planning provision. And that's why	
8		I kind of circled back when you said that subcomponent,	
9		that qualifier, was not a land use planning provision.	
10		So I'll move on. And one of the final qualifiers	09:47
11		is "Additional environmental protection will be	
12		considered." Do you have a sense as to what that might	
13		mean?	
14	Α.	MS. WEISBACH: As I said, you asked me if I read	
15		the provision; yes, I did. Did I interpret every	
16		little detail of that provision? No, I did not because	
17		I did not consider it in my MDP consistency	
18		determination and, therefore, I would I'm not very	
19		comfortable to interpret that on a fly, so to say.	
20	Q.	Okay. And, in part, I'm asking all of these questions	09:48
21		because and we've seen your decision, we understand	
22		why you didn't consider the provision of the IDP. But	
23		there is an outstanding question perhaps in terms of	
24		how the Board may be looking at this, where they may	
25		well, when they're reviewing this, look and say, the	

AMICUS REPORTING GROUP - A Veritext Company

Ī

Questioned by Mr. Kennedy

1		IDP provision is or is not a land use provision, and	
2		does it or does it not prevail over the provision of	
3		the MDP.	
4		So, my final question, and I'm not going to ask it	
5		with requiring as much detail as I originally wrote	
6		it. Is it fair to say that the IDP provision	
7		is contemplates potential expansions where the MDP	
8		provision is an absolute exclusion of new and expanding	
9		operations?	
10	Α.	MS. WEISBACH: Yes, there is a definite	09:49
11		difference.	
12	MR.	KENNEDY: Okay. Mr. Chair, those are all	
13		the questions I have for Ms. Weisbach.	
14		I do have some questions for Mr. Cumming related	
15		to the proposed approval officer policy as to how	
16		to you know, how to go forward.	
17	THE	CHAIR: Why don't the Panel ask questions	
18		of Ms. Weisbach, and then we could circle back to	
19		questions to Mr. Cumming? Does that work for you?	
20	MR.	KENNEDY: Yeah, I don't see anything that	09:50
21		I the only challenge might be if I had questions of	
22		Mr. Cumming that would lead me back to Ms. Weisbach,	
23		but I can't see that happening.	
24	THE	CHAIR: And I think they're both basically	
25		sitting as a panel, so we can circle back to	
			l

Questioned by Ms. Roberts

			1
1		Ms. Weisbach if we need to after Mr. Cumming.	
2		So Panel members, Ms. Roberts, do you have	
3		questions for Ms. Weisbach?	
4	MS.	ROBERTS: Yeah, I have a couple of	
5		questions.	
6	MS.	ROBERTS QUESTIONS THE PANEL:	
7	Q.	First of all, Ms. Weisbach, there seems to be a little	
8		bit of a discrepancy in the number of broilers that I	
9		guess we'll say are actually at the let's	
10		see that are at the proposed location, and it's not	09:51
11		a huge discrepancy, but I just would like to clarify	
12		because the various documents we're looking at besides	
13		just yours state different things.	
14		For instance and I don't believe we need these	
15		documents put up on the screen unless somebody wishes	
16		to actually see them, but in the technical document,	
17		the approval officer makes the comment that says it's	
18		about 55,000. In the decision summary in Appendix D,	
19		it talks about what the deemed capacity of the site	
20		would be, which would be 50,000 based on the current	09:52
21		municipal permit, and then perhaps this is more	
22		proper to Mr. Van't Land but just to kind of	
23		complete the various numbers we're looking at, there's	
24		a comment made by him that there are 58,000 broilers at	
25		NE 22.	

			1
1		So I'm just curious with these various numbers,	
2		55,000, 50,000, 58,000, what is your understanding of	
3		what the number of broilers currently allowed at NE 22	
4		is?	
5	Α.	MS. WEISBACH: Municipal permit that was issued	
6		says 50,000, and that's the number I went with.	
7	Q.	Okay. Thank you. It was more a point of clarification	
8		because of all these various numbers that were out	
9		there.	
10		I also just have a question for you regarding	09:53
11		surface runoff because that is a concern that was	
12		raised by the neighbours. And in your decision	
13		summary, which is Exhibit Number 2 and on, I believe	
14		it's on page 6 no, it's not sorry, page 3, Bullet	
15		Number 3 sorry, page 3, and Bullet Number 3 there,	
16		when you're talking about whether the AOPA requirements	
17		have been met, it says: (as read)	
18		"The proposed expansion would have	
19		sufficient means to control surface	
20		runoff from the CFO facilities."	09:54
21		Can you explain to me how that determination was made	
22		and how we try and correlate it with some of the	
23		concerns that were raised by the neighbours about	
24		surface runoff?	
25	Α.	MS. WEISBACH: So the pullet barns are completely	

Questioned by Ms. Roberts

			1
1		indoor, so they're surrounded by a concrete wall and	
2		protected by a roof. So there is no runoff coming from	
3		that facility. So when as Mr. Van't Land also	
4		explained in his manure management plan that he	
5		submitted to us is, once the barns are being cleaned	
6		out, the manure will be transported offsite. So there	
7		is no manure from no manure contaminated runoff from	
8		manure storage on site.	
9		So, therefore and that is what I'm saying here	
10		when I say, "There is no manure contaminated runoff	09:55
11		from the CFO facilities," the runoff that directly	
12		affected parties talk about, I believe, is from manure	
13		spreading, and this is a compliance issue.	
14	Q.	Okay. Thank you for that clarification. And perhaps	
15		those parties will will further explain what their	
16		concerns are, but I do understand how you made the	
17		determination you did, which is kind of what I	
18		was what I was after.	
19		And one more thing, and this was something I	
20		believe it was Mr. Bedster had asked previously about,	09:56
21		and that's potential conditions and carrying over	
22		conditions, which is in your decision summary, and it	
23		is, I believe, page 9, it's Appendix C. So yeah,	
24		Number 2: (as read)	
25		"Conditions to be potentially carried	

55

Questioned by Ms. Roberts

			1
1		forward from Development Permit 98-189."	
2		Would you mind just briefly explaining those conditions	
3		that, if the if the Board overturns this and a permit	
4		is issued, I think it's important for us to understand	
5		what those potential conditions that you're recommending	
6		the Board to consider be.	
7		So if you wouldn't mind, I really would appreciate	
8		just a brief description of them.	
9	Α.	MS. WEISBACH: So condition so those are the	
10		conditions that I changed or that were yeah, changed	09:57
11		or recommended to carry over.	
12		So Condition 2, land area for manure utilization.	
13		And in the development permit, they mentioned, as you	
14		can read here, a specific area that is should be	
15		available for manure spreading.	
16		So Mr. Van't Land submitted in his application a	
17		manure management plan with manure management records	
18		that will that will take care of all of the 120,000	
19		broiler birds that he proposed to expand to.	
20		So Condition 2 would only apply to the 50,000 that	09:58
21		were covered in the MD permit, but now we need to cover	
22		more. There's more manure produced, that needs to be	
23		spread somewhere, so therefore that condition needed to	
24		be updated to actually reflect the land base that is	
25		required to to spread manure accumulated by 120,000	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Ms. Roberts

1 birds. So that's an update. 2 Then the next part in that condition is, "Manure 3 must not be applied to snow and frozen ground," that is 4 similar to what AOPA describes, so that is carried over as is. 5 MS. ROBERTS: 6 Excuse me, document manager, if 7 you can just go to the top of the next page. That's what Ms. Weisbach is referring to now. 8 Thank you. 9 Α. MS. WEISBACH: So in the opening paragraph of the permits when we issue those permits, it always states 10 09:59 11 that any operator or permit holder has to adhere to 12 all -- to all requirements under AOPA and its 13 regulations, and that is one of the requirements and 14 other regulations for manure spreading. So that would 15 be redundant. The third part now is incorporation of manure 16 17 within 48 hours of land spreading. That is a condition 18 that will be carried over as it is -- or would be 19 carried over. And the reason for that is that AOPA 20 allows for several ways, and one of them is if you have 10:00 21 minimum till or zero till lands, it allows for manure 22 spreading without incorporation. 23 So the condition as it stands here in the MD 24 permit is more stringent than AOPA requirements and, 25 therefore, according to NRCB policy or approval policy,

Questioned by Ms. Roberts

1 I would have to carry that over as it is, as written. 2 So the fourth part is consideration for 3 neighbouring residences, including a separation 4 distance from such residences during manure spreading, 5 that part is very subjective and very reg (phonetic) and can't really enforce this because there are no 6 7 concrete numbers that inspectors could go with, or the operator for that matter. 8 9 So I replaced that with the regulations as they are in AOPA, and that's why I determined that this 10 10:01 11 condition -- this part of the condition should not be 12 carried forward and is being replaced by AOPA and its 13 regulations. 14 And similar to Condition 4 with dead disposal, 15 they are regulations under Alberta Environment --16 sorry, Alberta Agriculture. They have their own Act 17 that is to be enforced and the operator has to adhere 18 to. 19 Q. Okay. Thank you very much for that clarification. 20 It's much appreciated. 10:02 Mr. Chair, that's all my 21 MS. ROBERTS: 22 questions. Thank you. 23 THE CHAIR: Thank you, Ms. Roberts. 24 Ms. Stuart, any questions? 25 MS. STUART: Thank you, Mr. Chair. Yes, I do

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Ms. Stuart

1		have a couple.	
2	<u>MS.</u>	STUART QUESTIONS THE PANEL:	
3	Q.	Hi, Ms. Weisbach. Just as a follow on to Ms. Roberts'	
4		questions about runoff, I wonder if we could pull up	
5		Exhibit 3, page 6 of 32. It should be the technical	
6		document, if I've got that right. That's perfect.	
7		Thank you, document manager.	
8		So that highlighted blue area that is labelled	
9		"runoff" identifies, you know, this area around the	
10		existing barns on NE 22-9-22 that appear to drain as	10:03
11		per this diagram to the northeast of the existing barns	
12		into a catchment area on SW 26-9-22. And then, as	
13		Ms. Roberts addressed, both the Bedster and Clifton	
14		rebuttals expressed concerns that you I think said you	
15		believe are due to manure spreading rather than that	
16		facility; is that right?	
17	Α.	MS. WEISBACH: Correct.	
18	Q.	And I'm just wondering, do any of those concerns	
19		when Mr. Bedster, for example, expresses concern that	
20		the runoff possibly flows from NE 22-9-22 through SE	10:04
21		9-22 and then onto the Bedster land, is any of that	
22		potentially due to short-term manure storage?	
23	Α.	MS. WEISBACH: When I talked to Mr. Van't Land	
24		about manure storage or short-term manure storage, he	
25		indicated to me that the manure is being transported	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Ms. Stuart

1		right after cleaning the barn to either other fields	
2		where it's going to be spread to a dry corner or to the	
3		other operation.	
4		So he he stated that manure is not stockpiled	
5		in front of the barns for an extended period of time to	
6		cause runoff.	
7	Q.	Okay. Thank you.	
8		Changing directions a bit, and I appreciate that	
9		you explained some of this in the decision summary, and	
10		just for a little clarification, recognizing fully that	10:05
11		you are bound by AOPA legislation and that AOPA does	
12		not specifically talk about Intermunicipal Development	
13		Plans, is it your understanding that in the	
14		Municipal Government Act that IDPs have a hierarchy	
15		relative to municipal development plans?	
16	Α.	MS. WEISBACH: I do understand that, yeah.	
17	Q.	So my question is, because I think some of the policy	
18		documents, there's discussion about if the municipal	
19		development plan includes a reference to the	
20		Intermunicipal Development Plan, then you, as the	10:06
21		approval officer, would consider it; is that right?	
22	Α.	MS. WEISBACH: Under <i>AOPA</i> , we are bound to look	
23		under MDP, as you know, right? So if the if other	
24		planning documents are sufficiently referenced in the	
25		MDP, then we will consider. But at this point, I'm	

			1
1		strictly bound to AOPA.	
2	Q.	Okay. Understood, and I appreciate that.	
3		And so just to clarify, had the MDP specifically	
4		or more robustly referenced the IDP relative to the CFO	
5		exclusion zone and the IDP's description of potential	
6		to improve operations, then that would have been a	
7		consideration for you potentially?	
8	Α.	MS. WEISBACH: If it had been, yes, I would have	
9		to consider it.	
10	Q.	Okay. I appreciate that. Thank you very much.	10:
11	MS.	STUART: That's all I have, Mr. Chair.	
12	THE	CHAIR: Thank you, Ms. Stuart.	
13		Mr. Graham, any questions for Ms. Weisbach?	
14	MR.	GRAHAM: Yes, I do.	
15	<u>MR.</u>	GRAHAM QUESTIONS THE PANEL:	
16	Q.	Ms. Weisbach, on page it would be on page 3 of the	
17		MDP. If we could bring that up, please?	
18	THE	CHAIR: I imagine you know which exhibit	
19		that is. It's probably labelled, but just in case.	
20	MS.	FRIEND: This is Laura. I believe it's	10:
21		Exhibit 8.	
22	THE	CHAIR: Thank you.	
23	Q.	MR. GRAHAM: Actually, the numbered page 3.	
24		It's kind of confusing because some of these pages are	
25		numbered and some are not. It's the page that shows	

AMICUS REPORTING GROUP - A Veritext Company

i			케
1		the hierarchy of plans.	
2	THE	CHAIR: May need a bit of help here,	
3		Mr. Graham. Is it towards the beginning or is it	
4	MR.	GRAHAM: Yes, it's right near the	
5		beginning. It's page 3 of the actual document. At	
6		least	
7	THE	CHAIR: Here we go. Here we go. Yeah.	
8	Q.	MR. GRAHAM: Okay. That shows just go up a	
9		little bit. No, it must be down, then. I missed it on	
10		my screen. Right there.	10:08
11		Ms. Weisbach, did you view this when you looked at	
12		the MDP for the hierarchy of plan, and how would	
13		you how did you deal with this?	
14	Α.	MS. WEISBACH: AOPA is very specific on the	
15		planning documents that I must consider when I make the	
16		decision on an application. And it very specifically	
17		says the MDP, so municipal development plan that must	
18		be considered and it has to be consistent with the land	
19		use provisions in that plan.	
20		So if the MDP incorporates other documents such as	10:09
21		land use bylaws or IDPs, Intermunicipal Development	
22		Plans, then then I must consider them as well,	
23		and so that is how we deal with considering IDPs.	
24		It hinges on the reference of a specific document, if	
25		it's part of the MDP.	
1			

Ī

Questioned by Mr. Graham

1	Q.	Okay. Thank you.	
2		One other question, and I don't believe we have to	
3		bring up a document for this one, when you're going	
4		through this, what was the timeline or the time frame	
5		that Coalhurst or Lethbridge County sent replies? Do	
6		you recall?	
7	Α.	MS. WEISBACH: We we deem an application and	
8		that day the application is being sent to the referral	
9		agencies and the County. So by then, they have	
10		20 working days to respond. Typically, I think that's	10:10
11		the time frame they do have.	
12		And the County, I don't know the specific date,	
13		but the County responded. Now the Town of Coalhurst	
14		did not receive because they are not within the	
15		notification radius.	
16	Q.	Okay. And the response from Lethbridge County, can you	
17		just talk about that a little bit, please?	
18	Α.	MS. WEISBACH: Do you have any specific questions	
19		in respect to their	
20	Q.	Did they reference the IDP or anything there? That's	10:11
21		the question I'm asking.	
22	Α.	MS. WEISBACH: I believe they did.	
23	Q.	Okay. Thank you. Right now, that's all. Thank you,	
24		Ms. Weisbach.	
25	THE	CHAIR: Thanks, Mr. Graham.	

Questioned by The Chair

10:12

10:13

1	THE	CHAIR QUESTIONS THE PANEL:
2	Q.	Good morning, Ms. Weisbach. I have a couple of
3		questions. And some of the questions you've probably
4		noticed are sort of being put to you because if the
5		Board does overturn their decision and approve it
6		despite a potential inconsistency, then some of these
7		questions may be important in terms of conditions or
8		better understanding of what might have to be in that
9		approval.
10		So with that in mind, the manure management plan,
11		it seemed to incorporate, at least some of the
12		documents we had, a third operation. Was that part of
13		your approval process is how all those operations would
14		be handled in manure management plan or just
15		specifically the northeast proposed operation?
16	Α.	MS. WEISBACH: So when we look at applications,
17		one of the requirements is to under the Act also,
18		they either have to provide sufficient manure spreading
19		lands, which is determined by the land the land
20		based code, or they can alternatively, they can
21		provide us with a manure management plan. So there are
22		these two options.
23		And Mr. Van't Land went with the manure management
24		plan, and this and that plan was prepared by an
25		agrologist, professional agrologist, who is looking

Questioned by The Chair

			1
1		after the manure spreading and manure application in	
2		case of Mr. Van't Land	
3	Q.	And you	
4	Α.	MS. WEISBACH: that plan as being sufficient	
5		for manure spreading or taking care of their manure	
6		production.	
7	Q.	So you take no issue with the manure management plan?	
8	Α.	MS. WEISBACH: No, because it was prepared by a	
9		professional.	
10	Q.	Okay. Thank you. Does this operation have nine	10:13
11		months' storage?	
12	Α.	MS. WEISBACH: No, they don't. They do they	
13		go with short-term manure storage, which is an	
14		acceptable way of storing manure. And short-term	
15		manure storage is also here under the standards and	
16		admin regulations manure storage Section 5.	
17		There are certain requirements that need to be	
18		fulfilled, so you cannot store it longer than seven	
19		months every three years. But as Mr. Van't Land	
20		pointed out, manure is being carried to the fields	10:14
21		where manure will be stored. So then they will be	
22		basically transported to various areas of those fields	
23		that will receive that manure.	
24	Q.	Okay. So just perhaps help me or remind me, is there a	
25		variance or something that's required if there is not	

Questioned by The Chair

			1
1		nine months' storage available?	
2	Α.	MS. WEISBACH: No. No. Short-term manure	
3		storage is an acceptable way to store your manure.	
4	Q.	Okay. And so when that happens, then really, the	
5		approval officer, do I have this right, the approval	
6		officer then assumes it's not an application issue; it	
7		just moves offsite. And if there's an issue in terms	
8		of the number of fields that it could be stored on to	
9		meet the seven months and three-year requirement or	
10		runoff issues, it is now purely a compliance issue?	10:15
11	Α.	MS. WEISBACH: Right.	
12	Q.	So if it's short term, the approval officer is	
13		essentially out of the picture?	
14	Α.	MS. WEISBACH: Right.	
15	Q.	And that's regardless of concerns that if there are	
16		concerns that are raised by residents in terms of the	
17		amount of land available to store or runoff issues,	
18		that would just be referred to compliance?	
19	Α.	MS. WEISBACH: It would be.	
20	Q.	Okay. Is it relatively unique to have short-term used	10:15
21		in replacement of nine months' storage, or is that	
22		fairly common?	
23	Α.	MS. WEISBACH: For broiler operations, it is	
24		actually quite common. We see that a lot. Some feed	
25		lots also have short-term manure storage, so it's a	

Ī

Questioned by The Chair

1		common form of manure storage, so to say.	
2	Q.	Okay. Thank you. Just going through my notes here.	
3		So just maybe two other questions. One of the	
4		conditions to be carried over because it's more	
5		stringent and to meet the policy that is you carry	
6		that forward in terms of the 48-hour incorporation or	
7		incorporation within 48 hours, are you aware of or	
8		was Double H using zero or minimum till? Is that their	
9		common practice, do you know?	
10	Α.	MS. WEISBACH: Well, I'm not entirely sure what	10:17
11		your question really is.	
12	Q.	So my question, I guess where I'm going with this is if	
13		they are minimum zero till, and this may be better put	
14		to and I will likely put this to Double H, as	
15		well but if a condition is being carried over,	
16		presumably, if he's on zero till, either he's going to	
17		incorporate then to meet the condition; otherwise, it's	
18		a compliance issue or he put an amendment, request for	
19		an amendment potentially.	
20		And I guess, you know, from the Board perspective,	10:17
21		it would be better to deal with that now perhaps, if,	
22		you know, if the application was to be approved, it	
23		might be better to deal with that now?	
24		But that question perhaps is better for Double H.	
25		I just thought perhaps that was part of the	

Ī

Questioned by The Chair

1		conversation when you were dealing with the application	
2		in terms of their operating practice, similar to the	
3		short-term storage where the nine month, I was	
4		wondering if that was part of the conversation between	
5		you and Mr. Van't Land.	
6		So you're unaware? You're not sure?	
7	Α.	MS. WEISBACH: No, we didn't we didn't speak	
8		on that.	
9	Q.	All right. Thank you.	
10		And in your decision document, you indicated that	10:18
11		there was no need to really move further with directly	
12		affected party concerns because the application was to	
13		be denied, yet you have a series of potential	
14		conditions that you think the Board ought to look at	
15		if again, if the application was to be approved.	
16		So is that kind of common practice where you	
17		would you have a series of potential suggestions or	
18		conditions on a denial in case the file or the	
19		decision is overturned, but not concerns from the	
20		directly affected parties. Like, you don't go that	10:19
21		far.	
22		Is that sort of the operating procedure for	
23		applications where the conditions in existing permits,	
24		perhaps, post-construction, inspection, those are dealt	
25		with, but gap concerns essentially are left? If there	

Questioned by The Chair

			1
1		is a hearing request, that's where you believe those	
2		would be best dealt with?	
3	Α.	MS. WEISBACH: We don't that part isn't	
4		covered by approval policy, to my knowledge.	
5		So what I did was to basically cover the	
6		standard standard conditions, what we would do with	
7		the with development permits.	
8		So that is a standard that we carry them over and	
9		incorporate yeah, we carry them over. And the way	
10		we do that, that's covered by policy.	10:20
11		And then we do have the standard conditions such	
12		as the concrete, so construction conditions, as well as	
13		post-construction inspections and the deadline,	
14		construction deadline. Those are standard conditions	
15		or standard procedures.	
16		Other conditions arising out of Statements of	
17		Concern would then be going beyond. So I did I did	
18		not do that because I denied the application.	
19	Q.	Okay, understood. Thank you very much. Those are my	
20		questions.	10:20
21	THE	CHAIR: Mr. Kennedy, did you want to have	
22		or did you want to direct some questions to	
23		Mr. Cumming?	
24	MR.	KENNEDY: I do. Before I do so, because we	
25		seem to be splitting these out, as long as we're	

Questioned by Mr. Kennedy

			1
1		comfortable that nobody else has questions of	
2		Mr. Cumming, I'm happy to start.	
3	THE	CHAIR: Oh, in terms of other parties?	
4	MR.	KENNEDY: Yeah.	
5	THE	CHAIR: Okay, well, let's ask the	
6		question. So are any other parties looking to ask a	
7		question of Mr. Cumming?	
8		Hearing none, you may proceed.	
9	MR.	KENNEDY: Thank you.	
10	<u>MR.</u>	KENNEDY QUESTIONS THE PANEL:	10:2
11	Q.	Mr. Cumming, my questions will relate to I think why	
12		you're here, and that's kind of the proposed way of	
13		dealing with statutory plans beyond the MDP on a	
14		go-forward basis, in terms of board review policy. Do	
15		I have that right?	
16	Α.	MR. CUMMING: Yes. Good morning, Mr. Kennedy.	
17		It's essentially Part B of the submission, which is	
18		Exhibit 16 that we put forward.	
19	Q.	And if I might, and hopefully it will be a lot easier	
20		on the document managers. Could we get Exhibit 16, pdf	10:2
21		page 7? That's perfect, and it's really where it's	
22		paragraph 23 and then the following paragraphs	
23		describing the process that you're here to speak to.	
24		Is that did I read that correctly?	
25	Α.	MR. CUMMING: That is essentially correct,	

F

Questioned by Mr. Kennedy

7

1		Mr. Kennedy.	
2		I would point out to you, if we could go to pdf	
3		page 5, please, right there, Section 12, is that the	
4		Agricultural Operations Practices Act, Section 20(1),	
5		and you've heard this before, is quite specific about	
6		what an approval officer must consider when they are	
7		looking for the consistency, and it is municipal	
8		development plan land use provisions.	
9		As you pointed out and as we've identified here,	
10		the Municipal Government Act was amended in late 2017 I	10:23
11		believe it was, and there was a change in the	
12		Municipal Government Act and a change in the hierarchy	
13		of the different plans as has been previously	
14		identified.	
15		When that change was made, there were no	
16		consequential amendments made to AOPA. So this	
17		provision about the municipal development plan and more	
18		specifically the land use provisions within that plan	
19		still applies despite the changes to the Municipal	
20		Government Act.	10:23
21		If you could go to the page 7 again	
22	Q.	Thank you. And, Mr. Cumming, none of my questions	
23		hopefully will be asking for a legal opinion and how	
24		Section 20 perhaps might be interpreted given the, you	
25		know, whether there's an interpretation requirement	

Questioned by Mr. Kennedy

			1
1		driven by the changes to the Municipal Government Act.	
2		I won't be going there, or I don't anticipate going	
3		there.	
4		And I want to preface all of my questions with an	
5		acknowledgement of how constructive I think this	
6		approach is, you know. Put forward the policy, let's	
7		examine it in a hearing, perhaps with some, you know, a	
8		live example as to how that policy might work.	
9	Α.	MR. CUMMING: Just one correction there. I	
10		think you're calling it a policy at the moment. It's	10:24
11		actually a framework, and we're putting this thing	
12		forward to sort of update, you know, provide updates	
13		that may be helpful and may be useful for the Board,	
14		but it is certainly not in our approvals policy at this	
15		point in time.	
16	Q.	No, fair. If I was suggesting that it was in the	
17		policy at this point, I didn't mean to do that. But am	
18		I fair to assume that at some point, language, you	
19		know, there could be a policy amendment driven by by	
20		this consideration?	10:25
21	Α.	MR. CUMMING: We are certainly looking at	
22		improving our policy with respect to how this might be	
23		considered.	
24	Q.	Sure. And all of my questions so we've got the	
25		23(a), (b), and we've got a reference to statutory	

Questioned by Mr. Kennedy

ir			ন
1		plans, and it uses the example of IDPs. My questions	
2		will all be dealing with the instance where the	
3		statutory plan under consideration, the other statutory	
4		plan under consideration, is an IDP.	
5		So I'm not talking about land use bylaws. Does	
6		that make sense?	
7	Α.	MR. CUMMING: I understand where you're coming	
8		from, yes.	
9	Q.	And is it fair to assume that we have both an (a) and a	
10		(b) because there is a potential for inconsistency	10:26
11		between a Municipal Development Plan and other	
12		statutory plans, specifically in Intermunicipal	
13		Development Plan?	
14	Α.	MR. CUMMING: Yes, absolutely.	
15	Q.	And, Mr. Cumming, is there any magic so there's an	
16		"and" between (a) and (b). Is there any magic to the	
17		order of (a) and (b)?	
18	Α.	MR. CUMMING: It comes back to the legislation	
19		that we have right now. So as I pointed out earlier,	
20		AOPA specifically references the MDP land use	10:27
21		provisions, so we're looking at consistency with the	
22		MDP land use conditions sorry, provisions.	
23		Then once we've done that, then we're going to	
24		look at the next step, which is in the proposed	
25		framework here, is that that MDP specifically	

Questioned by Mr. Kennedy

1		cross-references the statutory plan, IDP in this case,	
2		relevant to that particular site.	
3	Q.	So I'm going to visit so the approval officer didn't	
4		follow this format; is that fair? And I'll explain why	
5		I'm saying that is is she found the inconsistency,	
6		the exclusion zone provision in the MDP, but then she	
7		did look to the MDP to see whether the IDP was	
8		sufficiently cross-referenced to bring it into her	
9		table of consideration?	
10	Α.	MR. CUMMING: I believe if you look at the	10:28
11		decision summary for this particular application, that	
12		the approval officer cross-referenced our existing	
13		policy which provides that direction, and that is in	
14		there.	
15	Q.	So what I'm asking is but the proposed policy, this	
16		is not what she you know, this would take a new	
17		path?	
18	Α.	MR. CUMMING: It's proposed framework; it's not	
19		policy at all at this point in time, but it would take	
20		a different path to what's now current policy.	10:28
21	Q.	If I refer to it as a proposed policy it's because	
22		that's the way I wrote it in my notes; I'm not	
23		suggesting that it is current policy, so	
24	Α.	MR. CUMMING: Forgive me if I keep on correcting	
25		you then.	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Mr. Kennedy

			īl
1	Q.	My question is this, is I think there would be a	
2		substantial difference, and maybe a constructive	
3		difference, if we started asking ourselves the (b)	
4		question before the (a) question.	
5		So can we follow that path a little bit and	
6		explore that piece?	
7	Α.	MR. CUMMING: So I'm not sure what you want me	
8		to explore. I understand	
9	Q.	At this stage all I want you to do is understand that	
10		I'm going to start with (b) and say let's do make	10
11		the way we the order in which we address this the	
12		inverse.	
13		So when I first asked, does it you know, is it	
14		identifying the order of which these things must be	
15		done, and I think your answer was yes, so the "and" has	
16		a qualifier. Because, generally, if you ask yourself	
17		two questions with an "and," it means you will have to	
18		answer both questions, and whereas if the "and" had the	
19		qualifier to say yes, it's consistent with the MDP land	
20		use provisions, then we'll go on and consider (b). I	10
21		think that's what you told me.	
22	Α.	MR. CUMMING: Yes.	
23	Q.	Okay. So my proposal now is to start with (b), so just	
24		flip the order in which those two items are addressed.	
25		And I'm going to run through that using the	

10:29

10:30

Questioned by Mr. Kennedy

			1
1		Double H Feeders as an example perhaps. Do you follow	
2		me?	
3	Α.	MR. CUMMING: Yes, I'm waiting for you to carry	
4		on.	
5	Q.	All right. Good. So what I think we heard, and the	
6		IDP provision that we're looking at, so I'm not going	
7		to pull that up again, but it's the 4.1.5 of the	
8		Intermunicipal Development Plan that we pulled up when	
9		the approval officer was answering some questions,	
10		contemplates the potential for expansion of existing	10:3
11		feedlots. So you don't take issue with that?	
12	Α.	MR. CUMMING: No. My look and observation of	
13		4.1.5 is that it actually has several sections within	
14		it, even though it calls itself one section. So I	
15		think you need to be careful as to how you deal with	
16		each one of those particular questions or set of	
17		circumstances that it's suggesting.	
18	Q.	Yeah. So, clearly, it provides no new operations, but	
19		that's not a relevant consideration to the	
20		Double H Feeders. Is that fair?	10:3
21	Α.	MR. CUMMING: The Double H Feeders' application	
22		is what we would consider to be an expansion.	
23	Q.	So in that sense, the first part doesn't apply?	
24	Α.	MR. CUMMING: Correct.	
25	Q.	It's not a new operation.	

 			1
1		So the second part is really one provision with a	
2		number of, you know, directions to have regard for	
3		various things, qualifiers, caveats, whatever you might	
4		characterize them; is that fair?	
5	Α.	MR. CUMMING: We would potentially characterize	
6		those as tests or conditions which is expressly	
7		excluded from what an approval officer has to consider	
8		under AOPA.	
9	Q.	Now, if those tests or provisions are driven to a	
10		planning and exemption, are they still tests or	10:32
11		conditions that an approval officer cannot look to?	
12	Α.	MR. CUMMING: I think the part in AOPA is pretty	
13		clear about having to exclude test of conditions. I	
14		just need to pull up that part of AOPA, unless you have	
15		it handy?	
16	Q.	I do have it handy.	
17	Α.	MR. CUMMING: I have it here. It's	
18		Section 20(1.1) if that helps. And I don't know that	
19		AOPA is an exhibit and I don't know if it is there and	
20		available to be pulled up.	10:33
21	Q.	So maybe very briefly, we could pull up pdf page 78	
22		again of Exhibit Exhibit 7. And I apologize to the	
23		document managers. Again, this is my reference is	
24		going to cause a bit of a delay because just the	
25		magnitude, the size of that document. Thank you.	

 			1
1		So the current policy you know, there is a	
2		provision in this IDP that says: (as read)	
3		"No new operations within the exclusion	
4		area in Map 11."	
5		So that's a clear land use provision and there is an	
6		inconsistency if it's a new operation.	
7		So looking at the second part of that, are those	
8		all tests or conditions? So let's just	
9	Α.	MR. CUMMING: Let me read what AOPA says,	
10		Mr. Kennedy. In 20(1).1, it says, "In considering"	10:3
11		under subsection 1, which deals with the consistency	
12		with the Municipal Development Plan, amongst other	
13		things: (as read)	
14		"whether an application is consistent	
15		with the Municipal Development Plan land	
16		use provisions, an approval officer	
17		shall not consider any provisions	
18		respecting tests or conditions related	
19		to the construction of or the site for a	
20		confined feeding operation or a manure	10:35
21		storage facility, nor any provisions	
22		respecting the application of manure	
23		composting materials or compost."	
24	Q.	Right. So let's just look at the very first one, you	
25		know, upgrade or modernize, because, presumably, if	
			1

Ī

Questioned by Mr. Kennedy

1

1		we're expanding an operation that's been around for a	
2		while, I think the municipal development permit for the	
3		northeast quarter operation which is being expanded	
4		was it predated the NRCB. Is that your	
5		understanding?	
6	Α.	MR. CUMMING: That is correct, yes.	
7	Q.	So it might be that some of some of the facilities,	
8		and I think what Double H Feeders is saying is we are,	
9		in fact, replacing facilities from the 1993 operation,	
10		which is on a different land location?	10:36
11	Α.	MR. CUMMING: Under a different permit.	
12	Q.	Under a different permit. But if it were considered to	
13		be one one application and you were looking at both	
14		operations falling under the purview of this operation,	
15		is and my question is very specific.	
16		So this upgrade and modernize and this is why I	
17		think this qualifier might be relevant because I think	
18		it has to be understood with respect to Section 1.1,	
19		within the requirements of AOPA and the regulations.	
20		So perhaps all it's calling for is an	10:37
21		acknowledgement and an understanding as to whether the	
22		expansion will take out manure storage facilities and	
23		replace them that don't meet the current standards	
24		with facilities that do meet the current standards. So	
25		that's an upgrade and a modernization. And that's	

Questioned by Mr. Kennedy

			11
1		why you know, I'm trying to understand what those	
2		bracketed terms mean, but it could mean that. And if	
3		it means that, is it it's onside with 1.1; correct?	
4	Α.	MR. CUMMING: You are making a large number of	
5		assumptions there which aren't necessarily part of what	
6		was originally applied for.	
7		What was originally applied for deals specifically	
8		with the northeast barns at this particular facility.	
9		None of the existing barns are proposed to be upgraded	
10		or changed.	10:38
11		Your assumption is that the separate operation,	
12		which is on the northwest part of the property is is	
13		part of this whole application, and that's certainly	
14		not the application that was in front of the approval	
15		officer.	
16	Q.	But let's so let's put Double H Feeders and consider	
17		it I just want your interpretation of 1.1 and this	
18		very provision.	
19		If there were manure storage facilities that were	
20		being replaced during the expansion that would bring	10:38
21		them current with AOPA, does that mean that they are a	
22		land use provision? So not a you know, it's just an	
23		acknowledgement that AOPA is going to bring them up to	
24		standard.	
25	Α.	MR. CUMMING: I think you're making an	

Questioned by Mr. Kennedy

1		assumption there as	well. And I don't want to be	
2		argumentative here,	but you're assuming that whatever	
3		is constructed right	now doesn't meet <i>AOPA</i>	
4		requirements, and I	don't know that for a fact. So I	
5		can't make that assu	mption.	
6	Q.	And neither am we	ll, I'm using an example. I'm	
7		trying to understand	Section 4.1.5 of the IDP and how	
8		it might work when w	e're dealing with the second part	
9		of that which deals	with expansion facilities and AOPA,	
10		and the proposed pol	icy that you're putting forward.	10:39
11		So we've got a live	IDP that is a little more relaxed	
12		than the MDP, so it i	might allow an expansion where the	
13		MDP says no.		
14		So my question	is, the	
15	Α.	MR. CUMMING:	I think what you're jumping to	
16		a conclusion there b	ecause in the example that you're	
17		using, we don't get	past what is Section subsection	
18		22 on pdf 7 of Exhib	it 16.	
19	MS.	VANCE :	Mr. Cumming, this is Fiona Vance.	
20		I might just suggest	you wait for Mr. Kennedy to ask	10:40
21		his question.		
22	Α.	MR. CUMMING:	0kay.	
23	MS.	VANCE :	Thank you.	
24	Q.	MR. KENNEDY:	So take me back, sorry,	
25		subsection? What am	I missing?	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Mr. Kennedy

1	Α.	MR. CUMMING: Sorry, it's not on that one; it's	
2		in the proposed framework that we have there, which is	
3		paragraph 22 on pdf page 7. And you're talking about	
4		paragraph 23, but in order to get to paragraph 23, we	
5		have to go through paragraph 22.	
6	Q.	0kay.	
7	Α.	MR. CUMMING: The way I understand what you're	
8		suggesting now is we wouldn't get through paragraph 22	
9		to get to paragraph 23.	
10	Q.	Maybe if we can pull that up, and it's Exhibit 16	10:41
11	Α.	MR. CUMMING: Pdf 7.	
12	Q.	Yeah. So I'm sorry, Mr. Cumming, I understand	
13		paragraph 22, and it relates to my question to you in	
14		terms of the priority of (a) and (b), and it's simply a	
15		statement that says, "we're going to start with (a)."	
16		So it's not just an "and." It's an "and" with a	
17		qualifier that will only go on to (b) if (a) doesn't	
18		eliminate the application; correct?	
19	Α.	MR. CUMMING: Correct. The example that you're	
20		using, though, however, I understand if we don't get	10:42
21		past we don't get to that paragraph 23.	
22	Q.	Yeah, well, that's why I'm saying let's start with (b)	
23		because I think there might be some merit in	
24		considering the potential of starting with (b) rather	
25		than (a), and then answering both questions.	

Questioned by Mr. Kennedy

1 At least if it applies to IDPs and, again, none of 2 this discussion relates to land use, bylaws or other 3 statutory plans. 4 So, with that, and I'm not taking issue with the 5 statement in paragraph 22. I understand that's what's being done and I understand that's what is being 6 7 proposed as potential policy, not current policy, but potential policy. And that's why I'm visiting that is 8 9 I think it -- at the very least, we may want to ask ourselves the question as an organization as to whether 10 10:43 11 there's merit in asking (b) first. 12 And I do that because we all -- I think everybody 13 acknowledges that the MGA now has a provision that says 14 IDPs prevail over MDPs if there is -- in the case there 15 is an inconsistency. I have that right? I don't disagree with you that 16 Α. MR. CUMMING: 17 that's what the MGA says. The challenge is that AOPA 18 doesn't specify that. 19 Q. Yeah, so when people read -- I mean, there could be an 20 explanation that when people now read an MDP and there 10:44 21 is a provision in an MDP that is inconsistent with the 22 provision that applies in an IDP, it could be that you 23 cannot simply read the MDP. It makes no sense to apply 24 a provision that doesn't apply anymore. If it doesn't 25 prevail, you've got an issue.

Questioned by Mr. Kennedy

i 			ন
1		That's what I'm trying to explore with you, in	
2		terms of reversing the order of (b) and (a). Because I	
3		think if you reverse the order, you in fact would	
4		identify those situations where the provision in the	
5		MDP that you're applying may not carry the day anymore.	
6		So and, again, it's not for me to give	
7		evidence. But if we were to apply (b) first, would it	
8		address the situation where the IDP had a provision	
9		that maybe softened an MDP exclusion zone? Because I	
10		think that's what we have here with the	10:45
11		Double H Feeders IDP and not necessarily their fact	
12		situation because, again, we're talking about two	
13		different operations under different permits.	
14		But we've got an IDP that applies to these lands,	
15		and we've got an MDP that applies to these lands, and	
16		there is an inconsistency. I have that correct?	
17	Α.	MR. CUMMING: Yes, it would certainly identify	
18		it. Would it address it? I don't know that it would.	
19	Q.	Well, if you like, we can have a quick look at that and	
20		maybe identify. That was why I was going with the	10:45
21		caveat pieces, and I think your suggestion is those	
22		caveat pieces are not relevant considerations for an	
23		approval officer. Is that what you told is that	
24	Α.	MR. CUMMING: If I understand what you mean by	
25		the "caveat pieces," yes. The approval officer is very	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Mr. Kennedy

			1
1		limited under the AOPA legislation as to what they can	
2		consider.	
3	Q.	Right. But they could consider, for example, an	
4		upgrade of existing manure storage facilities to AOPA	
5		standards and probably would in every application to	
6		expand an operation?	
7	Α.	MR. CUMMING: If those if those upgrades were	
8		proposed as part of the application, yes, they would	
9		consider them. Normally existing operations are looked	
10		at purely on the risk to the environment posed by those	10:46
11		operations. I think that's different.	
12	Q.	But if the risk to the environment was identified and	
13		there was a need to upgrade upgrade to respond to	
14		that risk, the approval officer would typically apply	
15		the current AOPA standards and requirements?	
16	Α.	MR. CUMMING: That's not that's not what's	
17		set out in the legislation. The risk needs to be	
18		addressed, but it doesn't necessarily have to meet the	
19		AOPA standard. So they could be slightly different.	
20	Q.	But well, they could be slightly different. How	10:47
21		often are they slightly different, do you have any	
22		sense?	
23	Α.	MR. CUMMING: I can't give you an honest opinion	
24		on that point.	
25	Q.	But it's commonly the approval officer might look at	

Questioned by Mr. Kennedy

h			ㅋ
1		that application and say, "Here's what the current AOPA	
2		standard is and the purpose for those requirements. If	
3		there's a risk and we're addressing it, let's look at	
4		the current standard." Is that a starting point that	
5		you would typically find in an approval officer	
6		decision summary?	
7	Α.	MR. CUMMING: I think that that conversation	
8		happens prior to a decision being issued with the	
9		applicant for them to figure out what they want to do	
10		as part of their application, which the approval	10:48
11		officer would then consider.	
12	Q.	Okay. So okay. Well, I have further questions, but	
13		frankly, I'm not sure whether they're constructive at	
14		this point because I think we've I understand your	
15		position is you don't think there's any merit in moving	
16		(b) in advance of (a), identifying whether there's an	
17		IDP provision that prevails over an MDP provision?	
18	Α.	MR. CUMMING: I think if you do swap what we	
19		have identified as (a) and (b) around, certainly that	
20		would identify an IDP potential difference with an	10:48
21		MDP, but it wouldn't necessarily address it.	
22	Q.	So let's do that for the moment. And if we identify an	
23		IDP provision that would be more permissive than an MDP	
24		provision, so the MDP provision	
25		Well, let's do it a little differently. Let's use	

Questioned by Mr. Kennedy

Ī			
1		in our example an MDP provision that is permissive of a	
2		CFO expansion. So the approval officer goes forward	
3		no that gets us to (b).	
4		My problem is this: We are applying an MDP	
5		provision that would say no to an operation when that	
6		MDP provision may not be the statutory provision that	
7		applies to the operation. That's what happens when we	
8		exclude consideration of a statutory plan that in	
9		hierarchy is at a higher level, so prevails. Am I	
10		wrong in that statement? Is that	10:50
11	Α.	MR. CUMMING: No, I think you're right. You	
12		know, I wanted to also point out to you that the way	
13		that this framework is set out, it wouldn't matter if	
14		that IDP provision was less stringent or more stringent	
15		than the MDP provision.	
16		So I think you have to consider that as well.	
17		It's not just always that it's going to be less	
18		stringent and less permissive, if you will.	
19	Q.	Well, here, it would always if it's more	
20		restrictive, then it's important that we consider it,	10:50
21		because if it says no to the application and the	
22		approval officer says "I'm not looking at it because	
23		the MDP tells me that it's okay to build a CFO on this	
24		site and the IDP isn't sufficiently referenced in the	
25		MDP for me to get there and look at that under	
			1

1		statutory plan," then you are then we're approving	
2		an operation that's inconsistent with a land use	
3		provision that prevails over the MDP. Is there	
4		something wrong with my logic in running through that	
5		scenario?	
6	Α.	MR. CUMMING: Under the <i>MGA</i> , you're absolutely	
7		right. Under AOPA, the approval officer would be doing	
8		the right thing at that point in time as to they're	
9		required to do under that statute.	
10	Q.	And not that this requires an answer, but, you know,	10:51
11		the MGA applies throughout this province whether and	
12		if there is a provision that affects the interpretation	
13		of a statutory plan in the MGA, you know, we can't	
14		ignore the fact that the MGA exists I would suggest.	
15		And, again, does this policy meet that	
16		expectation?	
17		And I'm not looking for a legal opinion. And	
18		that's why this question is a bit awkward, and if you	
19		want to just decline answering it, that's fine.	
20		Perhaps Ms. Vance can address this in final argument or	10:52
21		in redirect, more of a legal question so perhaps final	
22		argument, but I think there's a real question that	
23		needs to be addressed.	
24	Α.	MR. CUMMING: I agree that it does put approval	
25		officers in an awkward position from time to time.	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by The Chair

			1
1	Q.	Well, and perhaps it puts neighbours and municipalities	
2		in an awkward position as well because our decisions	
3		affect not only the Board; they affect operators, they	
4		affect neighbours.	
5		Our legislation is to address communities, and the	
6		fact that we put an approval officer or legal counsel	
7		or the Board in an awkward situation should not be our	
8		priority. That's not our main concern.	
9		So, thank you, Mr. Cumming, those are my	
10		questions.	10:53
11		Ms. Weisbach, I overlooked thanking you. I was	
12		thinking that I should have thanked you, and I missed	
13		that. Your answers are very helpful, and Mr. Cumming,	
14		thank you. Those are my questions.	
15	THE	CHAIR: Mr. Kennedy, thank you.	
16		Mr. Cumming, I just have one question.	
17	THE	CHAIR QUESTIONS THE PANEL:	
18	Q.	And I would agree, you know, Mr. Kennedy's outlined it;	
19		there's a bunch of legal interpretation that has to	
20		happen here. And this is probably not, you know, maybe	10:53
21		perhaps even the forum. The Board will have to	
22		struggle with this for sure, but it's when we need to	
23		struggle about it is really the question.	
24		But my question to you is if there's statutory	
25		interpretation rules that you may or may not be	

Questioned by The Chair

1			1
1		familiar with, but I think one that you might be	
2		familiar with is if an outcome would lead to an	
3		absurdity as an example, then even regulators that need	
4		to interpret the law can interpret it somewhat	
5		differently if it leads to an absurd answer as an	
6		example.	
7		Are you aware of where AOPA directs you very	
8		specifically in many places that you have said,	
9		"Well, in this case we're not going to follow AOPA."	
10		Has your policy recognized any potential	10:54
11		inconsistencies or absurdities in AOPA, and therefore	
12		you've said, "Well, this time we're not going to follow	
13		very prescriptive direction from AOPA"?	
14	Α.	MR. CUMMING: What I can say is that AOPA does	
15		allow for variances to be utilized, and our policy	
16		outlines that if a variance is going to be considered,	
17		that it needs to be explained as to why a variance is	
18		being used and being proposed.	
19		So it needs to be very clear as to why something	
20		is not going to be not going to be done.	10:5
21	Q.	Okay. So I guess I could be a little more specific; I	
22		thought you might just jump to it.	
23		But as you know in your policy under deemed	
24		incapacity, Section 18.2(b) states, you know, that the	
25		numbers in a municipal permit are the numbers that are	

AMICUS REPORTING GROUP - A Veritext Company

Ī

Questioned by The Chair

1

1		to be used. But there was some potential outcomes from	
2		strictly applying that very prescriptive piece of	
3		legislation that led to a policy shift, and, you know,	
4		I would think that rightly so.	
5		But it essentially directs approval officers to	
6		ignore that piece or maybe not ignore but to apply a	
7		different provision in terms of using capacity rather	
8		than strictly municipal numbers. Does that kind of	
9		ring a bell?	
10	Α.	MR. CUMMING: Are you talking about the Act and	10:56
11		not the policy when I assume that you're referring	
12		to Section 18?	
13	Q.	Yeah, sorry, the Act under Section 18.2, but the policy	
14		is I wrote it down here somewhere. Deeming capacity	
15		for grandfathered operations, I think it's 216-5; I'm	
16		just kind of going by memory there. I was looking at	
17		it, and I thought I had written it down here, so my	
18		apologies.	
19		So in that policy, it you know, approval	
20		officers are directed to or basically the policy	10:56
21		says that that one piece of the legislation does not	
22		need to apply because strict application of the act in	
23		that section will lead to potentially an absurd	
24		outcome.	
25		So my question isn't to debate that; it's really	

Ī

Questioned by The Chair

			1
1		to say if a statutory interpretation were presented or	
2		if you worked through with legal counsel, statutory	
3		interpretation rules that would allow you to sort of	
4		say, "Yeah, you know, perhaps the MGA the changes in	
5		the MGA now could be reflected in policy."	
6		And in terms of, as Mr. Kennedy points out,	
7		flipping those around, there would be you would be	
8		open to to making that change in policy or change a	
9		policy to reflect that if the statutory interpretation	
10		rules opened the door for you. Would that be fair?	10
11	Α.	MR. CUMMING: I want to be very careful how I	
12		respond to this because it does have potential	
13		implications and, typically, anything that we're going	
14		to put into policy which may be in conflict with the	
15		legislation, we would want to have those discussions	
16		with the owner of the legislation and probably also our	
17		policy advisory group before we ran through that.	
18		So you know, I don't want to say no, but I think	
19		that there is quite a number of steps to take place	
20		before that happens.	10
21		The one thing that does typically happen when an	
22		act is changed is that there are consequential	
23		amendments that are done to different pieces of	
24		legislation that it applies to or may impact.	
25		And when the Municipal Government Act was changed,	
			ł

10:57

1

10:58

Ī

Questioned by Ms. Stuart

1		those consequential amendments, excuse me, were not	
2		made to change any of the AOPA requirements, which	
3		leaves us in this position that we're happening right	
4		now. My presumption would be that that was done	
5		knowingly.	
6	Q.	Right. Okay. Thank you, Mr. Cumming.	
7	THE	CHAIR: Ms. Stuart?	
8	MS.	STUART: Thank you, Mr. Chair.	
9	<u>MS.</u>	STUART QUESTIONS THE PANEL:	
10	Q.	You know, one of the clear challenges in this	10:59
11		discussion is that and, Mr. Cumming, please confirm	
12		my interpretation of this is correct, that under AOPA,	
13		the approval officer is currently bound to disregard	
14		anything other than the Municipal Development Plan; is	
15		that correct?	
16	Α.	MR. CUMMING: It's very specific about what they	
17		have to consider, and it is the Municipal Development	
18		Plan land use provisions.	
19	Q.	And do you agree that in Section and I apologize,	
20		I'm just trying to bring up my Act to make sure I've	10:59
21		got the section correct, but that in AOPA	
22		Section 25 (4), Item (g), it says that: (as read)	
23		"In conducting a review, the Board must	
24		have regard to, but is not bound by the	
25		Municipal Development Plan."	

Questioned by Ms. Stuart

1	Α.	MR. CUMMING: Yes.	
2	Q.	Can you speak to how you view that statute, that piece	
3		of statute?	
4	Α.	MR. CUMMING: In my opinion, that essentially	
5		says that the Board has more authority and more power	
6		than an approval officer and may choose to do something	
7		that may not be included as part of the Municipal	
8		Development Plan, which is different to what the	
9		approval officer has to consider under Section 20.	
10	Q.	And my only other question is and recognizing and	11:00
11		respecting your comments about proper process of	
12		interpretation and the involvement of policy	
13		change I do note that you said and I, of course,	
14		don't have the exact wording in front of me, but it was	
15		around 25 minutes after 10, you alluded to Field	
16		Services revisiting policy in terms of those statutory	
17		plans and you did you did use the word "looking at	
18		improving our policy" and I just wondered if you could	
19		expand on that slightly to help the Panel understand	
20		when you use that word "improving," do you see a	11:01
21		current deficiency in the policy? And, again, I	
22		recognize you may have some question in wanting to	
23		answer this.	
24	Α.	MR. CUMMING: I think I recall what you're	
25		referring to, and our current policy is is really	
11			1

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Ms. Stuart

			1
1		not perhaps as clear as it could potentially be and	
2		some of our approval officers have asked for additional	
3		clarity as far as those concerns.	
4		So that's what we're trying to do is to add	
5		clarity, and by adding clarity, obviously, improve how	
6		considerations, Municipal Development Plans, other	
7		statutory plans are made.	
8		So our objective here is to continuously improve	
9		and provide that clarity that everyone is seeking. The	
10		framework that we proposed in the submission is just	11:0
11		that; it's a proposed framework for consideration.	
12	Q.	Okay. Thank you, Mr. Cumming.	
13	MS.	STUART: Mr. Chair.	
14	THE	CHAIR: Thank you, Ms. Stuart.	
15		Mr. Graham?	
16	MR.	GRAHAM: Not at this time. Thank you.	
17	THE	CHAIR: Thank you, Mr. Graham.	
18		And, Ms. Roberts.	
19	MS.	ROBERTS: I have no questions for	
20		Mr. Cumming. Thank you, Mr. Chair.	11:0
21	THE	CHAIR: Okay. So I think we are at the	
22		end of our questioning for Field Services.	
23	MR.	VAN'T LAND: Mr. Chair, I wonder if through	
24		the discussion, I had one question that came to mind,	
25		and I wondered if I could offer some points of	
			1

AMICUS REPORTING GROUP - A Veritext Company

Ī

1

1		clarification on two	other items?	
2	THE	CHAIR:	Who's speaking, please?	
3	MR.	VAN'T LAND:	Sorry. This is Scott Van't Land	
4		from Double H Feeders	S.	
5	THE	CHAIR:	Well, I'm kind of wondering is	
6		this something you ca	an bring up during your direct or	
7		is this a direct ques	stion for Mr. Cumming?	
8		If it's clarific	cation, I think you'll have an	
9		opportunity to perhap	os do that.	
10	MR.	VAN'T LAND:	This is a question about the	11:03
11		detailed permit for N	1s. Weisbach.	
12		So whether that	's now or later	
13	THE	CHAIR:	Oh, I see. Well, Mr. Kennedy? I	
14		mean		
15	MR.	KENNEDY:	Well, it's highly unusual. And,	
16		you know, of course,	it's in the Panel's hands as to	
17		how they're going to	field this and rule on it.	
18		But just so all	the parties understand, and I	
19		think our guides are	pretty clear is you have an	
20		opportunity, once the	at opportunity is passed, typically	11:04
21		it doesn't come back	to you. So when you had an	
22		opportunity to ask qu	uestions of the approval officer	
23		and Mr. Cumming and y	you declined to do so, that's it in	
24		the normal process.		
25		You know, and to	b be fair, is these proceedings	

1		have to move along in an orderly fashion and there's a	
2		reason why we've established the order that we have	
3		established and we follow.	
4		You know, if we conduct an open house, which we do	
5		from time to time, it's a far different format, but a	
6		public hearing has rules and the rules are there for a	
7		reason.	
8		And with that, I'll leave it to the Chair and the	
9		Panel as to how they're going to rule on your specific	
10		request, and not knowing what your question is, and it	11:04
11		could be that you put that question to the Panel and	
12		determine whether they are prepared to put it to the	
13		witness.	
14	THE	CHAIR: And I guess a quick question I	
15		had, Mr. Van't Land, is this something that you could	
16		just address in your direct if it's a clarification	
17		that you or is it something you just don't know and	
18		want an answer to?	
19	MR.	VAN'T LAND: It's a clarification.	
20	THE	CHAIR: Why don't you make that in your	11:05
21		direct. I think that's fair ball.	
22	MR.	VAN'T LAND: I can do that, too. There are two	
23		clarifications about information that's been provided	
24		that I feel might be helpful, but I will leave that at	
25		your discretion.	

Ī

Questioned by Ms. Stuart

1	THE	CHAIR:	Well, M	lr. Kennedy	/, I think he	
2		has that's his op	portunit	y when he	's presenting.	Do
3		I have that right?				
4	MR.	KENNEDY:	Yes. S	60, Mr. Var	n't Land, just	so
5		you understand, the	evidence	e that othe	er parties	
6		provide, typically o	ther par	ties may i	not agree with	it,
7		they may take issue	with tha	at and tha [.]	t's the reason	why
8		you get a chance to	present	your evide	ence and why yo	u
9		get an opportunity t	o questi	on them w	nen your	
10		opportunity to quest	ion aris	ses.		11:06
11		And, you know,	hearings	become ve	ery awkward if	we
12		start circling back.	You kn	now, I hear	rd something in	
13		the response to the	next par	ties' que	stions that I	
14		think I want to clar	ify. No	o, you had	your chance, a	nd
15		it's passed, and tha	t's a ty	vpical fee	ling. It happe	ns
16		to me all the time w	hen I'm	in a publ	ic hearing is I	
17		hear somebody furthe	r down t	the road as	sk a question a	nd
18		I think, "Boy, there	's a fol	low-up that	at I'd just lov	е
19		to ask." I don't ge	t to do	that.		
20		So find a way,	and ther	re probably	y is a way when	11:06
21		you are giving your	direct e	evidence,	you can make yo	ur
22		statement as to o	r qualif	ication a	s to how you	
23		you know, what your	evidence	e is, and [.]	then, of course	,
24		you get to final arg	ument.	And that's	s your opportun	ity
25		to say, "You heard t	his as t	he eviden	ce, and you hea	rd

Questioned by Ms. Stuart

1			
1		conflicting evidence perhaps, but here's how I want you	
2		to consider and factor that evidence," and you get to	
3		persuade the Board as to why your interpretation should	
4		be should carry the day. So that's the final	
5		argument piece.	
6		You don't get to put in new evidence at that	
7		point, but you get to present your case as to why the	
8		Board should reach a certain decision based on the	
9		evidence they've heard through the course of the	
10		hearing prior to final argument. Does that help you.	11:07
11	THE	CHAIR: Yes, great explanation,	
12		Mr. Kennedy.	
13		Mr. Van't Land, do you understand where	
14		Mr. Kennedy is going? And my sense, unless the Panel	
15		is in disagreement, and I'll hear from them, but is to	
16		have you during direct evidence, if there's some	
17		evidence that you want to put in front of us, that's	
18		the best spot for you to do that, and then we can, you	
19		know, as Mr. Kennedy says, avoid the circling of wagons	
20		because that could go on all day, of course.	11:08
21		Panel members, are you in agreement with that	
22		approach?	
23	MS.	STUART: Yes, I am.	
24	MS.	ROBERTS: Yes, I am.	
25	MR.	VAN'T LAND: My apologies to the Panel, and not	

Questioned by Ms. Stuart

1	following procedure. So I will take lots of notes and	
2	make sure to address the concerns that I have.	
3	THE CHAIR: No apology required. I mean, at	
4	the start I encourage people to ask questions, and	
5	you've done that. You've said and I think we've	
6	provided an avenue for you, but it's a learning	
7	experience for folks that, you know, this is a	
8	hearing process is new to you, so no apology required.	
9	And we'll look forward to those your direct evidence	
10	in just a few minutes, actually.	11:08
11	Okay. Well, thank you. Thanks, Panel members and	
12	Mr. Kennedy.	
13	Field Services, do you Ms. Vance, do you have	
14	any redirect?	
15	MS. VANCE: I do not.	
16	THE CHAIR: Thank you. It is about seven	
17	minutes after 11. Getting sort of close to the lunch	
18	hour, but probably a little too early for lunch. But I	
19	think some folks might be looking for a bio break if	
20	nothing else, and maybe grab a coffee. In particular,	11:09
21	I notice that some of us are sort of locked into these	
22	screens and we can't really get away from them. So why	
23	don't we break until 20 after 11, but we'll	
24	Oh, I'm sorry. Ms. Vance?	
25	MS. VANCE: Sorry, just before we break, I	

1 wanted to -- or broke, I wanted to clarify and confirm 2 that Ms. Weisbach and Mr. Cumming are released from 3 their chair and their testimony? THE CHAIR: 4 Yes. MS. VANCE: Thank you. 5 6 (PANEL STANDS DOWN) 7 THE CHAIR: So if there's no objections, let's take until 11:20, a quick bio break and resume at that 8 time. 9 (ADJOURNMENT) 10 11:10 11 (DISCUSSION OFF THE RECORD) THE CHAIR: 12 So we've got everybody back. 13 Thank you, all. 14 So, Mr. Van't Land, with Double H, you are up, and 15 your turn to present direct evidence, and then we'll 16 have an opportunity to ask you questions just as we did 17 with the approval officer. So are you ready to proceed? 18 MR. VAN'T LAND: 19 I am. THE CHAIR: 20 The floor is yours. Great. 11:25 21 THE WITNESS: I wonder --THE COURT REPORTER: 22 Sorry, excuse me. Would you like 23 the witness sworn in? 24 THE CHAIR: Yes, I would. 25 Thank you.

1	
2	<u>S. VAN'T LAND</u> (For Double H Feeders), affirmed
3	A. I wonder if I could have the people preparing the
4	documents bring up Document Number 18, which is the
5	document that I submitted.
6	My plan is roughly to walk through and offer
7	clarification and a few more details around various
8	aspects of that document, if that's okay.
9	So starting on the first page here, there was some
10	question about the number of birds that are at each
11	location. And one of the challenging things, I don't
12	know how familiar everyone is with the broiler
13	industry, but when I first started growing birds, a
14	typical chicken would weigh somewhere in the
15	neighbourhood of 1.95 kilos. Today, we're typically
16	shipping a chicken that is in the neighbourhood of
17	2.3 kilos, and that depends on what market we're
18	shipping into. Sometimes that chicken, if we're
19	shipping into a KFC market, could be a 1.7 kilogram
20	bird.
21	So the presumption of issuing a permit based on
22	birds is a very fuzzy number. And when we're allocated
23	our quota from through the Alberta Chicken
24	Producers, it's actually done in kilos instead of
25	chickens to try to alleviate that process.

AMICUS REPORTING GROUP - A Veritext Company

11:26

11:27

And also, there -- I don't know how these numbers 1 2 get updated over time, but it's also worth noting that 3 when I first started raising birds, the feed conversion 4 on a chicken was somewhere around 1.8, 1.85, kind of in 5 that range. And, today, we're typically shipping with 6 a feed conversion of 1.5. 7 And the reason I feel that's relevant is because, obviously, if you're feeding a chicken a kilo of feed 8 9 and more of that kilo becomes part of the chicken 10 rather than goes out the tail end and out into the 11 manure pile, that's relevant to how much manure we're 12 generating. So that being the case, I hope that clarifies some 13 14 of the numbers that seem to be thrown around. And I 15 realize that a permit number that was issued 20 years 16 ago is relevant, but from a technical point of view, we 17 also have to understand that the industry, when my dad 18 first built the barns on the west quarter, the typical 19 stocking density of a chicken barn was one chicken per 20 square foot. As time moved on, that commonly became 21 three-quarters of a square foot per chicken, and in 22 some operations it got as dense as half-a-square foot 23 per chicken. 24

25

The industry has moved back from that, and we actually target now, because of the weight variation,

11:28

11:28

83

i		1
1	we target a density of 38 kilograms per square metre.	
2	So the allocation of the stocking of a chicken	
3	barn isn't a static number and isn't perhaps as simple	
4	as it might be in a hog or a feedlot scenario. So that	
5	being the case, I think that answers any of the	
6	questions that might happen on the first page.	
7	If we move to the second page of that document,	
8	just to talk a little bit about the rational for going	
9	through this process, I don't know if it's because of	
10	the details of the legalities of dealing with the	11:29
11	different permits or if it's a misunderstanding. But	
12	we're essentially looking to to move one operation	
13	onto another.	
14	I know there's some questions about the	
15	relationship of the northwest versus the northeast	
16	quarter. And when we applied for that permit, we did	
17	apply for a modest increase, to go from a total of	
18	226,000 birds to 238,000 birds, which represents	
19	roughly a 5 percent increase.	
20	And to be honest, there's a portion of me that	11:29
21	doesn't like odd numbers and that's where 120,000 came	
22	from. And that fits within the proposed square footage	
23	in current technical standards that we place our birds	
24	to.	
25	So, from an operational point of view, we look at	

this as a moving of our operations away from the Town 1 2 of Coalhurst onto a more appropriate location. 3 That ties into the -- on the second half of this 4 page, I referenced the Intermunicipal Development Plan, 5 and I'm just going to go to, would be page -- there's a map in the plan that I think best illustrates this, and 6 7 that would be, in this document, it's on page 5. If I could have that brought up and kind of just centre the 8 9 operation there. And so I've taken this straight from the 10 11 Intermunicipal Development Plan, and I just annotated 12 it with the location of the land we own within that Where "Trevor's Yard" is, which is the operation 13 area. 14 that we're planning on decommissioning, and "Scott's 15 Yard" is the yard where we're proposing to add the --16 to move the production to. 17 And you can see in the bottom left corner there 18 the proximity we are to Coalhurst and how that yard, when you stand on that yard and look around, there's --19 20 fortunately my grandparents and dad had the foresight 11:31 21 to plant a lot of trees, so a lot of people can't see 22 the barns there. And a lot of neighbours are quite 23 frankly surprised that there is an operational --24 operation there. 25 But it's also sited in an area which, according to

11:30

ľ

25

1	the IDP, is is destined to be potential group	
2	country residential, which we can see that there is	
3	already a dense smattering of acreages and whatnot	
4	there, and in the future, I can see where that might	
5	lead to some friction.	
6	And that's why we're making this move to move that	
7	production over to what is deemed in the IDP to be	
8	primarily agricultural land. And you can see the pink	
9	semicircle on that page where it's actually slated	
10	perhaps for industrial development, if not	11:
11	agricultural. So what that communicated to us as well	
12	is that that area is not destined to be residentially	
13	developed, regardless of what the current determination	
14	is.	
15	There's been a lot of concern about runoff, and	
16	with that, I would like to go to page 17 I think shows	
17	it the clearest. And this map is a topographical map	
18	which I obtained from the Lethbridge Northern	
19	Irrigation District was good enough to provide that to	
20	me. And you can see in the bottom left corner is our	11:
21	current operation, that quarter section where our	
22	operation is. And on the bottom right-hand corner is	
23	where Mr. Clifton's operation is.	
24	In one of the previous documents, there is it	

In one of the previous documents, there is -- it demonstrated where the runoff runs, and it shows the

AMICUS REPORTING GROUP - A Veritext Company

11:32

1

11:32

1

Γ

1		runoff is running from our quarter section, there is	
2		no culvert going directly east, but there is a culvert	
3		going north and then east into the southwest of	
4		26-9-22. And it was alluded to I thought that that	
5		might be considered Mr. Bedster's land, and that is not	
6		where Mr. Bedster lives. He lives significantly	
7		further south from there.	
8		But that neighbour has approached us about the	
9		drainage, and we've had some good conversations, and	
10		he's looking to make some improvements there, and we've	11:33
11		offered to work with him on that, and the ball is in	
12		his court on that. So we're looking to work with our	
13		neighbour on that.	
14	THE	CHAIR: Excuse me, Mr. Van't Land,	
15		Document Manager, are we seeing the entire page here?	
16		Is there a way to just maybe bring that down a bit,	
17		yeah, and maybe just a little bit more? Thank you very	
18		much.	
19		Sorry, Mr. Van't Land, I thought it might be	
20		easier to kind of follow your descriptions if we could	11:34
21		see the entire page.	
22	Α.	Yes, I appreciate that.	
23		What can also be seen when you look at the	
24		drainage on that parcel, the purple lines are	
25		indicative of where the lines would run. On a	

h		ส
1	topographical map when you run perpendicular to the	
2	lines, you're walking straight downhill. So the middle	
3	of the bottom left-hand quarter is where my barns are.	
4	And it's on a hill, and drainage runs both east and	
5	west from there.	
6	So the drainage that runs west does run into a low	
7	area where we have put a swale, and that ends near the	
8	what locally is known as the Kipp Highway, the	
9	Township Road 9-4, which is on the north side of our	
10	property. That swale and the tile ends in the position	11:34
11	that is lower than the culvert where the water from	
12	that drainage runs.	
13	So the mindset behind that is simply to try and	
14	take some of our problem land and consolidate the	
15	problem in one area, as opposed to having it spread	
16	over a larger area. So that is the mindset with that	
17	particular drainage.	
18	And then when you move to the east side of the	
19	parcel, you can see again that the water runs generally	
20	speaking towards Highway 25, and from Highway 25 it	11:35
21	runs north.	
22	And if you go to the if you can highlight the	
23	south side of this picture, I know Mr. Bedster has a	
24	significant amount of drainage that runs through his	
25	land. I've seen it; I've seen virtual rivers running	

through there. But that water all comes -- "all" is a 1 2 strong word -- but most of that water comes from south 3 of him. 4 There is some water from the quarter section that 5 is directly north of us that will also run through But if we move to the south side of this 6 there. 7 picture, you can see that there is an elevation rise. Actually, it's probably better shown on picture -- the 8 9 page previous to this is a wider area. There we go. 10 You can see along our southern border there that that's 11:36 11 a rising elevation. And part of that is because that's an old irrigation ditch that was decommissioned. 12 And 13 they tended to run the irrigation ditches along the 14 high points of the land. 15 And as that crosses Highway 25, there is no 16 culvert there, so there is no place for our water to 17 run south in that regard. 18 So I just wanted to make that clear, yeah, that none of the water from here is ending up there. All of 19 20 the water that runs from our southern border runs to 11:36 21 the north. None of that water runs onto our southern 22 neighbours' land. It -- the elevations are just not 23 adequate for that. 24 So that covers, I think, the drainage, and I 25 imagine there will be questions about that.

S. VAN'	'T LAND
---------	---------

Γ

25

1	The IDP, I think I'll just any questions that	
2	people had about how the IDP associated with this,	
3	because I think it's pretty clear in the documentation	
4	in the IDP.	
5	And the nutrient management plan that was	
6	incorporated into our application, we have been working	
7	with a certified crop advisor for over 15 years. And	
8	he's been working with us to make sure that our manure	
9	application is appropriate. And in our particular	
10	case, we don't look at the manure as a waste product;	11:37
11	we look at it as a valuable asset. I mean especially	
12	in a year like this when fertilizer prices are	
13	approaching what they will be, we're looking to utilize	
14	productively every last truckload of manure that we	
15	generate.	
16	To do that, we work with him to make sure that	
17	that manure gets utilized properly. We do work in a	
18	direct-seeding method of crop production. We do spread	
19	the manure on the land, and given the provisions in	
20	AOPA, we do not turn it over. We wait for it to be	11:38
21	incorporated.	
22	The direct-seeding pool that we use is does	
23	disturb the land a fair amount, so I would probably	
24	estimate that the ground is 75 percent disturbed by the	
11		1

AMICUS REPORTING GROUP - A Veritext Company

time that grows over. But it's a single-pass

89

1 operation.

25

2 And part of that is because we're really looking 3 to maintain soil structure. We're looking to 4 maintain -- there's a lot of science that's still in 5 process as far as what bacteriological and fungal 6 networks are occurring in the land, not to mention the 7 soil structure itself that every time you turn that land over, you disturb it. And it has implications for 8 9 resiliency for water and carbon storage and just for the resilience of the land as far as the health of the 10 11 crop is concerned.

11:38

11:39

12 So that, we sample every field every year. 13 It's -- we feel it's a valid cost to get that done, and 14 that way, we always know where every parcel is as far 15 as the nutrient factor is available to us. We don't 16 like guessing, so we -- we do that.

17And yeah, I'm trying to think what else to18highlight here.

19One of the provisions in the IDP referred to --20there's a fair bit of discussion about Point 4.1.5 in21the last session. And one of the provisions in there22was reducing negative impacts to rural and urban23residents. And that is a significant portion of why24we're approaching this project the way we are.

We've been weighing the tradeoff of improving the

h		-1
1	barns that are on the northwest location to a modern	
2	standard. They're currently double-standard	
3	double-decker barns that are for modern broiler	
4	production is inefficient and inconvenient and	
5	not not the current standard of operation, which we	
6	would be building on the northeast quarter.	
7	But to put investment into building barns there	
8	where in the foreseeable future, I mean within 20 to 30	
9	years I can anticipate that area being much more closed	
10	in with residential development.	1
11	And on the east quarter we're much more open.	
12	There for some reason, there seems to be some kind	
13	of a dividing line between the east and the west	
14	quarter even when you look to the subdivision map,	
15	there are dozens of subdivisions out of the different	
16	quarter sections that are on the west side of that	
17	line. When you come to east side, most of the quarters	
18	are whole.	
19	And keeping that production close to Highway 25,	
20	close to areas that are slated for industrial	1
21	development, close to areas that are less prone to	
22	residential development is is what our goal is.	
23	So one of the questions I had regarding the	
24	permit, which I was remiss in not asking earlier, is	
25	there is a provision in the previous permit that was	

:40

:40

1

F

1	issued regarding the incorporation of manure. And my	
2	question would be, I think when that permit was issued,	
3	I think we only had the 200 acres that we colloquially	
4	call the home place. We have about three or four times	
5	that amount of land now, and if that were to be	
6	incorporated we're not interested in incorporating	
7	all our manure for the I mean for the amount of	
8	diesel fuel, iron, and just waste that that	
9	incorporates.	
10	So I'm wondering what the specific details around 11:41	1
11	that particular provision would be, and if there's a	
12	way to amend the permit to remove that, as long as	
13	we're we're committed to following AOPA guidelines	
14	from start to finish, and if those guidelines change,	
15	obviously the requirements will be changing as well	
16	anyway just as a legislative reality of that. But I'm	
17	curious what the appetite and procedure would be for	
18	removing that clause from the permit. So, and with	
19	that, I think I've covered my notes anyways. So with	
20	that, I'm open to questions.	2
21	THE CHAIR: Thank you, Mr. Van't Land.	
22	Lethbridge County. Ms. Janzen, any questions?	
23	MS. JANZEN: No, I have no questions.	
24	THE CHAIR: And, Ms. Horvath, Town of	
25	Coalhurst.	

93

Cross-examined by Ms. Schmid

			1
1	MS.	HORVATH: I have no questions.	
2	THE	CHAIR: Ms. Schmid?	
3	MS.	SCHMID: I actually do have a couple of	
4		questions. I'm not sure how pertinent they are.	
5	<u>MS.</u>	SCHMID CROSS-EXAMINES THE WITNESS:	
6	Q.	My question kind of goes back to compliance issue, just	
7		when Matt [verbatim] is speaking about how they figure	
8		out numbers. Like, it says they have 58,000 birds	
9		currently, but they operate by kgs. So if you have a	
10		permit in place for 50,000 birds, and you have to	11:43
11		assume a kg amount, why couldn't you back off the total	
12		kg amount to get closer to what you were permitted as	
13		opposed to going over?	
14	Α.	I guess my question would be there's a perceived intent	
15		to a limitation on how much livestock can be produced	
16		on any particular location. And in order to to	
17		achieve the market conditions that we're looking to	
18		ship into, it it can make as much as a 25 to	
19		30 percent difference in the stocking density that's	
20		available to us with no discernible difference.	11:44
21		When we're operating our chickens, we operate on	
22		an eight-week cycle. Typically the birds with their	
23		current genetic development, when we're operating with	
24		a 2 2 and a quarter kilo bird, we're stocked for	
25		38 days and then we have the balance of the time to	

Cross-examined by Ms. Schmid

			1
1		clean up the barns and prepare for the new flock.	
2		If we're only shipping a 1.7 kilo bird, we only	
3		have birds in there for 30, 31 days which is roughly	
4		half the time. And I would suggest that if we're going	
5		to look strictly at stocking density, then we should	
6		also be looking somehow to accommodate for the time	
7		that the birds are in the barn.	
8		When the permits were initially issued, we would	
9		routinely have birds in for 42 to 43 days, but the	
10		development of the genetic potential of them birds has	11:44
11		improved that much over the last 25 years that we're	
12		able to get much more bird out of the same physical	
13		facilities.	
14		And I don't think it is necessarily the intent of	
15		the permit to to arbitrarily limit the production in	
16		these barns.	
17	MS.	FRIEND: This is Laura. I think you're on	
18		mute, Mellissa.	
19	MS.	SCHMID: Yes, I'm just trying to figure out	
20		how I want to ask a follow-up question for this.	11:45
21	THE	CHAIR: I sort of figured that you were	
22		just doing a little caucus there, so.	
23	MS.	SCHMID: Yes.	
24	Q.	I guess what I'm trying to sort out in my mind here,	
25		and maybe somebody else can clarify this better than I	

Cross-examined by Ms. Schmid

1		can, is you had the permit for the 50,000 birds. We	
2		spoke about like reducing the total kg to be more	
3		compliant with that permit, but then you're kind of	
4		saying that you'll set your own parameters even if it	
5		does mean exceeding what you were approved for.	
6		So I don't really know how to frame my question,	
7		but in my mind, it just comes across as, okay, so we're	
8		permitted for so many birds, but this is what I'm going	
9		to do anyway.	
10	Α.	The requirements that are indicated under manure	11:4
11		spreading and what have you make sort of assumptions as	
12		to the size of the bird and the amount of manure	
13		they're going to produce. And in my working with the	
14		NRCB through this and previous projects, it almost	
15		seems like there's more of a concern over the manure	
16		than the actual birds.	
17		Any welfare or production concerns are dealt with	
18		by other arms of government, but here we're looking to	
19		make sure that everything is done in an environmentally	
20		sustainable manner, and that's always the attitude that	11:4
21		we've looked at it under is to make sure that we're	
22		following the spirit of the permit.	
23		To be honest, we produce less manure now than we	
24		did 20 years ago.	
25	THE	CHAIR: I think, Ms. Schmid, your	

47

Cross-examined by Ms. Schmid

1		questions are valid, and my sense is that, even on a	
2		go-forward basis on the existing operations, if there's	
3		an issue around density, population, exceeding permit	
4		numbers, that ought to be issued as a complaint to the	
5		NRCB and they can follow up, and if Mr. Van't Land's	
6		interpretation of what's allowed is different from the	
7		NRCB's, I mean the NRCB will prevail.	
8		It isn't we don't have somebody right here, and	
9		that question might have been suitable for the approval	
10		officer too in terms of how they handle numbers and	11
11		that, but that time has passed, and this wasn't brought	
12		up as a key we don't have a compliance anybody	
13		from compliance here as an example because this was not	
14		brought up as a key issue for the hearing.	
15		So I get your question. I think it's been	
16		answered, but in the future, if you know, if you	
17		feel that there's an issue that needs to be addressed,	
18		you know, I think you should feel free to call the NRCB	
19		and make sure that issue is addressed appropriately.	
20	MS.	SCHMID: Okay. That's definitely fair.	11
21	Q.	I just do have two more questions for Matt or,	
22		sorry, Scott if you could just maybe outline to me,	
23		like, the long-term impacts ecologically, like, the	
24		positive and the negative aspects if you get approved	
25		for expansion and what that looks like.	
1			1

AMICUS REPORTING GROUP - A Veritext Company

11:48

11:49

Cross-examined by Ms. Schmid

	1	Α.	Right now when we operate in the older barns, they're	
	2		double decker barns, they're older wood construction,	
	3		the energy efficiency in those barns is verging on	
	4		laughable. The age of the barns is such that the	
	5		insulation is mostly out of the walls and to bring them	
	6		up to current standards is difficult.	
	7		The operations that are involved in cleaning out	
	8		the manure in those barns just for a point of	
	9		comparison, we built a set of new barns in a different	
	10		location about five years ago, and the amount of time	1
	11		and equipment, operational hours that it takes us to	
	12		clean out what takes us an easy day in the new	
	13		facility takes us about three days in the old facility	
	14		probably and that's strictly manure clean-out, and	
	15		then there's sweeping, blowout, disinfection.	
	16		I would say that it probably doubles the amount of	
	17		equipment time, doubles the amount of work time, and at	
	18		the same time, the barns, because of the modern	
	19		construction, are much more energy efficient. We burn	
	20		a lot less fuel, the birds are a lot more comfortable,	1
	21		we're able to keep the environmental conditions inside	
	22		the barns a lot more suitable in extreme weather. So	
	23		those are a number of the improvements that we're	
	24		targeting.	
	25		As far as the implications regarding the amount of	
1				

11:50

11:50

Cross-examined by Ms. Schmid

1	manure produced, we're talking about a 5 percent	
2	difference, which is when it comes to something like	
3	spreading manure is somewhere in the neighbourhood a	
4	rounding error.	
5	We continue to we spread the manure based on	
6	the soil samples that we get and how much manure is	
7	appropriate for for those quarter sections. So in	
8	our particular operation, that tends to mean that we	
9	operate on a four-parcel rotation.	
10	Canola has been an integral part of our rotation	11:51
11	for many years, and the most suitable place for the	
12	manure in our rotation is the head of the canola. It	
13	seems to use it the best, and it's a heavy nutrient	
14	user, reacts the best to having the manure on, and	
15	that's how we've been managing that.	
16	So I think in the grand scheme of things, it would	
17	be a net positive from an environmental point of view	
18	because we're using it's a much more energy	
19	efficient construction, it's a much more labour	
20	efficient construction. The utilization of the manure	11:52
21	is going to be status quo. It's essentially the same	
22	as it is now.	
23	Five percent increase or decrease, that has to do	
24	with if we adjust our bedding depth by a fraction of an	
25	inch eats up that percentage. So the net implications	

Cross-examined by Ms. Schmid

			1
1		of the operation are positive of this project.	
2	Q.	One final question is my concern around air quality,	
3		what you guys are doing regarding that, and I guess	
4		your rebuttal for, like, the long-term health concerns	
5		or health exacerbation on community and neighbours with	
6		your expansion and existing barns.	
7	Α.	Right now both operations are upwind of you. And in	
8		the new operation, there is better handling, there's	
9		better ventilation. Because of the efficiency of the	
10		heating and what not, we we have better air	11:53
11		movement, we have better air control. As far as the	
12		actual direct impact of the barns, I honestly don't	
13		recall ever getting a single complaint about the direct	
14		location of the barns.	
15		As Mr. Clifton is certainly aware, these barns	
16		were converted from hog barns somewhere in the	
17		neighbourhood of 20 22 years ago I think. You'll	
18		have to forgive me if I don't have the exact date	
19		right. They stank. There's no argument about it.	
20		There was frequent concerns from the neighbours	11:53
21		downwind and we we appreciated that and that had	
22		something to do with our move at that time to shift	
23		from pork to poultry operation in that facility. Since	
24		then, I don't recall ever getting a note or complaint.	
25		In one of the documents I was submitted there was	

Cross-examined by Ms. Schmid

1	a concern about poultry manure being extremely	
2	odorific.	
3	I have been in laying egg barns where the manure	
4	is handled in a wet manner where there is no litter,	
5	where the litter is just kept wet and I have never	
6	smelt a stench quite like it, and that is definitely	
7	true. But when you shift to broiler manure, it's	
8	the barns are dry.	
9	For bird health, we have to move enough air to	
10	keep the litter dry so that the birds don't develop any	11:54
11	kind of adverse effects on their feet or lung quality,	
12	any of those issues. The birds are in a dry	
13	environment.	
14	When that manure is handled, it's dry and that's	
15	why it doesn't have the same odour that's associated	
16	particularly with wet chicken manure.	
17	Hog manure can be bad. Even feedlot manure can be	
18	particularly smelly because of the nature of when	
19	you disturb it, then there's a lot of moisture in the	
20	cattle manure.	11:55
21	But poultry manure, when it's pushed out of the	
22	barn, it's a layer it starts off as a layer that's	
23	about 2 to 3 inches thick. It's dry and it doesn't	
24	have the same odour associated as other types of	
25	manure.	
		4

Cross-examined by Ms. Schmid

1	Q.	Thank you. Could you just clarify, though, like as far	
2		as air quality and modifications on this expansion,	
3		like what's in place to reduce, like, fluctuations in	
4		odour, like if your fans are running because you're	
5		going to have two exponentially larger barns running	
6		plus the three. And I'm just curious how you guys are	
7		modifying and upgrading things to make this downwind	
8		smell better and how that will impact health	
9		exacerbations for people with respiratory conditions?	
10	Α.	We are not planning to make any significant changes to	
11		the existing barns, and the new barns have, yeah, the	
12		ventilation. As far as the outside world is concerned	
13		is you draw in fresh air, and you move out stale air.	
14		We we manage the humidity in the barns. One of	
15		the most recent developments in poultry ventilation is	
16		we used to operate more on a minimum ventilation system	
17		where we tended to just move enough air to keep it dry.	
18		And when it comes to heating barns, that's a very	
19		inefficient way to run a barn.	
20		So now what we do is we typically target a 40 or	
21		50 percent relative humidity in the bird living space.	
22		When you run a barn at that humidity, it produces far	
23		less dust. There isn't a lot of dust inside the barn	
24		at that level of humidity.	
25		And the nuisance complaints, I would put the	

11:56

11:56

Ī

Ī

Cross-examined by Mr. Bedster

1

1		question to the NRCB as to how many nuisance complaints	
2		they get from broiler chicken operations. On the grand	
3		scheme of intensive livestock, I consider it to be a	
4		relatively low impact development in any neighbourhood.	
5		One of the things that I can point to is just the	
6		current location of the west barns, we've had	
7		neighbours that have lived within several hundred feet	
8		of those barns that are surprised they're occupied.	
9		So I don't know what to tell you as far as the	
10		nuisance factor is concerned. It hasn't been a big	11:57
11		problem.	
12	Q.	Okay. So just so I'm clear, like there is no air	
13		quality compliances you guys need to do moving forward?	
14	Α.	We can't react to a complaint we don't get. I in	
15		our own yeah. There have been a lot of complaints	
16		about the air quality downwind of the barns.	
17	Q.	Thank you. Those are my questions.	
18	THE	CHAIR: Thank you, Ms. Schmid. Mr. and	
19		Mrs. Bedster, do you have questions?	
20	MR.	BEDSTER: Yes, I do.	11:58
21	<u>MR.</u>	BEDSTER CROSS-EXAMINES THE WITNESS:	
22	Q.	You suggested that there is the page where you had the	
23		maps here of your land location. And on the NE 22-9-22	
24		West of 4, you show a swale coming from the north to	
25		the south. Page 16, yeah, sorry about that. And when	

Ī

Cross-examined by Mr. Bedster

1

н				
	1		was that tile, that weeping tile, put in there?	
	2	Α.	I think we put that tile in two or three years ago. We	
	3		had some some line left over from a previous	
	4		project, and rather than let it go to waste, then we	
	5		thought we would see if we could improve.	
	6		There's a little bit of a collection area in the	
	7		south southwest corner of that field, and we thought	
	8		we would try and consolidate some of our our	
	9		wasteland.	
	10	Q.	So water that comes down that swale is water that comes	11:59
	11		off the roof of the barns, plus the water or I'm	
	12		assuming when you clean the barns, that would wash them	
	13		down, that that water comes out of the back of the barn	
	14		and goes down into that swale also; is that correct or	
	15		not?	
	16	Α.	The water off the roof of the barns will definitely run	
	17		where it runs. The roof of the barns are clean, so I'm	
	18		not sure what the concern would be there.	
	19		When we wash the barns, we're not washing the	
	20		material in the barn that's out. The cleaning process	11:59
	21		for the barns is first we go in heavy equipment, we	
	22		push out the manure. Then we go in with backpack	
	23		blowers and air compressors, and we blow all the dust	
	24		off the equipment. Then we go through the barn and	
	25		sweep up all the dust that we've accumulated.	
11				1

Cross-examined by Mr. Bedster

			1
1		And then the final step before preparing for the	
2		new flock is to wash. And that's a pressure washer	
3		situation where typically what happens is you wash down	
4		the equipment and the walls and the floor, and the	
5		water evaporates out. You might get, I don't know,	
6		five or ten wheelbarrows of water.	
7		In our new facility in a barn that is a similar	
8		size to all of my barns combined, I don't know, we	
9		might get 100 litres of water out the back door. It	
10		doesn't even run off the yard when we push it out.	12:00
11	Q.	So the second swale you've got there that runs east and	
12		west, where does that water go?	
13	Α.	That water runs eventually towards Highway 25 and then	
14		north and ends up going through SW 26-9-22.	
15	Q.	And so none of that water out of that swale can come	
16		south, is that what you're indicating?	
17	Α.	Yeah, if you go next time you're going by, go look	
18		under Matt's driveway; there's no culvert there.	
19	Q.	But okay. There's no culvert there. But what's the	
20		pump doing there in Matt's location there? And that's	12:01
21		where my concern comes from because the photos I sent	
22		in in July or June, and I phoned Mr. Grisnick, and I	
23		said, "How come so much water coming down here off the	
24		north end?" And he said, "I don't know. I'm feeding	
25		right now, I'll be over shortly." That's fine.	

Cross-examined by Mr. Bedster

 		1
1	So he walks across the field and comes over. And	
2	he indicated to me that "That water is not from my	
3	field." "Well, where did it come from? And if it's	
4	not from your field" my question was to him, "Why	
5	aren't you sprinkling that on your land?" And which I	
6	got no response.	
7	And that day, he said, "Well, you know, this will	
8	quit around early afternoon." And it had been running	
9	the day before, I'm fairly sure, but not a	
10	hundred percent sure. And so the water was as grey as	12:02
11	chicken manure, and not just a little bit of water,	
12	because he says, "My pump can't do that."	
13	And I said, "Well, Matt, when you've got a 4-inch	
14	line or whatever you're using up there that's coming	
15	down your roadway coming out of Mr. Van't Land's place	
16	and going into the culverts or into the water pit of	
17	Highway 25 on the west side and comes down, then it	
18	goes into the north culvert close to my property, and	
19	none of this water is coming from the south." He says,	
20	"It will be shut off by early afternoon." And he said,	12:03
21	"Yeah, that's pretty bad." And I said, "You're right."	
22	And you know, that water was still running at midnight.	
23	So where can it come from? I hate to say it, sir,	
24	but it come off your property. It come down that	
25	swale, and how it accumulated over there, I have no	

S. VAN'T LAND Cross-examined by Mr. Bedster

h			키
1		idea.	
2		But all I'm saying to you is I don't need that	
3		water coming through my property to use on my garden	
4		when I've had three kids get cancer and somebody says,	
5		"Well, I just don't know." Please don't say you just	
6		don't know; you know.	
7	Α.	I if there's issues between you and Matt, I can	
8		appreciate	
9	Q.	No, there's no issue between Matt and I.	
10	Α.	All I can say is when I was in school, I remember my	12:04
11		first year of engineering school, the professor told us	
12		there's two things you need to know: One, you can't	
13		push on a rope, and two, water runs downhill.	
14		And Matt's driveway is higher than all my fields,	
15		that water doesn't run into his place. It can't. The	
16		drainage doesn't facilitate that.	
17	Q.	0kay.	
18	Α.	That swale is where it is because the water runs	
19		downhill from Matt's driveway towards that swale, and	
20		the beginning of that swale is to kind of get over one	12:04
21		hill to another. But the natural drain of that area is	
22		towards Highway 25, and from there, the water runs	
23		north.	
24	Q.	With a pump?	
25	Α.	There's no way well, then Matt's pump is higher than	
			1

S. VAN'T LAND Cross-examined by Mr. Bedster

7

	1		my field.	
	2	Q.	I don't care. The suction is in the ground or in a	
	3		vault or a hollow in the ground and was pumped out. I	
	4		walked up there, and I seen it coming out down to my	
	5		property.	
	6	Α.	Our water does not run south, so that's all I can tell	
	7		you.	
	8	Q.	Well, maybe we should okay. If you want to say	
	9		that, you must remember well, that's all I gotta say	
	10		right now, sir.	12:05
	11		But oh, one other fact. On that pipeline, how	
	12		did you ever get that in the ground? How did you get	
	13		that how did the Environment allow that because of	
	14		where it is and the manure you're putting on your land	
	15		and the medication that comes out of the birds' back	
	16		end, where does all that go?	
	17	Α.	There's no manure coming out there's no medication	
	18		coming out the back end of the birds. That's something	
	19		that's carefully monitored.	
	20	Q.	Are you telling me your broilers aren't medicated?	12:05
	21	Α.	Not for anything that's for human concern, that's for	
	22		sure.	
	23	Q.	Well, Eramycin or Terramycin for the first two to three	
	24		weeks, maybe four. If they get any other disease, they	
	25		get medicated.	
l				1

107

Г

Cross-examined by Mr. Bedster

1	Α.	That's something my dad did 20 years ago, but we don't	
2		do any prophylactic antibiotics at all in the barns.	
3		The last time I had an antibiotic in the barn, I	
4		think I got an expired pail on the shelf that expired	
5		five years ago. We just don't use it.	
6	Q.	All I know is NEP companies that produce feed,	
7		pre-starters, starters, and probably 21 percent has	
8		some medication in it automatically in there, unless	
9		that has changed?	
10	Α.	It has changed. The industry is being very proactive	12:06
11		as far as improving both for being responsible and for	
12		perception from our customers.	
13		There's an obvious concern with antibiotics in	
14		animal production, and that has been started being	
15		addressed the first I remember hearing of it was 15	
16		or 20 years ago, and there's been a constant march in	
17		the environment, in the livestock production,	
18		particularly in broiler chicken production; I can't	
19		speak as much for cattle or for pork.	
20		But to remove the prophylactic use of antibiotics	12:07
21		in our production, it just is not acceptable anymore.	
22		And we've been improving our methods, and that has a	
23		lot to do with why we've been focusing so much on	
24		improving the barn environment is a healthy bird is a	
25		happy bird and grows better and produces better. And	

Cross-examined by Mr. Bedster

			1
1		if we can do those things without using prophylactic	
2		antibiotics, then we're all for it.	
3	Q.	Right. I've been retired 12 years now. It must have	
4		changed in the last 12 years no medication in broiler	
5		feeds; is that correct?	
6	Α.	I think it went under the microscope probably five or	
7		six years ago, and I think two years ago, because when	
8		they're classing antibiotics as far as they're relevant	
9		for human relevance, they have a four-stage four	
10		categorizations: There's Class 1, 2, 3, and 4, Class 1	12:08
11		being primarily is for human antibiotic human use.	
12		Class 4 being not used in human at all.	
13		And Class 1 stopped being used probably seven or	
14		eight years ago, and they're in the process, I think	
15		they've phased out Phase 2 now.	
16		So we're moving in the direction of being	
17		definitely antibiotic reduced throughout the whole	
18		process and we don't use we don't use them in the	
19		barn. We don't have a lot of antibiotics there.	
20		And when it comes to your concerns about drainage	12:08
21		and manure spreading, I mean those questions, we,	
22		again, if we have manure running off our land, that's a	
23		waste of manure, and we want that manure to be properly	
24		used by the crops.	
25		So we're very careful to try and use it in a way	

Ī

Cross-examined by Mr. Bedster

1		that it the crop o	an take full advantage of it.	
2		So that is the b	oest I can tell you about those two	
3		particular concerns.		
4	Q.	Can you see these pic	tures down here?	
5	MS.	SCHMID:	You'll have to hold them.	
6	MR.	BEDSTER :	Do I have to hold them up? Can	
7		you see this picture?		
8	THE	CHAIR:	Mr. Bedster, are these on the	
9		record now, or can we)	
10	MR.	BEDSTER :	Yes, they're on record now.	12:09
11	THE	CHAIR:	And where are they?	
12	MR.	BEDSTER :	You people have them, sir.	
13	THE	CHAIR:	In our submission. Which	
14		submission is that?	Maybe the document managers could	
15		bring them up, that m	night be a lot easier.	
16	MS.	SCHMID:	Exhibit 6.	
17	Q.	MR. BEDSTER:	This particular picture here comes	
18		from the north. It c	can't come from the south. And the	
19		reason I say that is	on the north end there, on the	
20		west side, the ground	l is raised up 3 to 4 feet higher	12:10
21		at the back, higher t	han the pipe going underneath the	
22		road.		
23	THE	CHAIR:	So, Mr. Bedster, you'll need to	
24		refer we don't hav	ve there's no directions on this	
25		map. Are you talking	right or left?	

S. VAN'T LAND Cross-examined by Mr. Bedster

1

1	MR.	BEDSTER: Oh, I'm sorry. Okay.	
2	Q.	Where the cement is, that's south. Going to the end	
3		where the water where it starts, that way is north. To	
4		the left of the picture is to the west, and that's	
5		where the water comes from. And it comes down on the	
6		west side of Highway 25 from Matt Grisnick's driveway,	
7		which, in my belief, comes out of Mr. Van't Land's	
8		land.	
9		And if you look, you can see on the second picture	
10		there, or even on the first picture I guess, yeah, that	12:11
11		one right there. You can see, we had a rain before, a	
12		little bit of a rain. And you see the material on the	
13		left of the picture there, shows how high that water	
14		was coming down there. And again, that's only from the	
15		north.	
16		The next picture I have here is this one. Yeah.	
17		Isn't that nice water? Why would the water be brown?	
18		You know, it's not I know what soil water looks	
19		like, and I know what cow manure water looks like. But	
20		this, I must have missed this before because I believe,	12:11
21		in all truthfulness, sir, that's happened a few times.	
22		So I put it in your ballpark.	
23	Α.	I can only say that from our piece of land, I mean you	
24		can look at the topographical map on the east	
25		side or rather, the west side of the piece, we get	

111

Ī

Cross-examined by Mr. Bedster

1		some water from Matt	. When you move closer to	
2		Highway 25, the wate	r doesn't run over where the old	
3		irrigation canal use	d to be.	
4		That's a peak i	n elevation, and any of that water	
5		that's coming from a	cross the road from you from Matt,	
6		I'm not familiar wit	h exactly where the water flows on	
7		his land, where it c	omes from, how much he gets from	
8		upstream, and how mu	ich is his water, but that's	
9		something you'll hav	e to take up with him. But he	
10		doesn't our water	doesn't go to a place where he	12:12
11		pumps out of.		
12		I know where th	e pump you're referring to, I know	
13		where it's sitting,	and it's every direction from	
14		there is that downhi	ll to our land.	
15	Q.	Okay. Then please e	enlighten me how that pump can run	
16		for 24 to 30 to 40 h	ours with a 40 or 50 horsepower	
17		tractor and 4 HP old	pump? It magically must be coming	
18		out of an artesian w	ell that's there.	
19	Α.	I suppose that must	be the case.	
20	Q.	Well, I don't think	so, sir.	12:13
21	MR.	BEDSTER :	That's all I got to say right now,	
22		thank you.		
23	THE	CHAIR:	Thank you, Mr. Bedster.	
24	MR.	BEDSTER :	You're welcome.	
25	THE	CHAIR:	Mr. Clifton?	

Cross-examined by Mr. Clifton

			1
1	MR.	CLIFTON: Yes, I have a couple of questions.	
2	<u>MR.</u>	CLIFTON CROSS-EXAMINES THE WITNESS:	
3	Q.	I'm kind of referring back to that I believe it's the	
4		4.5.1 thing where it talked about the modernizing,	
5		improving, and reducing impacts to neighbouring	
6		landowners, or I can't remember how it said it there.	
7		But Mr. Van't Land just stated that he's not	
8		interested in incorporating any manure into the land.	
9		And what that says in that 4.5.1 is that the expansion,	
10		whatever, should reduce the impacts.	12:14
11		He already has a condition on the existing permit	
12		to do it, which is he not being, which is a compliance	
13		issue, but stating that he's not interested in	
14		incorporating any manure in future kind of goes against	
15		reducing the impacts part?	
16	Α.	The challenge of managing impact is a fascinating one.	
17		It has been fascinating as we've been working with our	
18		certified crop advisor since we started direct seeding	
19		our crops.	
20		There's a 50-pound nitrogen credit that, as far as	12:14
21		he can tell, it magically appears, and as best as we	
22		can tell, that has something to do with the improvement	
23		in the soil and improving the bacterial fungal and worm	
24		populations in the soil, that we're working with the	
25		soil instead of working against it.	

Ī

114

Cross-examined by Mr. Clifton

1			1
1		The benefits of incorporating the manure into the	
2		soil, not to mention the degradation of the quality of	
3		the soil, the extra diesel fuel and equipment required	
4		is in our estimation, the tradeoff is definitely	
5		towards not incorporating the manure. We spread it in	
6		a fashion that is evenly spread, we leave our stubble	
7		fairly high on the crop where we're going to	
8		be where we're going to be utilizing the manure so	
9		that the wind does minimal chance of taking it.	
10		I mean, obviously, some of the winds we've been	12:15
11		having lately, I mean, it's been fascinating to me to	
12		watch even zero till land blow in some cases, but we	
13		take every step that we can in order to make the best	
14		use of that manure. And for that manure to run off the	
15		land, I mean, that to me, that's money running off.	
16		So we do everything we can to make sure that that's	
17		available for our crops.	
18	Q.	So wouldn't by incorporating that manure into the land	
19		prevent it from running off?	
20	Α.	I would contend that it doesn't run off right now, and	12:16
21		I would also contend that the damage to the soil by	
22		turning it over does more damage than the perceived	
23		benefit of turning the manure in, especially a product	
24		like broiler manure where the nuisance factor is	
25		minimal at best.	

Ī

Cross-examined by Mr. Clifton

1	Q.	On that topography map that you had there, it's page 16	
2		with the tile and swales, if that could be brought up	
3		again.	
4	THE	CHAIR: So, document manager, that was	
5		in	
6	MR.	CLIFTON: That was in Mr. Van't Land's	
7		submission.	
8	Α.	It's Document Number 18.	
9	THE	CHAIR: 18, thank you.	
10	Q.	MR. CLIFTON: You're saying the gravel	12:17
11		dispersion pit is lower than the culvert and you're	
12		concentrating all your water to that area to make your	
13		land better, but that gravel dispersion pit is right on	
14		the property line of the county ditch and your	
15		property. Why couldn't you make this go to somewhere	
16		contained on your property as opposed to making it	
17		drain right to the county ditch where it can all run	
18		off?	
19	Α.	To be honest, that is somewhere contained on our	
20		property. If I were interested in getting that water	12:18
21		off the field in the most efficient way possible, I	
22		would have continued that tile line permissible	
23		distance from the county ditch and continued running	
24		further east of it until we got to where the elevation	
25		worked with us. But we stopped it where we did because	

Ī

116

Cross-examined by Mr. Clifton

1		we are not interested in doing that.	
2	Q.	You have the tile run right to the county ditch. The	
3		dispersion pit, if it is lower, it's only inches lower	
4		than the culvert. Like any accumulation of water will	
5		run. So I'm just curious why you didn't concentrate it	
6		more centralized on your property as opposed to	
7		exposing it to the county ditch and neighbours?	
8	Α.	The county ditch at that location is higher than our	
9		dispersion pit. We're working with the topography of	
10		the land. I can't the amount of dirt I would have	12:18
11		to move in order to make a central location on that	
12		quarter section to store matter would be massive.	
13		We're working with the existing topography, and,	
14		like I say, if we'd been interested in removing that	
15		water as efficiently as possible, we'd have continued	
16		that tile further east. Get through that hill, and	
17		then have it run into the ditch and down along whatever	
18		path it follows into marketplace and then onto the	
19		river.	
20	Q.	So were there any consultations with Alberta	12:19
21		Environment before all this was done?	
22	Α.	No. Since then, we've been contacted by both the NRCB	
23		compliance officer in the neighbourhood, Denny Puskar	
24		and Logan Huscroft also was interested.	
25		So I have taken both of them around. They've both	

117

Cross-examined by Mr. Clifton

		1
1	seen with their own eyes firsthand the work that we've	
2	done. I asked them if there were any concerns, if	
3	there was anything that needed to be done or anything	
4	to move forward on to get ahold of me, and that has not	
5	been something they followed up on.	
6	Denny Puskar from the NRCB seemed content with	
7	what he saw. Alberta Environment I think will probably	
8	have a larger stake in any changes that are made as far	
9	as drainage are concerned. I showed him around. He	
10	took a lot of pictures. He advised me at the time that	12:20
11	he was going to consult with a number of historical	
12	aerial photos to see what changes have been made to the	
13	land since since the beginning of those things being	
14	recorded, and I have not heard from him since and that	
15	occurred on November 10th was when I took him around,	
16	and he's had four months to to address the file, and	
17	I've taken the silence to mean that there are no	
18	concerns.	
19 Q.	Okay. I have a letter from him that's in my	
20	submission, but we can get to that later.	12:20
21	Are you also saying that any or all of your runoff	
22	does not affect me at all?	
23 A.	I am saying that when I look at the drainage maps and	
24	I've gone down and looked where the water runs, the one	
25	thing which I didn't wasn't even aware of until I	

20

Cross-examined by Mr. Clifton

11			11
1		looked closer was that there is no culvert directly	
2		between you and me. So all the water that accumulates	
3		in that road ditch down at that intersection does run	
4		north into Paragon's Corner there. From there, it runs	
5		across east into Mark Davis's quarter.	
6		Just looking at the topography, it's downhill from	
7		there, so it would have to run uphill to get to your	
8		place. So I'm not saying that it's impossible. I'm	
9		saying that when there's a massive rain, then some of	
10		the pictures you submitted were interesting, they	12:21
11		brought back some difficult memories as far as the	
12		amounts of water we got in that case.	
13		It was also interesting to me I'm not sure how	
14		old those pictures are, but they're over ten years old	
15		we're thinking, because of the equipment we see in the	
16		pictures. It is not something certainly that happens	
17		on any kind of a continual basis or and in the case	
18		where we get massive amounts of water, then I would	
19		also argue that there is water everywhere.	
20		And as far as if it's going to run back from	12:22
21		Mark's into your place, given enough water, I don't	
22		know, but I that's why I wanted to get the	
23		topography maps from the LNID to see where the water	
24		runs, and the story is pretty clear.	
25	Q.	Well, the culvert does come from down from you	

AMICUS REPORTING GROUP - A Veritext Company

Ī

Cross-examined by Mr. Clifton

1		across to the north and then across Highway 25 to the	
2		east into the ditch on the southwest 26, but from	
3		there, there's a culvert to the south and to my	
4		northwest 23 where the water backs up in the county	
5		ditch and then comes into me.	
6	Α.	If you say. My eye, when I look at it, the road ditch	
7		is lot lower than your field there.	
8		So I can imagine the volume of water it would take	
9		to run back onto your land.	
10	Q.	When the ditch fills up, it backs up. I've got the	12:23
11		pictures in my submission.	
12	Α.	I would ask you how much of that water is your water.	
13	Q.	Very little.	
14	MR.	CLIFTON: I guess that's it for now.	
15	THE	CHAIR: Thanks, Mr. Clifton.	
16		It's just about 12:30. So and I know that	
17		Mr. Kennedy and Panel members do have a few questions	
18		for you, Mr. Van't Land, that would take probably, you	
19		know, more than just a couple of minutes.	
20		So I would suggest that maybe we break for lunch	12:23
21		now. You would remain sworn, Mr. Van't Land, you know,	
22		and you shouldn't be contacting any outside parties	
23		while you're essentially still being sworn in. Your	
24		testimony will continue and questions will continue	
25		after lunch.	

Ī

Cross-examined by Mr. Clifton

1		Now, I'm not sure what the arrangements are, so	
2		we're all over the place in Alberta and then including,	
3		you know, the affected parties in the Lethbridge	
4		office, so we all need to have at least enough time to	
5		grab a bite.	
6		But I think maybe just a quick question for	
7		Ms. Janzen and Ms. Horvath, we'll likely have questions	
8		for you, but how much time did you need in terms of	
9		presenting any evidence that you have?	
10	MS.	JANZEN: Sorry, Mr. Chair, you're asking	12:24
11		how much time we'll need to present our information?	
12	THE	CHAIR: Yes.	
13	MS.	JANZEN: I wouldn't need much at all. I	
14		just would have a really brief summary of my what	
15		I've already submitted to the board. So I wouldn't	
16		need much time at all, Mr. Chair.	
17	THE	CHAIR: Okay. And Ms. Horvath?	
18	MS.	HORVATH: Yeah, I did not have a	
19		presentation to actually make. I was looking more to	
20		be available to answer questions that might be from the	12:25
21		participants.	
22	THE	CHAIR: And I know we have we'll have	
23		direct from the directly affected parties and	
24		neighbours as well but I think we're going to be okay	
25		for time. So why don't we take an hour and let	

AMICUS REPORTING GROUP - A Veritext Company

121

Cross-examined by Mr. Clifton

h		1
1	everybody have get their lunch just under an	
2	hour. Why don't we reconvene at 1:20; is that right?	
3	1:20. Get my watch right here. One day I'll learn how	
4	to tell time. Sorry, folks. So 1:20.	
5	So that's just barely under an hour and we'll	
6	reconvene at that time. And you might just want to	
7	throw all of your mics on mute and that because you may	
8	be having some conversations that you don't want to	
9	have broadcast, so just remember to do that.	
10	Thank you, everyone. See you at 1:20.	12
11	(PROCEEDINGS ADJOURNED AT 12:26 P.M.)

Questioned by Mr. Kennedy

Fe	ruary 10, 2022
Ρ	. Session
(1	OCEEDINGS RESUMED AT 1:23 P.M.)
<u>S</u>	VAN'T LAND (For Double H Feeders), previously affirmed
Tł	CHAIR: So I do believe we have everyone
	back. So welcome back, everyone. Thanks for the
	timeliness.
	We finished off with Mr. Clifton which now brings
	us back, Mr. Van't Land, questions for you will be
	directed from, if any, from Field Services. I don't
	think I asked you previously if you had questions.
MS	VANCE: We do not, thank you, Mr. Chair.
Tł	CHAIR: Okay. Thanks, Ms. Vance.
	Mr. Kennedy, then?
MF	KENNEDY: Thank you.
M	KENNEDY QUESTIONS THE WITNESS:
Q	I have a couple of questions, Mr. Van't Land, and I
	think it's I think almost all of my questions are
	with the purpose of clarifying your submission and how
	you're asking the board to treat your request.
	And almost all of my questions relate to the
	commitment that appears in relation to the operation on
	the northwest quarter of Section 22.

h			=
1		Now, in your submission, you say Double H Feeders	
2		Ltd. owns both operations. So is the ownership	
3		identical between the northwest quarter and the	
4		northeast quarter?	
5	Α.	I think my dad might have his name on the title on the	
6		northwest quarter. I'm not entirely sure, but the same	
7		farm, the same corporate entity owns the barns and runs	
8		both operations.	
9	Q.	I don't mean to split legal hairs, but how would a	
10		corporation own a barn that's on the title that's owned	13:25
11		by somebody other than that corporation, can you help	
12		me?	
13	Α.	Yeah, our accountant has asked us the same question.	
14		It I'm trying to think which title you know	
15		what, I'd honestly have to look. As far as that	
16		particular parcel where them barns are on, I don't know	
17		which name is on that title.	
18	Q.	Would you undertake to provide a copy of the title or	
19		some kind of description as to the ownership on the	
20		northwest quarter property and operation and northeast	13:26
21		quarter operation?	
22	Α.	I can look for that.	
23	Q.	And simply by giving that undertaking, you don't have	
24		to provide that prior to the close of the hearing, but	
25		sometime soon after the close of the hearing, if you	

Questioned by Mr. Kennedy

1		would provide that answer to Laura Friend, and we will	
2		make sure that that answer gets out to all of the other	
3		parties.	
4	Α.	I'm just getting confirmation. My brother is chatting	
5		with me, and he's confirming that Double H does own	
6		that parcel. So he knows that better than I do, so	
7	Q.	All right. So your accountant has been misled	
8		somewhere along the line.	
9	Α.	It that conversation had to deal with the shop which	
10		I do know for sure was built on my dad's land. And	13:26
11		that's a separate issue from today so	
12	Q.	Okay. And can you describe what manure storage	
13		facilities are on the northwest quarter?	
14	Α.	On the northwest quarter, we used to run an 800-head	
15		feedlot. So we have and probably 80 percent of that	
16		feedlot was concrete.	
17		So at the moment when we store our manure, it's	
18		stored on the concrete, and the drainage there is	
19		collected. It the drainage there does not go off	
20		property. That is an endpoint for the drainage.	13:27
21	Q.	And what do you do with the drainage once it's	
22		captured?	
23	Α.	It goes into a lake that my dad has for where he keeps	
24		some fish.	
25	Q.	So it's never pumped out; it never overflows?	

Questioned by Mr. Kennedy

			1
1	Α.	It's at the bottom. You'd have to go probably up 4 or	
2		5 feet for it to be	
3	Q.	Okay. And so if you take the birds out of the	
4		property, and I think that's what you're proposing to	
5		do, is say, "We will no longer raise raise birds on	
6		that property," are you going to are you also saying	
7		you're not going to store manure on that property?	
8	Α.	No, we're going to continue with our manure handling	
9		the way we have been.	
10	Q.	What does that mean for the northwest quarter?	13:28
11	Α.	We'll continue piling it on the same pile we have been.	
12	Q.	So you'll take it from the northeast quarter to the	
13		northwest quarter?	
14	Α.	When we're going to use it there. What happens right	
15		now, for example, right now, the piece of land that	
16		we're going to be spreading manure on happened for the	
17		balance of this year is several miles away.	
18		And when we have spare time, like right now when	
19		we have a flock finish, we for the short term, we	
20		buckle haul it to the northwest quarter. And then as	13:28
21		we have people available, we truck it to where we're	
22		going to be spreading it.	
23		Right now we're storing it on a dry corner. When	
24		it's compliant, then we do tend to spread it straight	
25		off.	

126

Questioned by Mr. Kennedy

			1
1		But at the moment we're stockpiling it there on a	
2		dry corner.	
3	Q.	So one of the things that we see is the Town of	
4		Coalhurst and the County of Lethbridge saying if you	
5		decommission that site, they're prepared to support	
6		your application on the northwest quarter for an	
7		expansion. If you continue to store manure there, have	
8		you had that conversation with the Town and the County	
9		as to what the ultimate plan is for your lands on the	
10		northwest quarter?	13:29
11	Α.	We have not. Nobody's brought it up.	
12	Q.	Okay. Do you think they'd be surprised to hear that	
13		you're still going to be storing significant quantities	
14		of manure on that quarter?	
15	Α.	To be honest, given the neighbours reaction, I think	
16		they'd be surprised right now that we're storing manure	
17		there.	
18	Q.	Okay. And if it's a consequence, and we'll hear from	
19		the Town and the County later, we were to ask them the	
20		question, with this knowledge as to whether their	13:30
21		opinion about the expansion on the northwest quarter	
22		might change given the proposal to continue activities	
23		on the northeast quarter, do you have any comment on	
24		that?	
25	Α.	Well, for starters you've got it backwards. We're	
1			11

Questioned by Mr. Kennedy

			1
1		expanding on the northeast; we're shutting down the	
2		northwest.	
3		And I'm not sure if that raises a concern for them	
4		or not. They haven't raised it. It like I was	
5		expressing in previous questions, I honestly don't	
6		recall the last time we got a nuisance complaint	
7		regarding manure.	
8	Q.	Okay. But you did read in their submissions that	
9		they're anticipating that on the northwest quarter,	
10		there would be an opportunity for country residential	13:31
11		expansion and more a more urbanization of that urban	
12		fringe?	
13	Α.	In that general area. And we're committed to	
14		decommissioning those barns once the new barns are	
15		built.	
16		We may, as an act of grace, ask for a period of	
17		overlap while we're moving equipment and such over, but	
18		I mean that would be for a flock or two at most; that	
19		would not be a perpetual reality.	
20	Q.	I was going to get there as to exactly what the	13:31
21		schedule of decommissioning of the one facility and	
22		populating the expansion facility, what that looks	
23		like.	
24		So perhaps this is an opportunity to provide some	
25		significant detail.	

128

Questioned by Mr. Kennedy

1	Α.	Until we have a permit, we don't have significant	
2		detail because we need to talk logistics with our	
3		construction outfitter and our contractors.	
4		I don't know if our builder is available. We have	
5		not done any design work because I don't want to waste	
6		people's time to do the design work required to build	
7		this project before I know there's going to be a	
8		project.	
9		So right now everything is on the back of an	
10		envelope, and we are depending on the outcome of this	1
11		hearing. Then we will pursue the detailed design work,	
12		get timelines oriented. I'm sure everybody is aware	
13		that right now, the logistics of just getting supplies	
14		for construction are not something that you can nail	
15		down .	
16		So, as part of our application, I think I	
17		indicated something of a 2025 deadline, and there's a	
18		reason for that is because I don't know what the	
19		availability is of labour or materials to to build	
20		the project.	1
21		What I can say is that once the new barns are	
22		built, then we're having the internal debate right now	
23		whether to buy new equipment or move equipment over,	
24		and there's some logistics involved with that. But the	
25		reality is that we would not be raising birds in both	

13:32

13:32

Ī

Questioned by Mr. Kennedy

1		set of barns at the same time.	
2	Q.	So does that mean you can surrender your permit	
3		concurrent with you know, prior to populating the	
4		expanded barn?	
5	Α.	I don't want to get myself in trouble with agreeing to	
6		some legal language that I'm not sure the implications	
7		of. What I can say is that we will not be trying to	
8		temporarily increase our bird population as some kind	
9		of an overlap.	
10	Q.	So to avoid that language, the northwest quarter would	13:33
11		be depopulated before the northwest expansion was	
12		populated?	
13	Α.	The net effect would be one flock would be placed in	
14		the new barns instead of the old, and the old barns	
15		would never see another chicken.	
16	Q.	Yeah, so very specifically, and I'm hoping you can	
17		answer this, is the northwest would be depopulated	
18		before the northeast expansion was populated; is that a	
19		yes or no?	
20	Α.	I'm not sure if you understand how broiler operations	13:34
21		work, but it's all-in all-out.	
22		So there'd be a flock where we would ship the	
23		birds out of the northwest barns and be preparing the	
24		northeast barns to accept the next flock, and the	
25		northwest barns would never see another bird.	

Questioned by Mr. Kennedy

h			ন
1		So there would be a line, a deadline where there	
2		would not be birds anymore in the northwest quarter.	
3	Q.	And no overlap. So you wouldn't have the	
4		expansion again, I think this is what you're telling	
5		me and simply confirm that is there would be no birds	
6		in the northwest quarter when the northeast expansion	
7		was populated?	
8	Α.	Because of the nature of flock schedules and	
9		overlapping, I might have to ask for a four-week	
10		overlap of some kind because I spent the whole morning	13:34
11		listening to you guys argue over the order of two	
12		paragraphs.	
13		The reality is that right now we operate under	
14		what are called three producer numbers, and those three	
15		producer numbers operate under three different	
16		schedules.	
17		So when I'm placing barns on what is on there	
18		labelled "Scott's place," we're placing them at what's	
19		labelled "Trevor's place," so the northeast-northwest	
20		quarters we have different cycle schedules.	13:35
21		So depending on how those overlap on the	
22		particular time frame, there may be a period of time at	
23		most the most it could possibly be is five weeks	
24		when there may be birds in both locations at once, but	
25		that would be a very temporary situation. That would	

Questioned by Mr. Kennedy

1		not be a perpetual.	
2	Q.	Okay. And to be clear is whoever holds the permit for	
3		the northwest quarter, and let's assume for the moment	
4		that's Double H Feeders and it's a deemed permit I	
5		think is what we heard this morning, Double H Feeders	
6		will be surrendering asking for that permit to be	
7		cancelled?	
8	Α.	Yeah, I'm not sure what the appropriate language is.	
9		But I'm assuming that as a condition of if the Board	
10		chooses to grant this permit, that rescinding that	13:36
11		permit will be part of the condition. That's our	
12		intention, that's our anticipation.	
13	Q.	And if that were conditional upon some restriction on a	
14		timely basis, and whether it be, you know, five-week	
15		overlap or whatever is tied to the population of the	
16		northeast quarter expansion, you would have no issue	
17		with that?	
18	Α.	We would work with that, yeah.	
19	Q.	Okay. And aside from storing manure on the northwest	
20		quarter, what other manure storage facilities do you	13:36
21		have? You have the barn. What's the future plan for	
22		those facilities?	
23	Α.	For facilities? Carina had it pretty good. We operate	
24		on a temporary basis. We work on a rotation through	
25		four quarter sections, and depending on which quarter	

Questioned by Mr. Kennedy

1		section is getting the manure next is where the manure	
2		gets stored.	
3	Q.	No, I'm speaking about the barns. So is	
4		Double H Feeders I take it is not intending to market	
5		that property, sell it?	
6	Α.	Correct.	
7	Q.	And long term, if you're successful with your	
8		application today is I think you're prepared to	
9		surrender your CFO permit for that site, but it still	
10		has barns on it. What's going to happen with the	13:3
11		barns?	
12	Α.	Our current intention for that site is we're debating	
13		what kind of storage we can make for that. We've got a	
14		bunch of trucks and tractors we parked outside, and	
15		we're debating if we could park them under cover.	
16		There's other equipment that we could park inside.	
17		The intention is some kind of storage if we keep	
18		the buildings up at all. But it would be not any kind	
19		of livestock, not any kind of manure. The intention is	
20		for equipment or supplies, but no manure would be in	13:3
21		that facility.	
22	Q.	And should you receive an approval to expand on the	
23		northeast quarter, the way our legislation works, we're	
24		approving notwithstanding an inconsistency within the	
25		municipal planning requirement, so it means you are	

h			ㅋ
1		operating with an approved facility perhaps on that	
2		northeast quarter, but you're probably severely limited	
3		on future expansions and those opportunities. You	
4		understand that?	
5	Α.	I understand that.	
6	Q.	Okay. And I'm	
7	Α.	If you want to get into long-term plans, if the area	
8		gets developed to the extent that some hope, then quite	
9		frankly, that land will be worth much more as some kind	
10		of developable parcel as opposed to agricultural land.	13:3
11		And if we have the opportunity to market it, then we'll	
12		take our marbles and develop somewhat further away.	
13		But to be honest, we're kind of at the point where	
14		that's going to be the next generation's call.	
15	Q.	So when you say "it's the next generation's call," I	
16		mean you've got two permitted operations, one that's	
17		approaching 30 years and one that's 25 years old. So	
18		with this expansion proposal, is 25 to 30 years kind of	
19		the life of one of these facilities, to your mind?	
20	Α.	That all depends on how good of care you take of them.	13:3
21		The original barns that we're looking to replace, they	
22		were the larger barn raised in its current state was	
23		raised in 1978. My brother manages that particular	
24		facility and he does a lot of work to keep it	
25		functional. It is showing its age. New barns were	

39

Questioned by Mr. Kennedy

h			ন
1		built, and there's a lot more concrete and a lot more	
2		plastic to keep things good. My anticipation would be	
3		that 40 or 50 years would not be unreasonable.	
4	Q.	All right. And then, finally, and I'm asking this	
5		question because earlier on you talked about compliance	
6		with the AOPA, and yet I think we had we heard a bit	
7		of a discussion on 48-hour incorporation and it's one	
8		thing complying with AOPA, but one of the provisions of	
9		AOPA is that you'll also comply with your permit.	
10		Do you think you're complying with your permit?	1
11	Α.	To be honest, when I saw that written there, it was a	
12		surprise to me. I wasn't aware that that condition was	
13		on the permit. That permit was applied to and written	
14		to my dad, and it's not something that I was aware of.	
15		Since we had gotten that permit on that location,	
16		we had switched to a direct seeding model, and reading	
17		the AOPA guidelines regarding manure management in	
18		general, that was what we were following. So that was	
19		a bit of naivety on my part perhaps, and we were not	
20		aware of that.	1
21		So as part of this whole process I'd like to get	
22		some final determination on that to get some clarity on	
23		exactly what the best method is going forward on that.	
24	Q.	I know you wouldn't be the first operator that the NRCB	
25		has suggested perhaps reading your permit is a good	

13:40

13:41

Questioned by Mr. Kennedy

			1
1		idea.	
2		Do you have a sense as to what the go-forward plan	
3		is? You're not in compliance, you've still got that	
4		condition. I'm going to say it's a little late to ask	
5		the board to consider any change today because parties	
6		should be getting notice if you're asking for a change	
7		to a permit.	
8	Α.	0kay.	
9	Q.	You have to initiate that appropriately. What do you	
10		do? You've got manure that you're going to be	13:42
11		spreading, I assume, in the spring?	
12	Α.	I guess my question would be to go to back to the NRCB	
13		as to what land does that refer to.	
14	Q.	Well, as I read the condition, it applies to all the	
15		manure you're taking off from this operation. Do you	
16		read it any differently?	
17	Α.	My interpretation of it would have been the land that	
18		we had at the time, which would have been this 200-acre	
19		home quarter and right now it's on a piece of land that	
20		is nowhere near here.	13:42
21	Q.	I'm going to suggest if that's the interpretation	
22		you're applying, perhaps you need to have a discussion	
23		with the NRCB office in Lethbridge.	
24	Α.	Okay. I will do that.	
25	Q.	Good. Mr. Van't Land, thank you. Those were my	
11			11

h			ন
1		questions. Thank you for answering them.	
2	Α.	You're welcome.	
3	MR.	KENNEDY: Mr. Chair, I'm done.	
4	THE	CHAIR: Thank you, Mr. Kennedy.	
5		Mr. Graham, do you have any questions for	
6		Mr. Van't Land?	
7	MR.	GRAHAM: Thank you.	
8	<u>MR.</u>	GRAHAM QUESTIONS THE WITNESS:	
9	Q.	Just for clarification for my part, where is your	
10		access to your barns on the NE 22?	13:43
11	Α.	Our driveway goes north so we're accessing off Township	
12		Road 9-4.	
13	Q.	Was that Kipp Road or Kipp Highway?	
14	Α.	Yes.	
15	Q.	It doesn't go onto 25?	
16	Α.	No. We have no direct access onto 25.	
17	Q.	One other question. Did you get an interpretation	
18		from what from the IDP, I think it's wrote as an	
19		IMDP, but did you get an indication from anybody on how	
20		to interpret that, or was that your own interpretation?	13:44
21	Α.	To be honest, that was our own interpretation and	
22		that's part of why we've gone through the permitting	
23		process before we've invested anything but time is to	
24		clarify that. We didn't want to waste a bunch of time	
25		and effort before finding out that the process was not	

Ī

1		going to move forward.	
2	Q.	Thank you. That's all, Mr. Chair.	
3	THE	CHAIR: Thank you, Mr. Graham.	
4		Ms. Roberts?	
5	MS.	ROBERTS QUESTIONS THE WITNESS:	
6	Q.	Yeah, Mr. Van't Land, I know we've spent a lot of time	
7		talking about permitted number of birds and so on, and	
8		I thank you for your explanation about quotas and that	
9		it's done in kilograms rather than number of birds.	
10		However, AOPA deals with number of animals, and when	13:45
11		permits are issued, it is for number of animals, not	
12		body weight.	
13		So, if the Board chooses to uphold the approval	
14		officer's decision, in Appendix D of the decision	
15		summary, the deemed capacity at NE 22 is 50,000 birds.	
16		I gather from some comments that you had made before	
17		that you might not agree with that deemed capacity.	
18	Α.	It the numbers because of the way that quota is	
19		allocated, yeah, it's been shifted.	
20		Now, to be fair, like we've been operating within	13:45
21		very close to the \$50,000 \$50,000, I'm sorry the	
22		50,000 bird limit as our operation prefers not to	
23		market into the KFC market, so we don't have the need	
24		to place more birds than our limit is is set at. If	
25		the permitted number is limited within if the	
1			1

Questioned by Ms. Stuart

i			1
1		120,000 bird request stands, that would give us more	
2		leeway in that regard, but it also indicates to us that	
3		the KFC market is not available to us then.	
4	Q.	Okay. So so either way, if the Board upholds the	
5		approval officer's decision 50,000 is the number as per	
6		the decision, if the Board chooses to overturn that	
7		decision, your request is for 120,000 birds maximum at	
8		NE 22?	
9	Α.	Yes.	
10	Q.	Okay. Great. That ends my questions. Thank you.	13:46
11	THE	CHAIR: Thank you, Ms. Roberts.	
12		Ms. Stuart?	
13	MS.	STUART QUESTIONS THE WITNESS:	
14	MS.	STUART: Thank you, Mr. Chair.	
15	Q.	Mr. Van't Land, I do have a couple of questions. I	
16		think they primarily pertain to your submission,	
17		Exhibit 18. If I could ask the document manager to	
18		pull that up. And page 2, I think. Not page 2. Hang	
19		on. Yes, page 2.	
20		Okay. Kind of a housekeeping thing. The adjacent	13:47
21		quarters I think have created some confusion in terms	
22		of the transcript and people talking about northeast	
23		and northwest when it's been opposite. And I thought I	
24		would just take the opportunity to double check what	
25		you've written in the last two paragraphs of this of	

			1
1		this page?	
2	Α.	Oh, you caught me.	
3	Q.	And I see three land locations, but I'm wondering if	
4		the northeast and northwest should be switched, but	
5		given this is your formal submission, I thought it	
6		might be prudent to give you an opportunity to just	
7		double check that?	
8	Α.	No, I appreciate you catching that. I made the same	
9		mistake that has been made all day, getting northeast	
10		northwest mixed up. That last paragraph should	13:48
11		definitely be reversed.	
12	Q.	So I'm thinking the one that says Trevor's yard, that	
13		second last paragraph, that the county are promoting	
14		further residential development. I think that should	
15		be on the northwest?	
16	Α.	Yes. Trevor's yard is the northwest. So in the last	
17		paragraph where it says "northeast," it should say	
18		"northwest." You're correct.	
19	Q.	As well. Okay. Just to clarify. Thanks so much.	
20		Now, just to provide some context to my next	13:49
21		couple of questions. And I think for the most part	
22		you've answered them, but, you know, we've heard a lot	
23		of discussion surrounding runoff, and just to clarify,	
24		you know, perhaps why we have an interest in that,	
25		given that the approval officer did not in their	

140

			1
1		decision address runoff given that the permit was	
2		denied, we are compelled as a Panel to address the	
3		directly affected parties' concerns.	
4		And as the Chair described at the beginning,	
5		there's this formality to it, that they're directly	
6		affected parties but, really, they're your neighbours,	
7		you're all neighbours. And I guess I'm wondering,	
8		given the questions we heard from your neighbours, can	
9		you provide some insight for me why you believe there	
10		is that disconnect between your perception of where	13:50
11		runoff is coming from and your neighbours' perception	
12		of where runoff is coming from and how you reconcile	
13		those two?	
14	Α.	It is something that's interesting. I've heard it said	
15		before: The whiskey's for drinking; the water is for	
16		fighting.	
17		And we've had drainage issues on other quarters,	
18		and I know it's been a difficult thing to reconcile.	
19		That's why when I first started going down this	
20		process, I wanted to find out where does the water go	13:50
21		because some of the pictures which Mr. Clifton showed	
22		in his submission show a lot of water in a lot of	
23		different places.	
24		And I mean those pictures are what they are, and	
25		he's absolutely right. Those places were underwater.	

141

Questioned by Ms. Stuart

i 			ন
1		You look at where the water can come from, and I look	
2		at the maps, and I look I've got about as much land	
3		draining into that basin as he does. And so it's open	
4		to interpretation which way that water flows.	
5		Now, when I look at the culverts and the lay of	
6		the land, when the neighbour that is to the northeast	
7		of us, his land is lower than all three of our quarter	
8		sections, the rest of us. The water is going to flow	
9		downhill, and that I don't know how else to say it.	
10		That's why I got the map is because I wanted to be able	13:
11		to demonstrate that.	
12	Q.	0kay.	
13	Α.	As far as Mr. Bedster is concerned, I share them. He	
14		has a pile of water going through his place. And	
15		regardless of whether and I will maintain there's no	
16		water coming from our place. But I mean you look at	
17		the amount of watering he has coming from south of him,	
18		and it is amazing the river of water that runs through	
19		there. It so I feel for the challenges that he has	
20		in his location.	13:
21		But I just want to reinforce that we're not adding	
22		to that water. The concerns he has about my neighbour	
23		to the south pumping, that is water that gets stranded	
24		between his driveway and the edge of his field. That	
25		driveway is on the edge of what used to be an old	

51

Questioned by Ms. Stuart

			1
1		irrigation canal which is high point. And if anything,	
2		if that driveway was removed, that water would run	
3		further onto our field and head towards Highway 25 and	
4		north.	
5		So there is no water running from our field into	
6		that installation.	
7	Q.	0kay. Thank you.	
8		Mr. Kennedy asked you, I think if we look back at	
9		Exhibit 18, page 3, and I think you referenced in the	
10		third paragraph under drainage that Alberta Environment	13:52
11		and Parks had not raised any concerns. And of course,	
12		you kind of addressed this, there's a bit of a	
13		disconnect between the Alberta Environment and Parks'	
14		submission on January 31st in the email that was	
15		submitted through Mr with Mr. Clifton's submission	
16		and your statement that there are no concerns.	
17		Given that that email, does that suggest to you	
18		there may be issues to resolve on that front?	
19	Α.	It to me it's a bit of a disconnect because I know I	
20		gave Mr. Huscroft a tour. He came down, and we went,	13:53
21		and we got my truck, and we drove all over the field	
22		where the drainage concerns are. And he took a bunch	
23		of pictures, and I showed him all the relevant details	
24		and brought him back to the things he wanted to see and	
25		double-check on, and we did all that.	
			1

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Ms. Stuart

			1
1		And at that point in time, I asked him where	
2		things stood, and he indicated that he was going to go	
3		back and consult some historical aerial photos of the	
4		area to find out what changes appear to have been made	
5		and the way the water used to flow back as far back as	
6		aerial pictures. And I'm not sure how far back those	
7		records exist.	
8		But he was going to check with him, and I told him	
9		if he had any concerns or anything that he needed my	
10		attention with, to get ahold of me. So he has my	13:54
11		email, and he has my phone number. So I'm not really	
12		sure what else to do with that.	
13	Q.	Thank you.	
14		And then my last question in that same document,	
15		document manager, on page 2 of 37, the last paragraph	
16		under "Rationale For Construction," you describe in the	
17		very last sentence: (as read)	
18		"If the permit is not granted, we would	
19		examine our options for renovating	
20		Trevor's barns."	13:54
21		And that would be on that NW 22-09-22. Can you	
22		elaborate what your vision of that would be, given the	
23		country residential plan for that area?	
24	Α.	It's definitely not Plan A. But right now we have a	
25		certain amount of production that we would like to	

Questioned by The Chair

1

1		maintain. And if the powers that be deemed fit that	
2		it's best to keep it where it is, then we plan to	
3		explore our options for improving those barns to	
4		current standards.	
5		And we haven't gone too far down that road because	
6		we are hoping that this one is the road we will take.	
7		So if in the event that the permit is not granted	
8		and the status quo is deemed to be the best situation	
9		to move forward with, then we will explore our options	
10		for improving that operation there.	13:55
11	Q.	Okay. Thanks very much, Mr. Van't Land.	
12	MS.	STUART: And, Mr. Chair, that concludes my	
13		questions.	
14	THE	CHAIR: Thanks, Ms. Stuart.	
15		Just a couple of clarification questions,	
16		Mr. Van't Land.	
17	THE	CHAIR QUESTIONS THE WITNESS:	
18	Q.	The storage that you talked about that would continue	
19		on the northwest quarter, that's been in accordance	
20		with short-term storage requirements under the act?	13:55
21	Α.	I believe so.	
22	Q.	So and so there's no formal storage	
23	Α.	Northwest quarter, I mean there's some storage there	
24		that, like I say, it's a defunct feedlot. So we have	
25		places there where the storage is catched, and it	

S. VAN'T LAND

Ī

145

Questioned by The Chair

1		doesn't run off site, so	
2	Q.	And it's it's this old feedlot, that's a permanent	
3		feedlot still or is that	
4	Α.	No, there's no cattle there. We stopped feeding cattle	
5		there 16 or 17 years ago, and my dad was a huge	
6		believer in using as much concrete as possible in order	
7		to maintain animal comfort.	
8		So we've got these great big concrete pads that	
9		have managed drainage on them. We took down the	
10		corrals and the feed bunks, and we've got these pads	13:56
11		that we use for equipment storage and some manure	
12		storage.	
13	Q.	So the manure is stored on concrete, then?	
14	Α.	Yes.	
15	Q.	And it's stored every year?	
16	Α.	In the event that we're going to spread it on the	
17		adjacent quarter, then it will be spread it will be	
18		stored there. But like right now, like there's very	
19		little manure there at the moment because we're	
20		anticipating spreading it on a different field. So	13:57
21		we've bulk hauled it away, and it's temporarily stored	
22		on that field.	
23	Q.	Okay. Mr. Kennedy explored this a little bit with you.	
24		If it were to be the case that the County, and we'll	
25		hear from them, but if there is concern about ongoing	

S. VAN'T LAND

Questioned by The Chair

h			न
1		storage, whether it is, you know, sort of annual or not	
2		on the northwest, in other words, if the thinking was	
3		Well, that will be abandoned in its entirety for	
4		livestock or manure associated with livestock and the	
5		Board were to approve the application and had a	
6		condition that no manure would be stored there, that	
7		would be something that would work within the	
8		operation, you would make it work for the operation?	
9	Α.	If we have to make it work, we will, but it would be a	
10		detriment to yeah, to the logistics of the	13:58
11		operation. I'm a logistics person.	
12		But it if we're required not to store manure	
13		there, it yeah, I would not be happy about it,	
14		but	
15	Q.	And it was never it was never a consideration when	
16		you were putting the application forward for the	
17		northeast to consider building an outside storage pad	
18		that would be essentially, you know, meet the AOPA	
19		requirements and would allow you to do some of the	
20		short-term storage on the site?	13:58
21	Α.	I guess my question would be why waste the land? It	
22		in our operation, we're picturing this as essentially,	
23		for all intents and purposes, just moving the barns	
24		from one site to another. And the rest of the	
25		operation outside the poultry production would remain	

1 more or less the same. 2 Q. That's all I have for questions. Thank you. Okav. 3 And I appreciate the fact that it's been a bit of a 4 long time on the stand. You've done a nice job of answering the questions, and I really appreciate it. 5 Did you have any redirect that you perhaps would 6 7 like to make now, based on all the questions that came to you over the last -- well, since lunch and a little 8 bit before lunch as well? 9 Α. I think I've talked to every point I can think of at 10 13:59 11 the moment, so I will continue making notes, and I 12 think I have an opportunity later on to bring things 13 up. So I will if I have to. But I think I've 14 addressed everything that I had intended to talk about. 15 THE CHAIR: I mean you'll have an Right. 16 opportunity for closing comments for sure. Okay. 17 Well, thank you, Mr. Van't Land, and we'll move to our next party, so for now you're done. Thank you. 18 19 (WITNESS STANDS DOWN) 20 THE CHAIR: So we have Ms. Janzen from the 14:00 21 County. Ms. Janzen, are you there, and are you available? 22 23 MS. JANZEN: Yes, I am. 24 THE CHAIR: Okay, thank you. So you mentioned 25 before lunch that you would have -- you had some short

1 remarks to make, and here's your opportunity for 2 presenting. And then we'll ask you some -- same folks 3 that will be asking you questions afterwards. So take 4 it away, thank you. MS. JANZEN: Do I need to be sworn or affirmed 5 6 in? 7 THE CHAIR: Yes, you do. I'm sure glad you remembered that so thank you. Ms. Vespa usually jumps 8 9 in as well so... 10 14:00 11 H. JANZEN (For Lethbridge County), affirmed 12 Α. Thank you, Mr. Chairman. 13 So with that, I do want to -- I'm obviously not 14 going to go through my whole submission. I'm sure 15 everybody's had a chance to look at that. I just wanted to highlight a few very brief 16 17 points, and then I will be open to any questions that 18 anybody may have. 19 So we've already discussed this at length I think 20 this morning with regards to how municipalities see the 14:01 21 hierarchy of planning. And so within Lethbridge County, we follow the 22 23 *Municipal Government Act* with regards to the hierarchy of statutory plans. As per the Municipal Government 24 25 Act, the Intermunicipal Development Plan prevails over

<u> </u>		1
1	the County's Municipal Development Plan, and I had	
2	presented that in my original comments to Ms. Weisbach	
3	when the application was submitted to County for	
4	comment. And you'll see that in my the submissions	
5	that are provided to the Board.	
6	With regards to the proposed expansion, the	
7	County, in conjunction with the Town of Coalhurst, felt	
8	that the proposed expansion on the northeast quarter	
9	met the policies of the Intermunicipal Development Plan	
10	as per Section 4.1.5, as once again we've already	14:02
11	discussed somewhat at length.	
12	In their application, Double H Feeders did	
13	indicate that their they were going to be	
14	decommissioning the existing operation on the northwest	
15	quarter. As I think Mr. Van't Land said, that was	
16	a that's what their application is. And then it's	
17	noted in their the technical document, which the	
18	Board has in their exhibit packages as Exhibit Number 3	
19	on page number 2, just indicating that that was the	
20	intent of Mr. Van't Land was to decommission that	14:02
21	operation and consolidate his operation on the	
22	northeast quarter. With regards to and this is just	
23	information for the Board; it's not like you can use	
24	this as a decision-making point.	
25	But the County is undertaking a new Municipal	

AMICUS REPORTING GROUP - A Veritext Company

1

1	Development Plan which will be going forward for County	
2	council approval in March, and it will more adequately	
3	address the hierarchy of plans indicating that the IDP	
4	supercedes and prevails over the MDP if there's any	
5	discrepancy between the two.	
6	We noted that that was a concern. Municipalities	
7	tend to we follow the MGA very closely, and I guess	
8	we'd always presumed that the NRCB understood that IDPs	
9	prevailed. When we would receive the applications,	
10	referral applications, they always asked if there was	14:03
11	any other statutory documents that would impact a	
12	proposal. And so we include Intermunicipal Development	
13	Plans frequently in our comments to the approval	
14	officer.	
15	But with that, I think that concludes kind of my	
16	very brief comments, Mr. Chairman, so I'm open to any	
17	questions.	
18	THE CHAIR: All right. Thank you, Ms. Janzen.	
19	Does the Town, Ms. Horvath, do you have any	
20	questions for Ms. Janzen?	14:04
21	MS. HORVATH: No, I don't. Thank you.	
22	THE CHAIR: Thank you. And do any of the	
23	neighbours have questions for Ms. Janzen?	
24	And if so, we can start with Ms. Schmid. But I'm	
25	not hearing any, but that doesn't necessarily mean you	

F

Questioned by Ms. Schmid

7

1		don't have a question if there's a screen I can't see.	
2		Oh there, now I can see. Did you have questions for	
3		Ms. Janzen?	
4	MS.	SCHMID: I do, but I just need a minute to	
5		think about how to ask it.	
6	THE	CHAIR: Sure. We'll give you a minute.	
7		And Mr. and Mrs. Bedster or Mr. Clifton in the	
8		meantime, do you have a question; we can move to	
9		someone else?	
10		Okay. All right just take a moment if you could,	14:05
11		and then we'll get to you, Ms. Schmid.	
12		Thanks for your patience, Ms. Janzen.	
13	Α.	No problem.	
14	<u>MS.</u>	SCHMID CROSS-EXAMINES THE WITNESS:	
15	Q.	I guess, maybe you can answer it better for me. Just	
16		with regards to the county supporting, like,	
17		Double H Feeders expansion, you mentioned, and I don't	
18		have the wording in front of me but basically if there	
19		were the negative impacts to the neighbours in the	
20		communities, like, how is that, I guess, going to be	14:06
21		considered maybe moving forward after all of this	
22		debate?	
23	Α.	So when the county is looking at a referral from the	
24		NRCB, knowing that we're not the final decision-maker,	
25		we looked at, along with the town because an	

152

Questioned by Ms. Schmid

			=1
1		Intermunicipal Development Plan is not just the county,	
2		it is an agreement between the town and the county, we	
3		look at what's existing in the area, what are some	
4		possible best outcomes in terms of future development	
5		and planning.	
6		And so with regards to impacts, we're looking at,	
7		especially with confined feeding operations, does an	
8		existing operation if they want to expand, would it	
9		meet the minimum distance separation, which I do	
10		believe Mr. Van't Land's application does for the	14
11		expansion.	
12		And then with the decommissioning, it was seen as	
13		a net benefit to the Coalhurst area given the country	
14		residential and the proximity to the town, and the fact	
15		that they would not be necessarily drastically	
16		increasing their feedlot numbers but they would have a	
17		marked improvement in terms of their the	
18		modernization of the facility from their northwest	
19		operation to their northeast.	
20	THE	CHAIR: Ms. Schmid, do you have a	14
21		follow-up?	
22	MS.	SCHMID: I do, but I don't know if it	
23		really is going to apply.	
24	Q.	Just speaking to the modernization and expansion, Scott	
25		had mentioned about bringing over old equipment from	

Questioned by Ms. Schmid

the other barn due to cost reasons. And I just 1 2 wondered how that works to support modernization? 3 I'm not an expert on equipment unfortunately, Α. Mr. Chairman, so I don't believe I'm qualified to 4 5 answer that particular question. THE CHAIR: 6 Fair enough. 7 MS. SCHMID: That was my questions. THE CHAIR: Sorry, that is all your questions? 8 MS. SCHMID: Yes. 9 THE CHAIR: 10 Okay. Thank you. 14:08 11 Mr. and Mrs. Bedster, you had no questions? And Mr. Clifton? 12 13 MR. CLIFTON: No questions. THE CHAIR: 14 Okay. Thank you. 15 Ms. Vance, Field Services? MS. VANCE: I have no questions. Thank you. 16 17 THE CHAIR: Thank you. And, Mr. Kennedy? 18 MR. KENNEDY: Mr. Van't Land, I don't know 19 whether you canvassed him. If you did, I do have 20 questions, but... 14:09 21 THE CHAIR: I am sorry, I did miss 22 Mr. Van't Land, sorry. 23 Do you have questions? 24 MR. VAN'T LAND: I don't have a question for 25 Ms. Janzen. I can address the equipment modernization

154

h		
1	topic if you want	
2	THE CHAIR: We're sort of - we're out of step,	
3	so I think we're going to leave that, Mr. Van't Land.	
4	MR. VAN'T LAND: I have no questions.	
5	THE CHAIR: Thank you.	
6	MR. KENNEDY: Mr. Van't Land has a rebuttal	
7	evidence opportunity and he can bring that forward	
8	then. So it's not an opportunity lost; it's just not	
9	the time now.	
10	MR. KENNEDY QUESTIONS THE WITNESS: 14	:09
11	Q. Ms. Janzen, I only have a couple of questions, and I	
12	thank you for your submission. It was very clear and	
13	very succinct. But I think we heard something that I'm	
14	not sure that the County addressed or, frankly, the	
15	Town has addressed, and that is the continued storage	
16	of manure on the northwest quarter.	
17	As that is the described plan and it can happen	
18	in one of two ways: One is if the permit for the	
19	northwest quarter is surrendered, it would surrender	
20	the permit for even manure authorization, so any manure 14	1:10
21	storage facilities would lose that capacity.	
22	So it would probably be a temporary manure storage	
23	site, so he'd have to move it around and he can only	
24	store X number of months over a period of time on that	
25	site, and but there will still be manure stored in	

Ī

1		proximity to the town within the IDP constraint area.	
2		Do you have any concerns about that? Does it change	
3		your opinion or your submission to the Board in any	
4		way?	
5	Α.	I mean, I wasn't aware that there was permanent storage	
6		at that particular location.	
7		With regards to temporary storage, the county does	
8		allow for stockpiling to occur on properties that are	
9		within the fringe areas as long as it's meeting the	
10		required setbacks to county sorry, from roadways and	14:11
11		also from adjacent properties.	
12		So, I mean, we live in a rural municipal I'm	
13		the planner for the rural municipality, so I understand	
14		that, you know, manure is something that exists and	
15		people have to store it. We do hope that operators are	
16		very considerate of their adjacent landowners with	
17		regards to stockpiling. We work very closely with the	
18		NRCB with regards to compliance and making sure that	
19		there is very little impact to adjacent landowners.	
20		So with regards to temporary storage, I don't	14:12
21		believe the county would have any particular concerns.	
22		Permanent storage might be something that we might have	
23		more concerns on, particularly if there was any	
24		opportunities for more residential development in that	
25		area.	
			1

156

Questioned by Mr. Kennedy

			1
1		I did note that there are where the Van't Lands	
2		have the NW 22-9-22, they actually own about 1, 2, 3,	
3		4, 5 parcels, smaller titles in that particular	
4		quarter, so I can see how things have kind of shifted	
5		around there.	
6		So I hope that answers your question, Mr. Kennedy.	
7	Q.	It also raises a bunch more but not for you.	
8		But as a planning authority, does it cause you to	
9		have any concern when the NRCB says there are	
10		circumstances where we would not have regard for the	14:13
11		IDP provisions?	
12	Α.	Yeah, the county, we try very hard to ensure that we're	
13		planning and working with our adjacent urban	
14		municipalities, so Intermunicipal Development Plans are	
15		very highly ranked in the county in terms of	
16		enforcement, and we rely heavily on them. They're	
17		not they aren't shelved documents at all.	
18		As seen in this particular case, we want to see	
19		our agricultural operators have opportunities, but	
20		recognizing that there could be some constraints in	14:13
21		terms of new operations.	
22		So I think Ms. Horvath might have more from the	
23		town's perspective, but we do hope that the NRCB will	
24		reconsider how they view those higher level statutory	
25		documents going forward.	

157

Questioned by Mr. Kennedy

 		
1	Q.	And when the county now looks at a planning puts its
2		mind to a planning consideration, an MDP, there's an
3		MDP provision but there's an IDP provision which
4		prevails over that MDP provision, do you just read the
5		IDP provision over the MDP provision?
6	Α.	So when we're looking at amending or, sorry, with
7		our new revised MDP, we are looking to bring everything
8		into compliance with the IDP. So like I said
9		cross-referencing those documents. We don't carbon
10		copy policies from the MDP to the IDP but we do make
11		reference. We understand there was maybe we should
12		have made those considerations a little bit earlier on
13		just for consistency between the documents, but we do
14		see the need to tie them together more closely just so
15		there is not any confusion from any other provincial
16		agency.
17	Q.	Not quite my question. So my question was this: If
18		you're looking at provision in the MDP, and let's use
19		the one we have as an example and you're trying to
20		apply the provision that says this is an MDP exclusion
21		zone, full stop, and an IDP provision which is a little
22		more relaxed, I think that's what the Commission says,
23		is do you now read the IDP provision at the end and not
24		read the MDP provision?
25	Α.	Yeah, that would be correct. The IDP would prevail

14:14

14:15

Questioned by Mr. Graham

1

1		because of the discr	epancy between the two. Sorry for	
2		the confusion.		
3	Q.	So when you look at	your MDP, it's as if it's been	
4		amended by that IDP	provision?	
5	Α.	That's correct.		
6	Q.	Okay. Thank you, Ms	. Janzen. That's very helpful.	
7	MR.	KENNEDY :	Those are all my questions.	
8	THE	CHAIR:	Thanks, Mr. Kennedy.	
9		Ms. Roberts, do	you have questions?	
10	MS.	ROBERTS :	I have no questions. Thank you,	14:16
11		Ms. Janzen, for your	clear explanation.	
12	THE	CHAIR:	Thanks, Ms. Roberts.	
13		Ms. Stuart.		
14	MS.	STUART :	I have no questions. Thank you.	
15	THE	CHAIR:	And Mr. Graham.	
16	MR.	GRAHAM:	Yeah. Just a couple of	
17		clarifications.		
18	<u>MR .</u>	GRAHAM QUESTIONS THE	WITNESS :	
19	Q.	In I think it's Docu	ment 7, I just would like a	
20		clarification on Sec	tion 3.4.6 where it says:	14:16
21		(as read)		
22		"Primarily Ag i	s governed by the land	
23		use bylaws of A	g subdivision and	
24		policies."		
25		So I'm assuming when	that at least my assumption is	

1		when that land becomes or Coalhurst grows, that land	
2		could be subdivided; is that what that is referring to?	
3	Α.	So I do believe with regards to that particular policy	
4		in the IDP, that it's referring to that any lands	
5		that we've identified as primarily agriculture, such as	
6		the Van't Lands' property, that they could apply if	
7		they wanted to if it met the policies of the land	
8		use bylaw, they could apply to subdivide say a first	
9		parcel out of a quarter section, or if there was, but	
10		feedlots compromise the ability to subdivide under the	14:17
11		county land use bylaw.	
12		So if there was no feedlot on there, they could	
13		apply to subdivide, they could apply to do an area	
14		structure plan or any other planning document on there.	
15		The provision of the feedlot on there does limit their	
16		opportunities for any type of subdivision on the	
17		property.	
18		I hope that answers your question.	
19	Q.	Yeah, I think so. Thank you. I have one more. On the	
20		same document, but it's planning area 2 in the concept	14:18
21		plan, the SE 27-SE 22 has that red half circle in it.	
22	Α.	Mm-hmm.	
23	Q.	And it says it's for highway commercial and light	
24		industrial. Is that kind of where does that come	
25		from? Is that tied back to what we just talked about	

Questioned by Mr. Graham

			1
1		on the primarily ag or because I was confused when I	
2		looked at that.	
3	Α.	I can appreciate that. That particular area, we	
4		identified that particular node as potential for	
5		highway commercial and light industrial due to the	
6		proximity to a highway corridor. So in the future if	
7		there was a demand for more highway commercial in this	
8		area, that would be the area where we would redirect	
9		that type of development to. In order to do that type	
10		of development, they would have to rezone to an	14:19
11		industrial or commercial use and go through that	
12		planning process to establish that.	
13		So it would be requiring additional approvals by	
14		county council to ensure that that development was	
15		sound. That's the reason why we had that in there was	
16		to allow for some highway commercial along Highway 25.	
17	Q.	So just to follow up to that, then, these barns could	
18		be could hinder that, could it not?	
19	Α.	Because they're non-residential, and as long as they	
20		weren't anywhere where they would have like food	14:19
21		processing, the County wouldn't see a conflict between	
22		those two uses. Usually highway commercial is things	
23		like equipment sales, trucking companies, things of	
24		that nature. So having the feedlot close to commercial	
25		or industrial, there isn't necessarily a conflict of	

1 use. MR. GRAHAM: Thank you, Mr. Chair, that's all. 2 3 THE CHAIR: Thank you, Mr. Graham. 4 And sometimes the frustration of going last, but sometimes the luxury of going last is all the questions 5 have been asked and answered. 6 7 So I have no further questions, Ms. Janzen, but I do thank you for and agree with the Panel members, with 8 9 their compliments, that were very concise and succinct answers very clear, thank you very much. 10 14:20 MS. JANZEN: 11 Thank you. THE CHAIR: 12 Now based on our questions, did 13 you have any redirect that you wanted to provide, Ms. Janzen? 14 15 No, I do not. Α. 16 THE CHAIR: Okay. Thank you very much. 17 (WITNESS STANDS DOWN) THE CHAIR: 18 So up next we have the Town of 19 Coalhurst. So, Ms. Horvath, are you -- where are you 20 There you are, perfect, I've got you on my here? 14:20 21 screen. MS. HORVATH: 22 Thank you. 23 THE CHAIR: We can have you sworn in or 24 affirmed, yes, I remembered. 25

162

		7
1	<u>D. HORVATH</u> (For the Town of Coalhurst), affirmed	
2	THE CHAIR: Thank you, and please proceed.	
3	A. Thank you very much.	
4	I'm just going to spend a little bit of time	
5	introducing myself and sort of my role.	
6	I'm a senior planner with the Oldman River	
7	Regional Services Commission, and I've been a planner	
8	with the Commission for about 23 years. And my area	
9	assignments have included the Town of Coalhurst for the	
10	past about 16 years. So I was around when we did do	14:21
11	the work on the Intermunicipal Development Plan. So	
12	hopefully if there's any questions on that, I'll be	
13	able to provide some input to that.	
14	As my colleague, Ms. Janzen, she's covered a lot	
15	of what I had to include, so I don't want to waste any	
16	time by repeating some of that. But I maybe will speak	
17	to the one sort of outstanding item which is sort of	
18	new information to me as well is this idea that there	
19	would still be manure storage at that location that was	
20	proposed to be decommissioned.	14:22
21	So it is my understanding that the Van't Lands	
22	came to Town council in April of 2021. I was not at	
23	that meeting so, again, I'm working on information that	
24	I've received from the CAO, as well as the one	
25	remaining councillor. As everyone realizes we had an	
П		11

1	election in October, and four of my five councillors	
2	that would have been included in that discussion are no	
3	longer on council. So we're kind of working on what	
4	was historic information from those meetings.	
5	So it was my understanding that the idea that the	
6	decommissioning would include everything, that the	
7	entire operation would cease, including any manure	
8	storage or activity on the site. So if that is	
9	definitely not the case, I think that we would not be	
10	in support of that with, I guess, a permanent manure	14
11	storage.	
12	I think we would agree with the comments of	
13	Lethbridge County with regards that we understand there	
14	is temporary storage. As she said, we live in a very	
15	rural area. We understand those types of things and	
16	would have no objection to that part of a permit. If	
17	it was going to be there temporarily or moving on	
18	certain months of the year, that would be all right,	
19	but to have permanent storage, I think we would be less	
20	likely to support that.	14
21	So that's all I really have to add to the hearing.	
22	So if there's any questions, I'd be happy to answer	
23	them.	
24	THE CHAIR: Great. Thank you very much,	
25	Ms. Horvath.	

AMICUS REPORTING GROUP - A Veritext Company

14:23

14:24

Ī

Questioned by Mr. Kennedy

1

1		Ms. Janzen, wit	h the County, did you have any	
2		questions?		
3	MS.	JANZEN:	No, I don't have any questions.	
4	THE	CHAIR:	And neighbours, Ms. Schmid,	
5		Mr. and Mrs. Bedster	, Mr. Clifton, do any of you have	
6		questions for Ms. Ho	rvath?	
7	MR.	CLIFTON:	No.	
8	MR.	BEDSTER :	No.	
9	MS.	SCHMID:	No.	
10	THE	CHAIR:	All right, hearing none.	14:24
11		Mr. Van't Land,	do you have a question for	
12		Ms. Horvath?		
13	MR.	VAN'T LAND:	I do not.	
14	THE	CHAIR:	And, Ms. Vance?	
15	MS.	VANCE :	We do not have any questions	
16		either. Thank you.		
17	THE	CHAIR:	Thank you.	
18		Mr. Kennedy.		
19	<u>MR.</u>	KENNEDY QUESTIONS THE	WITNESS:	
20	Q.	I have one question,	and it's this, Ms. Horvath, is	14:25
21		and it's the same qu	estion that I asked the County.	
22		And it is as a plann	ing authority, do you have concerns	
23		that the NRCB might	not be having regard for provision	
24		in an Intermunicipal	Development Plan?	
25	Α.	I would say yes, esp	ecially as an urban municipality	

Questioned by Mr. Kennedy

1		because, again, most of the time in our urban municipal	
2		development plans, we don't deal with livestock and	
3		confined feeding operations as policy areas. So we	
4		rely on our rural neighbours to ensure that our	
5		interests are protected.	
6		I guess one thing that sort of, from what I've	
7		heard today as well is that the Municipal Development	
8		Plan, even on a rural, is a very high level document;	
9		it covers a lot of land area. And so these	
10		Intermunicipal Development Plans are more site	14:26
11		specific. While they're still general in nature, they	
12		are specific to each urban municipality and the unique	
13		situation that they may find themselves in with regards	
14		to existing development or long-term development.	
15		So yeah, it is of great concern that the	
16		Intermunicipal Development Plan policies are not given	
17		a higher priority.	
18	Q.	Thank you. And the other piece is this, and this is an	
19		area that's been identified in the Intermunicipal	
20		Development Plan and with, you know, the potential for	14:26
21		growth from perhaps even both sides, perhaps from the	
22		City of Lethbridge, as well as the Town of Coalhurst.	
23		And I know that the planning documents are	
24		forward-looking.	
25		But what we heard from Mr. Van't Land was, you	

Questioned by Mr. Kennedy

			a
1		know, this barn could well be current and operable for	
2		50 years. Does that cause any concern, do you think,	
3		from the Town of Coaldale's (verbatim) support of that	
4		operation being put in place?	
5	Α.	I think that's an excellent question because I think	
6		that's if the proposal was on the existing site	
7		which was closer to Coalhurst and we knew that was	
8		going to be there for 50 years, that creates an	
9		incredible constraint to further development within	
10		that.	14:27
11		I guess the thought is, you know, as we go out in	
12		distance from the Town boundary, there's less likely to	
13		be development. So, again, the crop (phonetic) will	
14		come from the core and out. And as such, if that	
15		development is in its current location in the northeast	
16		quarter where Ms. Janzen indicated that both the	
17		municipalities had agreed that the Kipp Road, as it has	
18		been known, or 94 is a paved connection between Highway	
19		3 and Highway 25, we would anticipate that there would	
20		be development in that location, that this could be	14:28
21		compatible to.	
22		Or, again, as Mr. Van't Land mentioned, you know,	
23		sometimes these larger barns or buildings can be	
24		converted to something different, and as well would	
25		give them that opportunity.	

27

167

Questioned by Mr. Kennedy

1			1
1		So I think from a planning perspective, the	
2		current location was of support by the municipality	
3		because they felt that, yes, they understand these	
4		things. When people make investments, they're there	
5		for a long time. And to direct that investment to	
6		where it may make the most sense is really what	
7		planning is all about. And definitely from the Town's	
8		perspective, the further away from our boundary, the	
9		better it is.	
10		Understanding that that's why in this particular	14
11		one, the Town of Coalhurst, in discussions with the	
12		County, understood that there's investment and existing	
13		operators, and that's why we maybe took a less hard	
14		line on no expansions, no new ones. We said, okay,	
15		well, no new ones, we can understand that, but we have	
16		to understand that there are people that may need to	
17		expand, but how do we do that in a way that is	
18		beneficial to the municipality.	
19	Q.	Sure. Thank you. Those are my questions. I have some	
20		outstanding questions, but I think you've probably	14
21		given me the best answer you can in terms of, you know,	
22		what the siting of the short-term manure storage	
23		facility, short-term manure storage on this site might	
24		mean.	
25		And what I now hear is there's all kinds of lands	

14:29

14:29

1.			-
1		that are owned by the family along, you know, in the	
2		northwest quarter that may not be covered by the	
3		existing deemed permit. So any cancellation or any	
4		conditions associated with that may not apply to those	
5		other lands?	
6		So we've got a lot of uncertainty related to what	
7		short-term manure storage might look like on a	
8		go-forward basis, and I think unfortunately we're not	
9		going to get we may not have all of the answers to	
10		that by the time this hearing closes.	14:30
11	Α.	I agree. I noticed that as well when Ms. Janzen was	
12		speaking that, yeah, there's six separate titles and	
13		whether or not what that first original	
14		grandfathered permit from 1998 looked like and what it	
15		actually entailed, I guess, perhaps wasn't at the front	
16		of mind. When it was before Town council, it was the	
17		idea that that operation in that location was going	
18		to to no longer be, and that was sort of what was	
19		presented to them.	
20		I don't think they understood that well, it could	14:31
21		happen on one of the other titled parcels that really	
22		sort of, I guess, undermined what their thought process	
23		of what they were supporting I think.	
24		So that does provide a little uncertainty for the	
25		Town.	

Questioned by Ms. Roberts

h			ㅋ
1	Q.	I see Mr. Van't Land making notes. Perhaps when he	
2		gets his rebuttal opportunity, he may speak to the	
3		question which may or may not may be helpful to the	
4		Panel and to the Town.	
5		But, Ms. Horvath, thank you for your answers.	
6	Α.	Thank you.	
7	THE	CHAIR: Mr. Kennedy?	
8	MR.	KENNEDY: Yes.	
9	THE	CHAIR: Thank you.	
10		Ms. Roberts.	14:32
11	<u>MS.</u>	ROBERTS QUESTIONS THE WITNESS:	
12	Q.	Yes, Ms. Horvath, AOPA's standards and administration	
13		regulations Section 5, and nobody has to go there, I'll	
14		just comment on it. That section defines what	
15		operators are allowed to do and what they're not	
16		allowed to do for short-term solid manure storage. And	
17		there are a number of items listed there, but I think	
18		that the prime concern I'm hearing from the Town could	
19		be the location of those short-term storage sites.	
20		And in that portion of the standards and admin	14:32
21		regulation, one of the things that is stated is that	
22		those storage sites have to be not less than 150 metres	
23		from the nearest residence that isn't owned or under	
24		control of the owner or operator of the manure. And	
25		then they also define what actually is meant by "short	

Questioned by Ms. Roberts

1		term," and it's meant to be no accumulative no more	
2		than seven months over a three-year time period.	
3		So I would think that in this particular case,	
4		what that could mean, I'll say worst-case scenario for	
5		the Town, could be that there could be a solid manure	
6		storage pile in one location for a seven-month time	
7		period, but then it couldn't be in that particular	
8		location until three more years had passed.	
9		So you had commented that probably from the Town's	
10		perspective, temporary storage is okay. Having, I'll	14:33
11		say, those parameters around it, you know, what short	
12		term actually means, it could be seven months, but	
13		would have to be more than 150 metres from the nearest	
14		residence. Do you have anything, any additional	
15		thoughts on that? Do you believe that that could be	
16		acceptable to the Town?	
17	Α.	I do. Given those parameters, I do believe that that	
18		would be acceptable. That particular part of our	
19		community only has one or two residents.	
20		So, again, I think the more impacted residents	14:34
21		would be actually County residents, so again, I think	
22		we would have no problem with that that scenario.	
23	Q.	0kay. Thank you.	
24	MS.	ROBERTS: That's all the questions for me,	
25		Mr. Chair.	

AMICUS REPORTING GROUP - A Veritext Company

1 THE CHAIR: Thanks, Ms. Roberts. 2 Ms. Stuart. MS. STUART: 3 Thank you, Mr. Chair. My 4 questions have been answered. Thanks, Ms. Horvath. THE CHAIR: 5 And, Mr. Graham. MR. GRAHAM: 6 Thank you. No, I have no 7 questions at this time, Mr. Chair. THE CHAIR: Thank you. And I have no further 8 questions either, Ms. Horvath. And like Ms. Janzen, 9 thank you very much for very clear, concise answers. 10 14:35 11 Thank you. MS. HORVATH: 12 Thank you. 13 THE CHAIR: And did you have -- based on the questions you had, did you have any redirect for the 14 15 Panel? MS. HORVATH: 16 I do not. Thank you. 17 THE CHAIR: All right. Thank you very much. 18 (WITNESS STANDS DOWN) 19 THE CHAIR: So, Ms. Schmid, it's your 20 opportunity to provide any direct evidence that you 14:35 21 might have or if you wanted to explore or highlight anything that's particularly significant to you, this 22 23 is your opportunity. 24 Did you have something prepared or are you ready 25 to present?

M. SCHMID

1 MS. SCHMID: I am. Can I just have a minute? Take a quick minute. 2 THE CHAIR: It's Sure. 3 sort of laid out --4 MS. SCHMID: It's okay. It's okay. We show a lot of deference, 5 THE CHAIR: 6 Ms. Schmid, because I mean, this is new, it's probably 7 a little bit intimidating, so if you need to take a couple of minutes, go ahead and do that. 8 MS. SCHMID: 9 It's okay. I guess --THE COURT REPORTER: Excuse me, excuse me --10 14:36 11 THE CHAIR: Sorry. We need to swear in. 12 Thank you. 13 Go ahead, Ms. Vespa. 14 15 <u>M. SCHMID</u> (In their own stead), affirmed THE CHAIR: 16 Thank you. 17 Α. So I guess basically for the letter I submitted, more 18 of my concerns with this expansion were just around the 19 health effects it could have for neighbours and 20 communities, especially, you know, if you look at how 14:37 21 things are going to expand in the next 50 years. 22 And I'm more concerned with, like, the air quality 23 and how that impacts, like, the health -- like 24 respiratory health stats. I don't think there was much 25 done to address that, and I don't think that moving

M. SCHMID

F

173

1	forward it's really going to be a consideration until	
2	it's actually a real problem.	
3	But I also wonder, too, about the long-term	
4	ecological impacts on that natural drain when you add	
5	additional barns to it that are much bigger than what's	
6	already there and how that looks even just with effect	
7	of groundwater and runoff and drains and natural drains	
8	and things like that.	
9	I don't know, I guess I have more concerns on like	
10	not having any compliance for air quality because I	14:38
11	know it's a big concern.	
12	THE CHAIR: Sorry, are you	
13	A. I'm not sure what else to add.	
14	THE CHAIR: Oh, okay. So are you completed	
15	what you wanted to say? I mean, I know that you all	
16	had opportunities in terms of the questions previously	
17	to Double H, as an example, but this is an opportunity	
18	to do what you've done, but if there's nothing more to	
19	add, then we'll move to see if there's any questions	
20	that others may have of you.	14:39
21	A. Sure. Yes, I'm done.	
22	THE CHAIR: You're good? Okay, thank you.	
23	Ms. Janzen?	
24	MS. JANZEN: I have no questions.	
25	THE CHAIR: Ms. Horvath?	

ᆌ

1 MS. HORVATH: I have no questions. 2 THE CHAIR: Mr. and Mrs. Bedster? 3 MR. BEDSTER: No, none really. Mr. Clifton? 4 THE CHAIR: MR. CLIFTON: 5 No. THE CHAIR: Mr. Van't Land? 6 7 MR. VAN'T LAND: Yes. MR. VAN'T LAND CROSS-EXAMINES THE WITNESS: 8 I just want to -- Ms. Schmid has brought up a lot of 9 Q. concerns about air quality, and I want to understand 10 11 those concerns, that I -- if the air quality is bad, 12 then that is definitely something I want to be aware of 13 and if there's a reasonable mitigation, I would 14 definitely pursue it.

I guess my question would be in order to try to understand the problem if she's ever had the opportunity to document particular times when the air has been particularly of poor quality so that I can find out how that would mesh with what I'm doing here.

20 A. Can I respond to that?

21THE CHAIR:Yes, the question is put to you.22Please do.

A. I absolutely guarantee that moving forward, I will
 document every day, hour, and minute that there is an
 air quality concern.

AMICUS REPORTING GROUP - A Veritext Company

M. SCHMID Cross-examined by Mr. Van't Land

14:40

14:40

M. SCHMID

175

Questioned by Mr. Kennedy

h			71
1	Q.	MR. VAN'T LAND: I appreciate that because I	
2		mean we're neighbours, and if all goes well, I hope	
3		we're neighbours for a long time, and if there's	
4		something that I'm doing or can do to mitigate the	
5		concerns, then I want to do that, but I can't fix	
6		something that I'm not aware of either. So that's my	
7		comment there. And I'm done.	
8	THE	CHAIR: Thank you, Mr. Van't Land.	
9		Ms. Vance?	
10	MS.	VANCE: I have no questions. Thank you.	14:4
11	THE	CHAIR: Thank you. Mr. Kennedy? On mute.	
12		Hi, Mr. Kennedy. Did you have questions?	
13	MR.	KENNEDY: I did have a question and I was	
14		halfway through it when I realized I was on mute.	
15	THE	CHAIR: Oh, okay. No problem.	
16	MR.	KENNEDY: I apologize.	
17	THE	CHAIR: No problem. Thank you.	
18	MR.	KENNEDY: Now, I'll start over again.	
19	<u>MR.</u>	KENNEDY QUESTIONS THE WITNESS:	
20	Q.	Ms. Schmid, I'm looking at your written submission, and	14:4
21		the only question I have relates to a statement that	
22		you make near the end of that submission, and that	
23		statement reads: (as read)	
24		"Real estate research shows depreciated	
25		land values when commercial operations	

AMICUS REPORTING GROUP - A Veritext Company

M. SCHMID

			1	
1		are developed in rural agricultural		
2		settings."		
3		So the Board, you know, hears this concern, and, you		
4		know, it takes every opportunity to assess what		
5		information is available, what research information is		
6		available. So you've made a reference, but we don't		
7		have the specific research. Can you direct us as to		
8		where we would find what you're referring to.		
9	Α.	So just a general Google search, but also my friend was		
10		formerly in real estate, so having discussions with him	14:	
11		about how commercial confined feeding operations impact		
12		basically our resale value and what that would look		
13		like.		
14	Q.	Okay. But not I mean, our Board deals with		
15		technical research all the time. You're not referring		
16		to a technical research paper on the subject?		
17	Α.	No.		
18	Q.	Thank you.		
19		Ms. Schmid, thank you. That's the only question		
20		that I had. Your submission otherwise is very clear.	14:	
21	THE	CHAIR: Thank you, Mr. Kennedy.		
22		Mr. Graham, did you have any questions?		
23	MR.	GRAHAM: No, I think everything I've got		
24		down here is already covered. Thank you, Mr. Chair.		
25	THE	CHAIR: Ms. Stuart?		

177

M. SCHMID

Ī

Questioned by Ms. Roberts

1	MS.	STUART: Thanks, Mr. Chair.	
2		Ms. Schmid, thanks so much for presenting today,	
3		and I have no questions for you.	
4	THE	CHAIR: Thank you. Ms. Roberts?	
5	MS.	ROBERTS: I have a question for Ms. Schmid.	
6	<u>MS.</u>	ROBERTS QUESTIONS THE WITNESS:	
7	Q.	You had commented that you had concerns about	
8		compliance regarding air quality, and the question that	
9		I have is, is there anything specific you had in mind	
10		that you believe the NRCB needs to do with regard to	14:44
11		that or or consideration of it?	
12	Α.	I think maybe where my concerns come from, and I'm not	
13		exactly sure how it would look moving forward, but	
14		like, environment is constantly monitoring the air	
15		quality, and where I'm concerned about is, like, the	
16		ammonia and the other elements that enter the air	
17		contaminate or pollute it, and I'm more concerned about	
18		at what point is that air quality coming out of those	
19		barns detrimental to a health exacerbation, but I'm not	
20		sure who would follow that or what that would look	14:44
21		like.	
22		But it's kind of sad to hear that, even through	
23		all of this, that was never considered because we are	
24		downwind, we do have a child that has respiratory	
25		issues and on days when the odour is bad, I mean she is	

M. SCHMID

178

Questioned by Ms. Roberts

1		bad. So my question is, what about air quality?	
2		Should I have done more about that? Probably. I just	
3		didn't know.	
4		So I just wanted to know how do you monitor that,	
5		how do you make that better because we're not the only	
6		people that's going to impact because 50 years from	
7		now, what's the population going to look like?	
8	Q.	Okay. So if I get this right, then, you don't have any	
9		specific parameters or anything like that that you're	
10		looking for. What you're looking for, really, is an	14:45
11		explanation of how this is considered for CFOs. Would	
12		that be fair?	
13	Α.	Yes.	
14	Q.	Okay. Thank you.	
15	MS.	ROBERTS: That's all, Mr. Chair.	
16	THE	CHAIR: And thank you, Ms. Roberts.	
17		Thank you, Ms. Schmid. I have no further	
18		questions, but on behalf of the Panel, I appreciate	
19		your participation at the hearing and you stepping up.	
20		So thank you very much.	14:46
21		Did you have based on the questions that you	
22		did get, though, did you have anything to redirect to	
23		the panel?	
24	Α.	I don't know if it counts as a redirect, but moving	
25		forward for any other confined feeding operation, would	

AMICUS REPORTING GROUP - A Veritext Company

A. BEDSTER

they consider air quality and how that impacts 1 2 surrounding communities and neighbours. THE CHAIR: 3 Okay. Thank you. 4 (WITNESS STANDS DOWN) THE CHAIR: 5 Mr. and Mrs. Bedster, did you have 6 any direct evidence that you would like to contribute, 7 and if so, we'll have you sworn or affirmed. MR. BEDSTER: Well, just one comment to make, 8 9 though. THE CHAIR: Just before you do. If you're 10 14:46 11 going to comment, you're more than welcome to. We're 12 inviting you to do that, but let's have you either 13 sworn in or affirmed first. 14 15 A. BEDSTER (In their own stead), affirmed THE CHAIR: 16 Mrs. Bedster, had you planned 17 on --18 MS. BEDSTER: No, that's fine, thanks. I'm just 19 agreeing with what I'm hearing. Finding it very 20 interesting. 14:47 THE CHAIR: 21 Thank you very much. 22 Mr. Bedster, please proceed. 23 Α. Well, we've been there 42 years now where we live. We 24 live down approximately 2 miles south of a dairy farm 25 and there was never a time that -- there was 80 head of

A. BEDSTER Cross-examined by Mr. Van't Land

H				न
1		cattle they milked	d. So you've got a fair amount of	
2		manure, but where	we're at now, over the last, I don't	
3		know for sure, I'm	n going to say 15 to 20 years there's	
4	some days, some nights you don't open your windows, you			
5	don't open your doors because if you open your windows			
6	and doors, it smells like manure.			
7	So that's my along with what Mrs. Schmid said,			
8	it's quite pungent sometimes. Whether it's cattle,			
9	chickens, or horses or cows, it's definitely		es or cows, it's definitely	
10		somewhat well,	it is a problem out there.	1
11		I guess that	's about all I have to comment on.	
12	THE	CHAIR:	Okay. Well, thank you,	
13		Mr. Bedster.		
14	Α.	You're welcome.		
15	THE	CHAIR:	Are there any questions from	
16		Ms. Janzen?		
17	MS.	JANZEN:	No, I have no questions.	
18	THE	CHAIR:	Ms. Horvath?	
19	MS.	HORVATH :	I have no questions.	
20	THE	CHAIR:	Thank you. Ms. Schmid?	1
21	MS.	SCHMID:	No questions.	
22	THE	CHAIR:	And Mr. Clifton?	
23	MR.	CLIFTON:	No questions.	
24	THE	CHAIR:	Mr. Van't Land.	
25	<u>MR.</u>	VAN'T LAND CROSS-E	XAMINES THE WITNESS:	

A. BEDSTER Cross-examined by Mr. Van't Land

11			11
1	Q.	Again, just a clarification. I've been down wind of	
2		a strong wind as well, and I'm also not a fan. But I	
3		was wondering if Mr. Bedster was able to take note.	
4		Normally when people are spreading manure, it's pretty	
5		obvious who's spreading where. And on the times when	
6		he found it particularly bad, if he noted where that	
7		smell was coming from?	
8		Given where he's at, I'm willing to bet that it's	
9		probably feedlot manure, and I do know that Matt is	
10		pretty diligent about turning it in to deal with the	14:49
11		odour.	
12		But at any rate, just to clarify whether we're	
13		responsible for that smell or not, I was wondering if	
14		he has been able to document when he's noticed that	
15		it's particularly bad?	
16	Α.	No, I have not documented, but you're partly right on	
17		that from the neighbour to the west of us. But there's	
18		also been times when there's a northwest wind, and it	
19		has been poultry. And it's definitely a different	
20		odour between cows and poultry.	14:50
21		So equal matters, equal things, they're both	
22		they're both on the table.	
23	Q.	Okay. I was just looking to clarify that. I have no	
24		further questions.	
25	THE	CHAIR: Thank you, Mr. Van't Land.	

181

Ms. Vance?		
S. VANCE:	No, I have no questions.	
HE CHAIR:	Thank you.	
Mr. Kennedy?		
R. KENNEDY:	I have no questions either. Thank	
you.		
HE CHAIR:	Ms. Stuart?	
S. STUART:	I have no questions, thank you.	
HE CHAIR:	Ms. Roberts?	
S. ROBERTS:	I have no questions, Mr. Chair.	14:
HE CHAIR:	Mr. Graham?	
R. GRAHAM:	No questions, Mr. Chair, thank	
you.		
HE CHAIR:	Thank you, Mr. Bedster. We really	
appreciate your parti	icipation. I have no questions.	
Did you have anything	g to redirect?	
. No, not at this time.		
HE CHAIR:	0kay. Thank you.	
VITNESS STANDS DOWN)		
HE CHAIR:	Mr. Clifton, were you going to	14:
make a submission or	provide any direct evidence today?	
R. CLIFTON:	Yes.	
HE CHAIR:	Okay. Thank you. Ms. Vespa.	
<u>. CLIFTON</u> (In their own	stead), affirmed	
	R. KENNEDY: you. HE CHAIR: S. STUART: HE CHAIR: CHAIR: CHAIR: CHAIR: you. HE CHAIR: appreciate your parti Did you have anything No, not at this time. HE CHAIR: VITNESS STANDS DOWN) HE CHAIR: make a submission or R. CLIFTON: HE CHAIR:	 R. KENNEDY: I have no questions either. Thank you. HE CHAIR: Ms. Stuart? S. STUART: I have no questions, thank you. HE CHAIR: Ms. Roberts? S. ROBERTS: I have no questions, Mr. Chair. HE CHAIR: Mr. Graham? R. GRAHAM: No questions, Mr. Chair, thank you. HE CHAIR: Thank you, Mr. Bedster. We really appreciate your participation. I have no questions. Did you have anything to redirect? No, not at this time. HE CHAIR: Okay. Thank you. NITNESS STANDS DOWN) HE CHAIR: Mr. Clifton, were you going to make a submission or provide any direct evidence today? R. CLIFTON: Yes.

THE CHAIR: And I do notice your voice is a
bit softer. So if the mic is closer, if you could
speak towards the camera if that's where the mic is,
that would be great. Thanks.
A. A lot of the stuff that I had we kind of touched on a
little bit here with the swales and the drainage.
I do have that letter from or that email from
Logan Huscroft saying that I do have an open file with
them concerning this matter. How that goes, I guess
we'll see and see what compliance we get.
The other concern with that is any manure that is
spread on the land and not incorporated can come with
that runoff on wet years. So that's all contaminated
and eventually goes to the Old Man River which is only
a mile and a half away.
Another thing we should touch on is the no-till
farming. Being that we are in the rural urban fringe
or the MDP, whatever you want to call it there, in
consideration for the neighbours for the odour. I
don't know why we can't incorporate this rule. He's
stated that he has no intent to do it, so there is no
regard for the neighbours. It's more, I guess, looking
out for himself.
I've also touched on the reduced land value. I
have a dry corner which would be in the southwest

4:52

4:53

<u> </u>		1
1	corner of my property directly across the highway from	
2	these barns, a 5-1/2 acre dry corner that I can	
3	subdivide out. It has city water, it has gas, it has	
4	power, everything there. But how can I effectively	
5	market that when it's directly downwind from a 120,000	
6	bird operation?	
7	The quality of life is also down. The odour at	
8	times is so bad, you can't go out and enjoy a night in	
9	the hot tub. You can't have guests over on the deck.	
10	It's bad.	14
11	Chicken manure is probably right up there with pig	
12	manure. It's one of the most potent manures there are.	
13	It has its it's very high in ammonia. It's not a	
14	pleasant smell.	
15	We don't have air conditioning in our house. We	
16	can't open our windows at night to cool off when it's	
17	30 degrees in the summer. You open the windows, your	
18	house smells like manure. Your clothes smell like	
19	manure. There's really nothing you can do to get away	
20	from it.	14
21	The other thing I was going to ask too was what is	
22	the life expectancy of the barns; we've kind of touched	
23	on that already: 50 years approximately-ish. What's	
24	the development like or going to be like in our area in	
25	that time? Like are they wasting their money now	
		1

AMICUS REPORTING GROUP - A Veritext Company

4:54

4:55

Ī

185

Ш				
	1		trying to build these barns just to have them be	
	2		commissioned or have you know, be down this same	
	3		road again? I don't know.	
	4		What what impacts to the directly affected	
	5		neighbours are going to be reduced if this goes ahead?	
	6		Like, there's already impacts from the existing	
	7		operation. What's going to be done to the existing	
	8		operation to bring it up to modern because it's already	
	9		30 years old or 25 years old or whatever it is. So	
	10		what's going to be done to that to help these impacts?	14:56
	11		Is he going to be compliant with his manure spreading,	
	12		his farming practices, everything, to help improve	
	13		these impacts?	
	14		I've included some pictures; we've seen the swales	
	15		there. But if you go, I don't know which one the	
	16		submissions is there. Exhibit Number 20. If you can	
	17		pull up the pictures on that, please.	
	18	THE	CHAIR: Is this the correct picture,	
	19		Mr. Clifton?	
	20	Α.	Yeah, that's the first picture. That is the area	14:57
	21		directly west of Double H's existing barns. So this	
	22		was after a big rain, I believe 2011-ish; I'm not	
	23		100 percent sure on the year. This was prior to those	
	24		swales being dug.	
	25		So now any manure spread on the land all closed	
1				

	1	1
1	into this water. So now that these swales drainage is	
2	dug, all flows basically towards us which would be	
3	heading north, this picture is taken from Kipp Road	
4	looking south, now that comes to their where the	
5	swale ends right at the county ditch and flows east	
6	towards Highway 25.	
7	So if we scroll down to the next picture or the	
8	next three pictures, that is Highway 25 looking	
9	directly east towards my place. This shows the ditch	
10	full of water and it backing up onto my land.	14:
11	The next picture kind of shows a bigger, broader	
12	angle of how full the ditch is and how much it backs up	
13	into me. These were all prior to the work that was	
14	done on Double H's land. So this is kind of what I got	
15	already, but now that that whole quarter is being	
16	drained, it all comes to me.	
17	Now I get even more. It hasn't happened yet, but	
18	it will. I don't know when, but how much is that going	
19	to affect me then?	
20	I guess, you know, what comes with the water,	14:
21	what's in that manure? We don't know.	
22	So I don't know like as medication that's in	
23	the manure or anything, whatever, cleaning agents that	
24	they use in the barn, I don't know what's all there.	
25	And then the third picture is kind of another	

AMICUS REPORTING GROUP - A Veritext Company

l:58

l:59

1				1
1		better angle kind of	looking southwest. You can kind	
2		of see how it backs	up there.	
3		We've already t	ouched on the letter from	
4		Logan Huscroft that	he has been out. He does see a	
5		compliance issue wit	h it all, and it will be looked at.	
6		Another thing I	want to talk about was the manure	
7		storage that would b	e on the northwest which I think	
8		we've kind of covere	d that already.	
9		I think I th	ink that's it.	
10	THE	CHAIR:	Well, thank you, Mr. Clifton.	15:00
11		Ms. Janzen, any	questions?	
12	MS.	JANZEN:	No. I don't have any	
13		questions.		
14	THE	CHAIR:	Ms. Horvath?	
15	MS.	HORVATH:	I don't have any questions.	
16	THE	CHAIR:	Ms. Schmid?	
17	MS.	SCHMID:	I don't have any questions.	
18	THE	CHAIR:	Or Mr. and Mrs. Bedster?	
19	MR.	BEDSTER :	No questions.	
20	THE	CHAIR:	Thank you.	15:00
21		Mr. Van't Land?		
22	MR.	VAN'T LAND:	I have no questions.	
23	THE	CHAIR:	Ms. Vance?	
24	MS.	VANCE :	I have no questions either, thank	
25		you.		

188

B. CLIFTON

Ī

Questioned by Mr. Kennedy

1	THE	CHAIR: Thank you.	
2		Mr. Kennedy?	
3	<u>MR.</u>	KENNEDY QUESTIONS THE WITNESS:	
4	Q.	Yeah, I have one, and it's going to sound like a	
5		strange question, Mr. Clifton. But those photos that	
6		you showed that are in your Exhibit, did you say they	
7		were from 2011?	
8	Α.	I believe that is the year. The camera didn't have a	
9		date stamp, so I'm not a hundred percent sure on the	
10		year. That was one of the years that I know we had the	15:01
11		big rain and this happened, but I can't be a	
12		hundred percent sure of the year.	
13	Q.	And you took those pictures to document what?	
14	Α.	It was just a random just to show all the water.	
15	Q.	Oh, okay.	
16	Α.	Because I've had issues kind of in the past with the	
17		flooding there, and it was just random luck that I	
18		actually had this picture to show how much flooding he	
19		had on his land.	
20	Q.	And so you talk about, you know, the swale construction	15:01
21		and drainage construction that's taken place I think	
22		more recently. Is that fair?	
23	Α.	The swales were dug within the last two to three years.	
24	Q.	I think we heard from Mr. Van't Land that it was a	
25		couple of years ago perhaps?	

Questioned by Mr. Kennedy

1	Α.	Yeah.	
2	Q.	But you had issues with the standing water or the	
3		accumulating water 11 years ago, and what were you	
4		attributing that to?	
5	Α.	The natural drain where it goes through the	
6		southwest I don't know what the actual is, to the	
7		northeast of us, what was that location, the	
8		southwest 26 where he states that the water runs	
9		through, can't handle that much water at once.	
10	Q.	Right.	15:02
11	Α.	So that is the way it goes, but because it can't handle	
12		it, it backs up the county ditch and uses me kind of as	
13		a holding pond, I guess, until it can eventually flow	
14		through.	
15	Q.	But none do I take it none of those photos were	
16		actually of your land?	
17	Α.	The ones I submitted there?	
18	Q.	Yes.	
19	Α.	The last three are of my land that shows how it backs	
20		up the ditch and then floods onto me.	15:03
21	Q.	Thank you. Those are my questions.	
22		I'm sorry, from your home, you don't own the land	
23		north of the Kipp Highway?	
24	Α.	No. I am I'm directly east of Double H.	
25	Q.	Right. Okay. Halfway through that quarter section?	

 			
1	Α.	I've got the whole quarter there.	
2	Q.	Yeah, I'm sorry, your home is halfway through	n the
3		quarter?	
4	Α.	Yeah, the home is yeah, a quarter mile eas	st of
5		Highway 25.	
6	Q.	Got it. Okay. Thank you. Those are my ques	stions.
7		Appreciate the responses.	
8	THE	E CHAIR: Thank you, Mr. Kennedy.	
9		Mr. Graham, do you have any questions?	
10	MR.	. GRAHAM: No questions at this tim	ne. Thank 1
11		you, Mr. Chair.	
12	THE	E CHAIR: Ms. Stuart?	
13	MS.	. STUART: No, Mr. Chair, I have no)
14		questions. Thank you.	
15	THE	E CHAIR: And Ms. Roberts?	
16	MS.	. ROBERTS: I have just one question	n for
17		Mr. Clifton.	
18	<u>MS.</u>	. ROBERTS QUESTIONS THE WITNESS:	
19	Q.	In your verbal submission, Mr. Clifton, you m	mentioned
20		reduced quality of life, and you specifically	/ mentioned 1
21		odour concerns. Was there were there any	other
22		items that might that are concerns of your	rs that
23		would fit under reduced quality of life, or	is it
24		primarily odour?	
25	Α.	It's primarily the odour, yes.	

i			퀴
1	Q.	Okay. Thank you.	
2	MS.	ROBERTS: That's all, Mr. Chair.	
3	THE	CHAIR: Okay. Thank you.	
4	THE	CHAIR QUESTIONS THE WITNESS:	
5	Q.	Mr. Clifton, just a couple of quick questions. You	
6		have been, from your submission, obviously in contact	
7		with Alberta Environment. So you are clear that it is,	
8		in terms of surface water flows and activity in terms	
9		of altering surface water on the land as opposed to	
10		just the CFO site itself, is the responsibility of	15:05
11		Alberta Environment and Parks? Is that	
12	Α.	Yeah, I'm aware of that. But I was also informed that	
13		any manure that could be on the land that comes with	
14		that water is an NRCB issue.	
15	Q.	Exactly right. That was going to be my question if you	
16		were aware of that. Right, so thank you.	
17	Α.	Yeah.	
18	Q.	So, thank you very much. Those are the questions that	
19		I have.	
20		Did you have anything that you wanted to redirect	15:05
21		to us based on the questions?	
22	Α.	Not that I can think of at the moment.	
23	THE	CHAIR: Thank you very much and really	
24		appreciate your participation today. Thank you.	
25	(WI	TNESS STANDS DOWN)	

Questioned by The Chair

i		1
1	THE CHAIR: We've got rebuttal evidence from	
2	Mr. Van't Land, and Mr. Van't Land, question to you, do	
3	you have rebuttal evidence and, if you do, how long do	
4	you think it would take you?	
5	MR. VAN'T LAND: I have a number of points that I	
6	would like to clarify through. I can't see it taking	
7	longer than 10 or 15 minutes.	
8	THE CHAIR: But then we do have also we	
9	have closing arguments, an opportunity for everyone to	
10	have closing arguments.	15:0
11	I'm just wondering I think we're going to be	
12	fine on time by the looks of things, so I really	
13	appreciate everybody being clear and succinct	
14	throughout the day, so thank you very much.	
15	Well, let's just take a quick ten-minute break	
16	until 3:15 and return, and I think we're still going to	
17	be fine for time.	
18	So if we could just break until 3:15 and come back	
19	and wrap it up. Thank you very much.	
20	(ADJOURNMENT)	15:0
21	THE CHAIR: Welcome back, everyone. The	
22	question is do we have everyone? We do. We're just	
23	waiting for Lethbridge boardroom, the neighbours.	
24	There we go. Perfect.	
25	Everybody can hear me? We're good? Okay.	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by The Chair

1

1	Thank you.	
2	Okay. Mr. Van't Land, just to remind you and	
3	confirm that you're still under oath. I think you were	
4	affirmed but you're still under oath, so with that	
5	understanding, let's proceed please.	
6		
7	<u>S. VAN'T LAND</u> (For Double H Feeders), previously affirmed	
8	A. Okay. I wanted to take this opportunity just to go	
9	through some of the questions that have come up and	
10	perhaps some misunderstanding or, again, just	15:19
11	clarifications.	
12	Top of my list is the question regarding equipment	
13	modernization.	
14	MS. FRIEND: Excuse me, I'm sorry to interrupt	
15	but, Peter, Sandi just texted me and she lost her	
16	connection. So she's asking, Mak, if you're online,	
17	could you send Sandi another email invite to her home	
18	email, please.	
19	THE CHAIR: Or just if you can I think you	
20	can just invite her as well, Mak, by the participants.	15:20
21	Just invite them, might be quicker.	
22	MR. ELHAKIM: Yes, I'm on it.	
23	THE CHAIR: Thank you. Appreciate it.	
24	Thanks, Laura.	
25	A. Am I free to continue?	

Questioned by The Chair

<u> </u>				
1	THE	CHAIR:	Let's just wait one minute. If we	
2		needed to, Sandi coul	d catch up on transcripts, but it	
3		might be easier to ju	ust see if it will be short term or	
4		long term and then we	e'll move on.	
5	MR.	ELHAKIM:	She should be in shortly.	
6	THE	CHAIR:	She thinks it's going to work	
7		relatively quickly, c	otherwise I'm not sure how that	
8		dial-in works. Maybe	e we can just get her to dial in.	
9	MR.	ELHAKIM:	If she wants.	
10	THE	CHAIR:	It's pretty tough to understand	15:22
11		you, Mak. It's sort	of like you're in this forever	
12		echo for some reason.		
13	MR.	ELHAKIM:	Sorry about that. Yeah, I sent	
14		her the invitation, b	out she should be in shortly.	
15	THE	CHAIR:	Okay. Thank you.	
16	MR.	ELHAKIM:	You're welcome.	
17	THE	CHAIR:	Mak?	
18	MR.	ELHAKIM:	Yes.	
19	THE	CHAIR:	Sandi has asked she doesn't see	
20		another invite. She	said she needs an invite. Did you	15:23
21		send that?		
22	MR.	ELHAKIM:	Yes, I did. Is her email	
23		ssroberts?		
24	MS.	FRIEND:	Yes. If you could send it to the	
25		one with the number i	n it.	

Ī

Questioned by The Chair

1

1	MR.	ELHAKIM: Yes. 857	
2	MS.	FRIEND: Yeah, exactly. We don't want to	
3		give it out, but	
4	MR.	KENNEDY: I was going to suggest in a pinch,	
5		because there is a period of time before that it	
6		would Ms. Roberts would be asking questions, she	
7		could watch the YouTube channel and that feed and then	
8		come in later.	
9	THE	CHAIR: I'll let her know that and when	
10		she comes in she comes in. Let's do that. Or, Laura,	15:24
11		could you phone Sandi on her cell she's been	
12		answering and just let her know to maybe do that on	
13		the YouTube, and then she can catch up when she gets	
14		brought in so we can keep rolling.	
15	MS.	FRIEND: Yes.	
16	THE	CHAIR: Thank you.	
17		Okay, Mr. Van't Land, sorry about that. First	
18		glitch of the day, wouldn't you know it. So please	
19		proceed.	
20	Α.	If that's the worst thing that happens today, it's	15:24
21		still a good day.	
22		A number of questions came up throughout the	
23		conversations today that I wanted to just clarify and	
24		maybe provide some light on. There was some concern	
25		over the equipment modernization versus bringing	

196

Questioned by The Chair

equipment over from the old barns. 1 There's some aspects of a chicken barn that are 2 3 night and day different from 20 years ago and some that 4 haven't changed a bit. Computer systems that are 5 running ventilation, and vents and fan design have 6 improved greatly over the years. 7 If I buy a brand-new feed pan today, it is indistinguishable from the one that I bought 20 years 8 9 ago. So things like feed pans, drinkers, those types of things we're planning to bring over and repurpose 10 11 where we can. Things like fans and vents and lighting, 12 those things are all going to be selected -- selected 13 new. 14 There's been a fair bit of comment about manure 15 storage and operation decommission and specifically 16 what that means. And sometimes I feel like -- I want 17 to be clear that I wasn't trying to deceive anybody 18 when I was talking to either the town or the county or anyone else for that matter. 19 20 In my mind, manure storage is a separate issue 21 from where we're raising the birds. So I apologize if 22 that was unclear. And I just wanted to make the point 23 that, on northwest we have a fair number of neighbours 24 in close proximity to our operation there, and we have 25 stored the manure in different places over the years.

15:25

15:25

197

Questioned by The Chair

1	And in communication with those neighbours, and	
2	out of deference to them and their preferences, we have	
3	kind of stored the manure to where it seems to be the	
4	least nuisance to anybody in the neighbourhood.	
5	We try to maintain good relations with our	
6	neighbours and we've been working with them, and there	
7	have been multiple times when we had selected a spot	
8	and they found that to be a nuisance so we selected a	
9	different spot, and we've done that a couple of times	
10	and we've landed where we are.	15:26
11	So it's not a case of trying to end-run around any	
12	kind of a rule; it's more a case of trying to	
13	be just try to be yeah, maintain good relations	
14	with our nearest neighbours who are close to that	
15	operation.	
16	There was some concern about the level of ammonia	
17	that comes from the barns and that might be sifted	
18	downwind. Part of the permit that we have or permit	
19	is perhaps the wrong word the authorization we have	
20	from the Alberta Chicken Producers to be able to grow	15:26
21	birds is we have to sustain an audit every year for the	
22	On-Farm Food Safety Assurance Program and Animal Care	
23	Program that works inside of that.	
24	What goes alongside those two programs, one of the	
25	things we monitor in the barn is ammonia levels, and	

198

Questioned by The Chair

		Ī
1	one of the goals of the ventilation system is to keep	
2	that ammonia down to a healthy level for both the birds	
3	and the people that are in the barns.	
4	So I just wanted to say that that is something	
5	that we monitor and keep down deliberately. It's	
6	mostly for the health of the birds, but the side effect	
7	of that is there is not large amounts of ammonia coming	
8	out of the barn.	
9	I think back to Coalhurst. I don't know how good	
10	people's memories are, but I can remember the chicken	15:
11	barns. There was a friend of my dad had chicken barns	
12	right across from the community centre and where the	
13	current gas station is. There used to be chicken barns	
14	there, and those are things that we keep in mind when	
15	we are looking at moving our existing our existing	
16	operation away from the town. We've been	
17	Since I've been involved with the farm, it's been	
18	coffee talk quite often as to how long it's going to	
19	take for Lethbridge or Coalhurst to get to us, and if	
20	the last 20 years is any indication that, in 50 years,	15:
21	they still won't be here.	
22	But regardless of that fact, in the event that	
23	development does pick up to a pace where the character	
24	of the neighbourhood changes, what also happens then is	
25	the prices for land also change and then there's an	

27

Ī

199

Questioned by The Chair

1	incentive. If it becomes a point where development is	
2	so dense that it's no longer a viable option to run a	
3	poultry operation, then typically land values would	
4	increase and we'd be, from that point on, better off to	
5	trade up to an area further away, expand our acres and	
6	perhaps take the opportunity to expand the operation.	
7	But in the short term, we try to build things as well	
8	as we can, and take care of them, and run with them	
9	accordingly.	
10	Bryan had shown a number of pictures. If the	1
11	document handlers could bring up Document Number 20. I	
12	think it was picture number on page 2 is the one	
13	that I'm particularly interested in.	
14	That picture there shows he's exactly right,	
15	that's our field. You're standing on the Kipp Highway	
16	looking south, seeing the water accumulate, and what	
17	you see there is that the water is accumulating away	
18	from the road ditch. The prevailing land there, the	
19	water the land doesn't flow into the ditch until	
20	there's a volume of water just because of the lay of	1
21	the land, and we have not touched the level of the	
22	culvert or the final drain into the road ditch.	
23	So we have run a swale down the middle of that	
24	piece, and it's precisely because of pictures like this	
25	where if we can take that pond that's several hundred	

15:29

15:29

Questioned by The Chair

1		feet wide, and if we can get it down to a fraction of	
2		that size and essentially store the water until it	
3		dissipates naturally, that has been the goal from the	
4		start of this improvement.	
5		So I just wanted to highlight that.	
6		That essentially covers the points that I wanted	
7		to come around back to. So it's one of those days	
8		where I think I've said everything three times and I'm	
9		not sure if I've necessarily covered everything, but	
10		that is the end of my presentation for the moment.	15:30
11		So I submit the floor for the next step in the	
12		process.	
13	THE	CHAIR: Okay. Sorry, did I just missed	
14		the last couple of sentences there. Did everybody	
15		freeze or is it just my computer perhaps? Everybody	
16		froze?	
17		Sorry, I think what I got, Mr. Van't Land, is	
18		you're completed, you're complete with your rebuttal	
19		evidence, you're good and you're ready for questions;	
20		do I have that right?	15:31
21	Α.	I think so, yeah. The last thing I said of note was	
22		talking about the picture that Bryan had submitted. So	
23		if that came through clear, then, yes, I'm ready to	
24		move on.	
25	THE	CHAIR: Okay.	

S. VAN'T LAND Ms. Schmid cross-examined the witness

Ms. Friend, do we have an update on Ms. Roberts? 1 2 MS. FRIEND: Sandi isn't connected yet. No. 3 We're going to try another email address, so it will still be another few minutes. 4 Okay. So we'll start with -- I 5 THE CHAIR: 6 mean, there's a list ahead of --7 MS. FRIEND: She's watching on YouTube. THE CHAIR: Okay. And if necessary, she 8 9 texted a question -- it's a little awkward, but if she has a question, she can text that in if we need to, 10 15:31 11 just to make this work, so. Okay, thank you. 12 So, Ms. Janzen, do you have any follow-up questions for Mr. Van't Land based on his rebuttal? 13 MS. JANZEN: 14 No, I don't have any other 15 questions. THE CHAIR: Ms. Horvath? 16 17 MS. HORVATH: No, I don't have any questions. 18 THE CHAIR: I'm not sure whose -- I don't 19 think that's my computer, but it's coming through 20 somewhere. Is everybody hearing that dinging 15:32 21 happening? Okay, thanks. Ms. Schmid? 22 23 MS. SCHMID: Hello. Yes, and I don't even need 24 a minute. 25 THE CHAIR: Okay, perfect. Go ahead.

Cross-examined by Ms. Schmid

			1
1	<u>MS.</u>	SCHMID CROSS-EXAMINES THE WITNESS:	
2	Q.	Okay. So my questions are just for some clarification	
3		for Scott when he had mentioned about the odour and his	
4		surrounding neighbours and how they just didn't have	
5		any concerns about it, and if they did, he was willing	
6		to work with them. And I just wanted to know if those	
7		neighbours are downwind from the storage and what	
8		that maybe why there's not so much concern about it?	
9	Α.	I would comment that those neighbours are they're	
10		bordering our field very closely, and if they have	15:32
11		concerns, we work with them.	
12		And it to be honest, you've never raised a	
13		concern with me, so I've never had a chance to address	
14		it. So that's the other side of it.	
15	Q.	I just wanted to know, though, if they were downwind	
16		from the storage?	
17	Α.	Some are, yes.	
18	Q.	My next point that I would like clarification on. When	
19		you talk about animal welfare and ammonia levels in the	
20		barn, you have to keep that at a certain level. And I	15:33
21		can appreciate that. But by keeping that ammonia level	
22		down, does that increase what's being put out through	
23		the fans into the environment and then going back to	
24		the air quality?	
25	Α.	Not really because, in keeping the ammonia level down,	

Ī

Cross-examined by Ms. Schmid

1

1	the reality is that what we're actually managing is the	
2	moisture level, and it's the interaction of the	
3	moisture and the manure and the microbes that generates	
4	the ammonia.	
5	And in keeping the density of the ammonia down in	
6	the barn, the air coming out of the barn is obviously	
7	not going to be any more of a of a concentration of	
8	ammonia than what's in the barn.	
9	So as that goes out and dissipates into the	
10	general environment, then the further downwind you	15:34
11	get, the less of a concentration there is also.	
12	Q. Thank you. Those are my questions.	
13	THE CHAIR: Thank you, Ms. Schmid.	
14	Mr. and Mrs. Bedster?	
15	MR. BEDSTER: I guess not. I just we talked	
16	about the ammonia. All I can tell you is I know people	
17	that worked in barns for years on a colony, especially	
18	on pigs, and they kept the ammonia down there, but the	
19	gentleman damn near died.	
20	They had to be taken out of the barns and, you	15:34
21	know, do a different chore on the colony as per se.	
22	But the amount of ammonia that was in there, I guess	
23	for some reason, the limits got out of control or	
24	whatever, but his being there all the time did really	
25	affect the gentleman.	
		0

Cross-examined by Mr. Clifton

٦

1	THE	CHAIR:	Okay. So there was not really a	
2		question for		
3	MR.	BEDSTER :	No.	
4	THE	CHAIR:	Mr. Van't Land. Okay, thank	
5		you.		
6		Mr. Clifton.		
7	<u>MR.</u>	CLIFTON CROSS-EXAMINE	S THE WITNESS:	
8	Q.	I just wanted to tou	ch on that picture that he brought	
9		up there with the	west of his barns. That was taken	
10		before the swales we	re down.	15:35
11	THE	CHAIR:	Did you want that posted? Oh,	
12		here we go. Okay, t	hank you.	
13	Q.	MR. CLIFTON:	Yeah. So he said that the swales	
14		were there, there's	a gravel dispersion pit by the	
15		road.		
16		So now how big	is that gravel dispersion pit?	
17		Like, will it handle	all this water to disperse it out,	
18		or is it just going	to go up and over that and down the	
19		county ditch? Becau	se this picture was taken prior to	
20		all that being dug.	So now that's just all extra water	15:36
21		now?		
22	Α.	There is a point whe	re, if there's so much water, it	
23		really doesn't matte	r what you do; it's going to flow.	
24		The nature of t	he dispersion pit is, because it's	
25		below the level of t	he culvert, the idea is that it	

204

Γ

Cross-examined by Mr. Clifton

1	decreases the surface area where the water come in and	
2	the tile can engage the surrounding ground and slowly	
3	seep into the ground and away through groundwater	
4	mitigation, the way it does now, the way this water	
5	disappeared. Because I can tell you that pond was	
6	there a long time, and it didn't run anywhere. It goes	
7	down. And yeah, once the water goes down, I'm not an	
8	expert to tell you what happens to it after that.	
9	But I can say too, and I don't know if it's	
10	relevant to some of the memories you're maybe having is	
11	the culvert underneath my driveway where this water or	
12	anything over a certain level would run, when they	
13	improved the Kipp Highway, it could be 40 years ago,	
14	when they ran the new irrigation or the new telephone	
15	line, they plowed through that culvert. And that was a	
16	point of concern for us for many, many years. We could	
17	never quite figure out why that water would never move	
18	because we'd have a pond on one side and be dry on the	
19	other.	
20	And the County did replace that culvert, I'm	
21	trying to think, we couldn't come up with a date, and	

trying to think, we couldn't come up with a date, and it could have been around 15 years ago. It would have probably been before this. But if the perception of water flow has changed since then, then that might be the case why that might be. And that is something

22

23

24

25

15:36

15:37

Cross-examined by Mr. Clifton

1		that replacing that culvert with a proper culvert,	
2		functioning culvert was something that essentially	
3		restored the natural water flow instead of altering it.	
4		All these swales and work that we've done hasn't	
5		changed direction of water or the volume of water that	
6		moves; it simply tries to manage the amount of	
7		cross-section of field that it damages before	
8		it before it moves.	
9	Q.	So what you're saying is that, in this picture, for	
10		instance, this water here, wouldn't go down the county 1	15:38
11		ditch if there was a swale dug?	
12	Α.	No, because we never touched the height of the culvert.	
13	Q.	The culvert is level with the ground at the county	
14		ditch, though, so the swale being dug brings this	
15		water	
16	Α.	I spent a lot of time with a laser out there two years	
17		ago, and our low spot adjacent to that is probably	
18		about six inches below that culvert.	
19	Q.	No further questions.	
20	THE	CHAIR: Okay. Thank you, Mr. Clifton. 1	15:38
21		Ms. Vance?	
22	MS.	VANCE: I have no questions, thank you.	
23	THE	CHAIR: Thank you.	
24		Mr. Kennedy.	
25	MR.	KENNEDY: Yeah, I have a couple of	

Questioned by Mr. Kennedy

1		questions.	
2	<u>MR.</u>	KENNEDY QUESTIONS THE WITNESS:	
3	Q.	And, again, Mr. Van't Land, it's to deal with the	
4		northwest quarter and manure storage on that.	
5		So you mentioned, you know, your relationship with	
6		neighbours and your accommodating their concerns when	
7		you're storing manure. I assume that's with the	
8		temporary manure storage that you're storing there?	
9	Α.	Yes.	
10	Q.	Okay. And I assume that when you're having those	15:39
11		discussions with neighbours, it's because they they	
12		are troubled from time to time. Is that fair?	
13	Α.	Troubled, it we cross paths from time to time, and	
14		they you express a concern. And we do our best to	
15		work with them on that.	
16	Q.	Okay. And we've had this discussion elsewhere, and you	
17		know, it's the potential for an approval, and NRCB	
18		approvals under AOPA have no time limit.	
19		So whatever's if you should get an approval,	
20		there is no time limit. It may not be limited to 50	15:40
21		years; it's potentially forever.	
22		And I think it's probably a reasonable forecast to	
23		say what's around that northwest quarter will look a	
24		great deal different as each decade progresses. Is	
25		that a reasonable assumption?	

Questioned by Mr. Kennedy

			1
1	Α.	Your guess is as good as mine.	
2		It I would characterize that area as there's a	
3		lot of acreages, so a lot of it hinges on whether	
4		people choose to maintain them as acreages or pursue	
5		further development. It that's just the character	
6		of the area around that particular barn.	
7	Q.	But facing the same choices that you said at sometime	
8		you might face on the northeast quarter, the land	
9		values may dictate more densification?	
10	Α.	That is entirely possible.	15:41
11	Q.	Yeah. Okay. And you're saying that you have a desire	
12		to continue temporary storage on the northwest quarter.	
13		AOPA says you can do temporary storage and you get	
14		seven months, but only for every three years.	
15		How many months over a three-year period do you	
16		want to be able to store manure on the northwest	
17		quarter throughout anywhere on the northwest quarter?	
18	Α.	Our preference is during the summer months, before and	
19		after there's a crop on the field, we spread it	
20		straight out of the barn when we can. We haul it when	15:41
21		we can.	
22		It to be honest, every year is different.	
23		It that's that's not a simple question to answer.	
24	Q.	Well, you know, with the Board looking at a situation	
25		where, you know, if they say "approved	

AMICUS REPORTING GROUP - A Veritext Company

Questioned by Ms. Stuart

 			
1		notwithstanding," it's a now and forever decision, if	
2		they were to include a condition that would go at least	
3		in part to assessing future land conflicts, land use	
4		conflicts and say, "Yes, you can continue to use this	
5		as a temporary storage on the northeast quarter," but	
6		in total you might only be able to do that for only	
7		seven months for each three-year period, does that work	
8		for you?	
9	Α.	We can make it work.	
10	Q.	Okay. Mr. Van't Land, I appreciate those answers.	15:42
11	THE	CHAIR: Thanks, Mr. Kennedy.	
12		Ms. Roberts, welcome back. Now we're on a	
13		different screen, so I did see you. And are you still	
14		there?	
15	MS.	ROBERTS: I still am here, yay.	
16	THE	CHAIR: Okay, awesome, thanks. Please, do	
17		you have any questions?	
18	MS.	ROBERTS: No, I don't. Thank you,	
19		Mr. Chair.	
20	THE	CHAIR: Okay. Ms. Stuart.	15:42
21	MS.	STUART: Thanks, Mr. Chair. Just have one.	
22	<u>MS.</u>	STUART QUESTIONS THE WITNESS:	
23	Q.	I don't think we have to bring up the exhibit, but it	
24		is Exhibit 17, which is the IDP that Mr. Kennedy	
25		previously referred to, page 78, Section 4.1.5, which,	

Questioned by Ms. Stuart

			1
1		if the Board were to consider the IDP, talks about	
2		that, you know, the core of that particular issue, that	
3		permit holders may be allowed to expand operations if	
4		it is to upgrade and modernize demonstrating changes	
5		that will reduce negative impacts (odours) to the rural	
6		and urban residents.	
7		So Mr. Van't Land, my question to you is could you	
8		take this opportunity to clarify exactly for us what	
9		upgrading and modernizing steps you would take were the	
10		Board to overturn the approval officer's decision in	
11		terms of upgrading and modernizing and addressing odour	
12		concerns in the consolidation of your operation?	
13	Α.	I think the primary consideration we have as far as the	
14		modernization would be a case of taking the existing	
15		double-decker barns and rebuilding them as a more	
16		appropriate model that is used primarily in broiler	
17		production today.	
18		The primary concern we have there is the proximity	
19		to the town of Coalhurst and the number of neighbours	
20		that we have in close proximity to those barns. And a	
21		significant portion of our rationale for wanting to	
22		pursue this project is to take that production and move	
23		it away from the residential development that has gone	
24		on there, and depending what happens in the future, may	
25		continue to encroach upon that location.	
			1

15:43

15:44

Questioned by The Chair

1	I made reference to at least two sets of chicken
2	barns that I remember being what's now in the middle of
3	Coalhurst, and those were in the neighbourhood of 40
4	years ago. And that's why we're looking to move
5	outside before that becomes a reality and to make sure
6	that that production is in a place where it makes sense
7	to produce chickens.
8	It being on a quarter section, having sat down
9	and counted, I think there's ten subdivisions out of
10	that quarter section which indicates in the future, I $_{ m 1}$
11	mean there's the opportunity to have all kinds of
12	different development there that have nothing to do
13	with agriculture. Whereas on the adjacent quarter,
14	it's a whole quarter surrounded by more or less whole
15	quarters, and that's a more appropriate place to have
16	that kind of development.
17	Q. Okay. Thank you.
18	THE CHAIR: Thanks, Ms. Stuart.
19	Mr. Graham.
20	MR. GRAHAM: No questions at this time. Thank 1
21	you.
22	THE CHAIR: Mr. Van't Land, just a follow-up
23	to Ms. Stuart's question.
24	THE CHAIR QUESTIONS THE WITNESS:
25	Q. I think this is fair, but if not, you know, you can let

AMICUS REPORTING GROUP - A Veritext Company

Ī

Questioned by The Chair

1

1		me know.	
2		In terms of the IDP, in terms of modernizing, and	
3		you had it in parenthesis, as Ms. Stuart points out,	
4		you know, things like mitigating negative effects like	
5		odour. And that's we've heard that today; that's a	
6		big one. What would be your sense in terms of source	
7		of odour from storage versus spreading versus the	
8		continuous operation of the barn, in terms of severity,	
9		where would you rank those?	
10	Α.	I would say the least severe is storage. You take that	15:46
11		manure and pile it. As long as you don't disturb it,	
12		then it the perimeter of that pile dissipates fairly	
13		quickly.	
14		An ongoing concern is the barn, so I would say	
15		that is probably probably I guess the second level	
16		of nuisance would be the spreading of the manure	
17		because obviously you're taking that pile, disturbing	
18		it, spreading it over a wide area. We've never gotten	
19		a nuisance complaint over spreading.	
20		So I characterize I mean we have run a hog	15:46
21		operation and a cattle operation in the past, and when	
22		I compare the three manures, broiler manure is by far	
23		the least nuisance factor to it compared to the other	
24		two types of manure.	
25		And then the ongoing operation of the chicken	

Ī

Questioned by The Chair

1

1		barns, as I characterize it, the barns we have that	
2		we're looking to take down, we have neighbours that	
3		drive within 500 feet of those barns almost on a daily	
4		basis, and they're to be honest, they're surprised	
5		that they're active.	
6		So the nuisance factor of a running chicken barn,	
7		I would characterize that as low.	
8	Q.	And you're spreading manure currently I mean to meet	
9		AOPA guidelines presumably but on the northwest	
10		quarter?	15:47
11	Α.	There's some that gets spread on the northwest quarter.	
12		There's I think there's about 40 acres of the	
13		northwest quarter that has cropland that we that we	
14		currently operate on. And then there's the	
15		160 probably about 150 acres by the time you take	
16		the yard out on the northeast quarter.	
17	Q.	Are there other lands that you own closer to	
18		Coaldale [verbatim] that would be spread or stored?	
19	Α.	You mean Coalhurst but	
20	Q.	What did I say, sorry? Coalhurst, I'm sorry.	15:48
21	Α.	You're not the first one to make that mistake.	
22		This is this is the closest land we have to	
23		Coalhurst. We have two more parcels of land: There's	
24		one that's about three quarters of a mile north from us	
25		from my northeast quarter on Highway 25, and then	

there's another half section of land that's, I don't 1 2 know exactly, about 60 miles away kind of in the 3 northwest direction. THE CHAIR: Okay. Thank you. 4 Those are all 5 my questions. Thank you very much. Did you have any -- you had guite a few guestions 6 7 on your rebuttal. Did you have any redirect based on those questions or ... 8 9 Α. No. THE CHAIR: Thank you very much, and 10 Okay. 15:48 11 thanks for your participation today. 12 (WITNESS STANDS DOWN) THE CHAIR: We do have an opportunity for 13 14 everyone to provide a closing argument, and we'll have 15 you, Mr. Van't Land start. And then we'll have Field 16 Services, and I'll go through the order after that. 17 But you'll start, and then you do have an opportunity 18 for a reply at the end of it. 19 So take it away for now, and you'll -- as I say 20 you'll have an opportunity for a reply. 15:49 21 MR. VAN'T LAND: Okay. I just want to take the 22 opportunity to thank you and the rest of the Board for 23 hearing this rebuttal. My family has been running this farm here. 24 My 25 grandfather bought the northwest guarter in 1954, so

we've seen a lot of development here over the years. 1 2 We've had this parcel where I'm sitting on right now, 3 the northeast guarter, for at least the last 50 years, 4 and we're in it for the long haul. 5 My grandfather started it, then my dad, and now I'm here, and my son and my nephew are very much 6 7 becoming involved in the farm. So we're looking at this with a long horizon in mind. 8 9 With that, we're looking at being sustainable, we're looking at being responsible, and we want to do 10 11 things in such a way that we maintain good 12 relationships with the County, with the Town, with our 13 neighbours. We don't want to be a nuisance or to be 14 that neighbour that people wish wasn't there. 15 When we look at our northwest location, it's at a point where we have to spend a bunch of money on 16 17 something, as far as how that operation runs. And when 18 we look at our options, we thought that it would be 19 very advantageous. It seems to suit the intent as we 20 see it of the IDP, as far as future development, that 21 the broiler operation be moved further away from the

town of Coalhurst.

22

23 The northeast quarter is listed as primarily 24 agriculture. That semicircle of light industry 25 potential development, it seems obvious that there's

215

15:50

15:50

not an intent to have further residential development in this area but rather to go to more of an industrial side which we feel having a feedlot-type operation, intensive livestock operation is going to be more appropriate in this area.

Knowing that -- yeah, obviously I'm biased, but I mean I've run a hog farm, I've run a cattle farm, and I've run a chicken farm, and of the three, the nuisance factor of a broiler farm is far, far lower than the rest. And that is something that we take into consideration when we're planning.

I would encourage our neighbours that have concerns, when something ruffles them, like for crying out loud, let me know. It -- there's nothing I can do about a problem I don't see. And my perception at this point has been that there has not been a nuisance factor.

So if, in the future, when there is one, by all means let me know. And if there's something that we can do to mitigate that, we've done it for other neighbours, and we will definitely do it for you. We know that your families have been there a long time too, and we don't want to -- to -- to ruffle that relationship.

25

1

2

3

4

5

6

7

8

9

10

11

Again, we're looking to be responsible owners.

15:51

15:51

We're looking to be -- obviously we're business owners, 1 2 this farm has to make sense at the same time, so 3 logistics always figure in. 4 Our children are becoming involved; it's the fourth generation of our family that has farmed this 5 6 farm, and we're excited about that. And your guess is 7 as good as mine as to what the future holds. But that pretty much summarizes why we want to do 8 what we want to do. We've talked a lot about the 9 10 details of what's going to happen here, depending on 15:52 11 what the Board's decision is at this moment. 12 But I thank everybody for taking the time. 13 There's been a lot of documentation for everybody to go 14 through, and I can't imagine the hours that the Board 15 puts in looking to review it and become familiar with 16 it and I thank you for that. And with that I will 17 close my arguments. 18 THE CHAIR: Thank you, Mr. Van't Land. Thank 19 you very much. 20 Ms. Vance, do you have any closing arguments? 15:52 MS. VANCE: 21 I do, Mr. Chair. I hadn't 22 anticipated it, but I that think the discussion between 23 Mr. Cumming and Mr. Kennedy in particular suggests that 24 it might be appropriate to do so. 25 And I do want to begin by thanking some of the

other parties for their patience on what may appear to 1 2 be somewhat of an academic point, but to our approval 3 officers, and I suspect to municipalities, it is very 4 much an everyday working thing that is very important. 5 Ultimately, you know, our submission is as it stands in Exhibit 16. NRCB Field Services does seek 6 7 guidance from the Board. We are grateful that the Board might take this opportunity to provide such 8 9 guidance to Field Services. And as I mentioned, guidance I think would be valuable to all sorts of 10 15:53 11 parties going forward. 12 The Chair of the Panel did speak about statutory 13 interpretation, and that is a great deal of what is 14 going on in this academic-sounding issue. 15 I wonder if document managers could just bring up Section 20(1)(a) of AOPA. 16 There is no exhibit number because it's not an exhibit, but I believe that the 17 18 document managers have that. It's on page 19 of mine; 19 I don't know if it will be 19 of this one. Almost 20 there. 15:54 21 Perfect. Thank you very much. 22 And I'll be focusing on (1)(a) because that is the 23 provision under which Ms. Weisbach made her decision, 24 but of course there is a (b) part as well to keep in 25 mind.

So statutory interpretation in a nutshell consists of looking at text, context, and purpose. And if the Board Panel is interested in wondering where I've come up with that formula, it is from a case called *Rizzo & Rizzo Shoes* out of Supreme Court [1998] 1 SCR 27. It's a well-known leading case in statutory interpretation, and I'm happy to provide that case as well.

8 But, basically, you look at the ordinary sense, 9 the grammatical sense, the context, the purpose, the 10 objectives of the legislation. So it's a holistic 11 exercise, not just a plain text reading which I 12 appreciate.

However, part of it is text, and I -- it sounds as 13 14 if the Board might go down a path of considering 15 guidance in the form of IDP provisions prevailing over MDP provisions to the extent that it would affect how 16 17 we read 20(1)(a). 20(1)(a) talks about inconsistency 18 with the MDP land use provisions must deny. It is 19 difficult to interpret your way out of that, to be 20 I'm not saying it cannot be done, however. frank.

If the Board considers this, I would suggest that you include some hypotheticals as you work your way through this, and the hypotheticals I'm going to give you are in their very basic form. We're not exploring how you decide if something is inconsistent because 15:56

15:56

1

2

3

4

5

6

that is a whole other question. 1 2 But, essentially, there's four that I can see: 3 Scenario A is if the MDP says yes to the application 4 and the IDP says yes; Scenario B is if the MDP says yes and the IDP says no; Scenario C, if the MDP says no and 5 the IDP says no; and finally Scenario D is if the MDP 6 7 says no and the IDP says yes. And I would submit that Scenarios B and D are the ones, of course, that will 8 9 make us scratch our head. If the Board interprets IDP paramountcy as 10 15:58 11 applying to somewhat change Section 20(1), I would just 12 suggest as a possibility this theory: The theory would 13 be that one could read in the concept of validity, so it would be a valid land use provision. And I suppose 14 15 by operation of law, if one thing prevails over 16 another, that other may not be valid. There may be a 17 better term than "valid," but that's -- I'm thinking 18 that that's one way to do it is to kind of read that 19 in. 20 And I suppose the next question I would ask, and 15:59 21 this relates in part to Mr. Kennedy's question 22 concerning our paragraph 23 where I confessed I'm not sure the "and" was scrutinized as much as maybe it 23 could have been, although I think it still stands. 24 And 25 part (b) is this idea of a policy or framework under

h			ㅋ
1		which an approval officer would look at the extent to	
2		which an MDP refers, cross-references, incorporates	
3		land use provisions of an IDP or just the IDP itself.	
4		And I would just ask the question, if the IDP provision	
5		is going to prevail in the face of an MDP provision	
6		that is inconsistent, do we need to even have that	
7		concept, that trigger of cross-referencing in that kind	
8		of a framework.	
9		Those are my submissions. I'm certainly welcome	
10		to take any questions that you might have.	16:00
11	THE	CHAIR: Mr. Kennedy?	
12	MR.	KENNEDY: Sorry, I'm having trouble hitting	
13		the unmute button.	
14		I have no questions. I think the submission is	
15		very clear and very helpful and appreciated.	
16	THE	CHAIR: I would agree. Panel members, any	
17		questions?	
18		Hearing none. Thanks, Ms. Vance.	
19	MS.	VANCE: Thank you.	
20	THE	CHAIR: Thank you very much.	16:01
21		Ms. Janzen?	
22	MS.	JANZEN: I have no further comments for the	
23		Board.	
24	THE	CHAIR: Okay. Thank you. And thanks for	
25		your participation.	

Ms. Horvath?

1

MS. HORVATH: Great. No, I don't have anything
else. And, again, thank you very much for inviting us
into the process today.

THE CHAIR: 5 And just a guick comment, the 6 Board in the past has had times where County or Town 7 has been reluctant and perhaps even failed to show up at the hearing on request, and I must say it's been 8 9 delightful to have you. You've added to the process, and, you know, your ability to come and provide direct 10 11 but also -- evidence but also answer questions from the 12 Panel and from other participants is very useful, very 13 helpful. So thank you both.

14 Ms. Schmid, sorry, do you have any questions -- or 15 not any questions, do you have any closing argument? 16 MS. SCHMID: Yes, I do. 17 THE CHAIR: Okay, please proceed, thank you. So my closing argument is just 18 MS. SCHMID: 19 around -- well, first of all, thank you guys for 20 hearing us. I know it's been a long day, but this is 21 near and dear to our hearts, so I do thank you for your 22 I know it can be spent in other places. time.

23 So going through this hearing today has been 24 intimidating and exhausting, so sorry if I repeat 25 myself. But in hearing some of the responses from

16:02

16:01

Mr. Van't Land and also like the discrepancies that 1 2 were in the documentation that has been submitted, like 3 I just have noted, like non-compliance with NRCB 4 policies already in place, making a remark of not 5 willing to work within those policies and requirements, 6 also with doing unauthorized work with the Environment 7 to create those swales and how that impacts the drainage. 8

I also don't think that there was fair 9 10 representation for the negative effects so what adding 16:03 11 two more barns to what's already in place would look 12 like if it was approved.

13 I also feel like concerns for potential 14 contaminated runoff water, whether it's medication 15 that's in the feed for the chickens and how that stays 16 in the barn the whole time and then when they clean the 17 barn and it's stored outside or they spread it and it's 18 close to the environment and the elements and 19 eventually turns into runoff and what that looks like. 20 It's not just the short-term, it's the long-term 21 impact.

16:03

Like Mr. Bedster has already made reference that 23 three of his children have had cancer. We have a five-year-old daughter that has respiratory concerns and it just -- with expansion I don't feel like there's

22

24

1	sufficient evidence that supports how modernization and	
2	expansion are going to make those negative impacts less	
3	if that makes sense.	
4	And I think that pretty much sums up my concerns	
5	and my closing statements.	
6	THE CHAIR: Thank you, Ms. Schmid.	
7	Mr. and Mrs. Bedster?	
8	MR. BEDSTER: What has been said is impacted	
9	because some things, what I have said are really just	
10	kind of pushed aside, that it can't happen or whatever,	16:04
11	and that really is not the way it is. If it happened	
12	once, it's happened quite a few times, I would say.	
13	So it's just my word against their word or	
14	compliance, however you want to say this, but if it	
15	goes through, and it happens again, then what? What	
16	does the NRCB do then? Come in and slap a hand, or	
17	what takes place?	
18	I guess that's everything.	
19	THE CHAIR: Okay. Thank you, Mr. and	
20	Mrs. Bedster.	16:05
21	Mr. Clifton?	
22	MR. CLIFTON: I guess I'd like to thank	
23	everybody for their time and to allow us to express our	
24	concerns.	
25	At the end of the day, it's still within the I	

call it the rural/urban fringe area, which is labelled 1 under the County Bylaw Act as prohibited. 2 3 As for the expansion, it's kind of a grey area as 4 what they described. If it does go through, I would 5 like to see that condition on the existing permit 6 carried forward, for the 48-hour manure incorporation 7 to help reduce the odour. And I guess a little more compliance and consideration for neighbours. 8 That's all. 9 THE CHAIR: Thank you, Mr. Clifton. 10 16:06 11 Mr. Van't Land, you have an opportunity to reply. 12 You've heard comments from all parties in closing. Did 13 you have any reply to those? 14 MR. VAN'T LAND: I just want to again one more time 15 to take the opportunity to thank everybody involved. This has opened my eyes to a number of perspectives 16 17 that I had not considered previously. Concerns have 18 been brought up that are ones that I was not aware of 19 and now I am, and I appreciate that and those will 20 definitely be part of our consideration going forward. 16:07 21 Obviously, it is my desire to move forward with 22 this project, but I want to make -- have good relations 23 with the neighbours at the same time. So with the best of the both worlds, we're going to find a way to do 24 25 both of those things, but at this point, it's the

AMICUS REPORTING GROUP - A Veritext Company

Board's decision as to how they want to move forward. 1 2 And, again, I appreciate the opportunity to make 3 the submission. Thank you. 4 THE CHAIR: Thank you, Mr. Van't Land. Thank 5 you very much. 6 Well, this is a time to close, but just a couple 7 of closing remarks. On behalf of the Panel, I'd like to thank everyone 8 9 for your participation in the process, and interesting, you know my notes, I used the words "intimidating" --10 16:07 11 that these proceedings can be intimidating and, 12 Ms. Schmid, I think that's the exact word that you used 13 and we recognize that. It is a difficult process, in 14 particular for folks that, you know, it's not your 15 everyday thing to participate in hearings, we get that. But we also get the fact that you stepped up, you came, 16 17 you participated, you asked questions, you delivered 18 direct evidence, and we really appreciate that from all 19 participants. So thank you very much on behalf of the 20 Panel. 16:08 21 A couple of administrative thank yous. 22 Ms. Kaminski and Ms. Taylor from the NRCB, they were 23 our document managers. Once again, just a stellar job. 24 Those documents came up in a hurry, right to the right

AMICUS REPORTING GROUP - A Veritext Company

page numbers. And often before we even had the number,

25

they were up, so thank you very much. It was a job 1 2 really well done. 3 And, Ms. Vespa, court reporter, awesome. And, as 4 usual, you catch me when I forget to get people sworn 5 in, so I appreciate that as well. But you folks do a 6 really good job on the transcripts for us, so thank you 7 very much on a very difficult job. And our Zoom host from MNP, Mr. Elhakim. 8 Thank 9 you very much, Mak. You did a great job including when we had a glitch with Sandi. You got her back on track 10 16:09 and included with Ms. Roberts. But thank you very much 11 12 for spending the entire day with us and making sure our 13 Zoom ran smoothly. So we've received a ton of very helpful 14 15 information today. We're going to consider all of this 16 information, including all the submissions made to 17 date, and we'll provide a decision to all the parties 18 at the same time in written format. 19 Our longstanding performance target for the Board 20 is to issue a decision within 30 working days, so 16:09 21 roughly six weeks, the close of the hearing. And I 22 don't see any reason why we won't meet that target here 23 So within six weeks, you should be seeing a as well. 24 decision from the Board. 25 So thank you once again, everyone, including

Ms. Friend who is behind the scenes and sometimes in front of the scenes, done a great job getting everybody organized and making sure that everything ran smoothly. So thank you very much, Ms. Friend, and also Mr. Kennedy for the support you give to the Panel. So with that, I now adjourn and the hearing is now closed. So safe travels everyone that is travelling and have a good evening. Thank you very much. (PROCEEDINGS ADJOURNED AT 4:10 P.M.) PROCEEDINGS CONCLUDED

Certificate of Transcript We, the undersigned, hereby certify that the foregoing pages <u>1</u> to <u>229</u> are a complete and accurate transcript of the proceedings taken down by us in shorthand and transcribed from our shorthand notes to the best of our skill and ability.
