

---

In consideration of Decision Summary RA18023A, Authorization RA18023A is issued to:

Name: Allan Child (the "permit holder")  
Address: Box 699 Killam AB T0B 2L0  
Contact person: Doug Child

**Permitted construction** (based on the submitted site plan):

- a runoff control catch basin (80 m x 35 m x 2.5 m deep)
- a solid manure storage pad (80 m x 35 m)

**Already Constructed**

- an earthen liquid manure storage (EMS) (65 m x 63 m x 9 m deep)

The permit holder shall comply with the requirements of the *Agricultural Operation Practices Act* (AOPA) and the regulations passed pursuant to that act.

The permit holder shall adhere to the descriptions contained in the filed application together with the site plan, building plans, engineering reports and other attached documents, unless otherwise noted in the following conditions.

The permit holder shall contact the NRCB at least 10 working days in advance of the desired inspection dates to schedule the inspections in conditions #2 and 4.

The permit holder is responsible for all costs associated with monitoring, sampling, testing, recording and reporting requirements.

**Construction conditions**

Runoff Control Catch Basin

1. The permit holder shall provide the NRCB with a written construction completion report for the runoff control catch basin. The report shall be stamped and signed by a professional engineer, and shall verify that the runoff control catch basin was constructed with the same material that was used for hydraulic conductivity testing, and that the runoff control catch basin was constructed according to the proposed procedures and design specifications.
2. The permit holder shall not allow manure impacted runoff into the new catch basin until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
3. The permit holder shall complete construction of the new runoff control catch basin prior to November 30, 2022. Upon request, this deadline may be extended by the NRCB in writing.

Solid Manure Storage Pad

4. The permit holder shall not allow manure into the solid manure storage pad until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
5. The permit holder shall complete construction of the new solid manure storage pad prior to November 30, 2022. Upon request, this deadline may be extended by the NRCB in writing.

This Authorization becomes effective immediately, and should be read in conjunction with previously issued Registration RA11005. The Authorization conditions will remain in effect unless amended in writing by the NRCB.

Authorization RA18023 is therefore cancelled and is no longer in effect, unless Authorization RA18023A is held invalid, in which case the previous permit will remain in effect.

May 8, 2020

(Original Signed)  
Francisco Echegaray, P.Ag.  
Approval Officer

**Authorization RA18023A – Appendix**

**Construction conditions (already met carried forward from Approval RA18023)**

EMS

- The permit holder shall provide the NRCB with a written construction completion report for the earthen liquid manure storage. The report shall be stamped and signed by a professional engineer, and shall verify that the EMS was constructed with the same material that was used for hydraulic conductivity testing, and that the EMS was constructed according to the proposed procedures and design specifications.
- The permit holder shall not allow manure into the new EMS until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
- The permit holder shall complete construction of the new EMS prior to November 30, 2022. Upon request, this deadline may be extended by the NRCB in writing.
