

---

In consideration of Decision Summary RA20027, Authorization RA20027 is issued to:

Name: Byemoor Hutterite Colony, and Byemoor Farming Co. Ltd.  
(the “co-permit holders”)  
Address: Box 70 Byemoor AB T0J 0L0  
Contact person: Ben Waldner

**Permitted construction** (based on the submitted site plan):

- New earthen liquid manure storage (EMS) cell 40 m x 70 m x 4 m deep

The co-permit holders shall comply with the requirements of the *Agricultural Operation Practices Act* (AOPA) and the regulations passed pursuant to that act.

The co-permit holders shall adhere to the descriptions contained in the application RA20027, together with the site plan, engineering documents and other attached documents, unless otherwise noted in the following conditions.

The co-permit holders shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection in condition four.

The co-permit holders are responsible for all costs associated with monitoring, sampling, testing, recording and reporting requirements.

### **Construction conditions**

1. Liner requirement

The co-permit holders shall provide the NRCB with a written construction completion report for the new EMS cell. The report must be stamped and signed by a “professional engineer,” as defined in the *Standards and Administration Regulation*, and must confirm that the new EMS cell:

- was constructed under the supervision of an engineer
- was constructed with the same liner material as that used for hydraulic conductivity testing
- has an energy dissipating device installed in the area of the inlet to protect from scouring
- has agitation ramps and pads to reduce damage to the liner
- has the proposed horizontal and vertical dimensions including elevations above and below grade, berm heights, and side slopes
- is in the same location as proposed
- has a liner that is at least two metres thick and constructed in accordance with the specifications stated in Technical Document RA20027.

This document must be provided to the NRCB prior to the inspection referenced in condition 4, or by a later date stated in writing by the NRCB.

2. Construction above the water table  
The co-permit holders shall immediately cease construction of the new EMS cell and contact the NRCB if the water table is observed to be one metre or less from the bottom of the new EMS cell's liner at the time of construction.
3. Construction completion deadline  
The co-permit holders shall complete the construction of the EMS prior to November 30, 2021. Upon written request, this deadline may be extended by the NRCB in writing.
4. Post construction inspection  
The co-permit holders shall not place manure in the new EMS cell until the NRCB have inspected it and stated in writing that it has been constructed in accordance with the terms and conditions of this permit.

This authorization becomes effective immediately and needs to be read in conjunction with the deemed permit, including municipal development permit 9727F, and NRCB issued Approvals RA02015A, RA06022A and Authorization RA03034. The permit conditions will remain in effect unless amended in writing by the NRCB.

July 13, 2020

(Original Signed)  
Jeff Froese  
Approval Officer
