# Application for Amendment – contd.

## AMENDMENT INFORMATION REQUIREMENTS

### Instructions:

For each part of your permit that you would like amended, please detail what change you would like made and why, and how your proposed change will meet the AOPA requirements. You may attach additional pages to this form to provide this information.

Please note that an approval officer may require a page (or pages) of the Part 2 application forms to be completed as part of this application for amendment, depending on what changes are proposed.

In accordance with our NRCB Registration # RA05035, we would like to amend the ongoing conditions #7, EMS leakage detection reports and #8 water well test reports, effective immediately.

This permit was issued in August, 2005 and we have submitted the required reports for 15 years. To our knowledge these reports have always been within the necessary parameters and there have not been any definitive issues with both the water well or EMS detection well tests. We feel we have complied with the guidelines and it is time to amend this permit.

At this time, the red meat industry is in a very precarious position with the COVID 19 out breaks in meat packing plants. This impacts us financially as the present and future prices have fallen disastrously. We market all of our hogs through Olymel in Red Deer and any disruption is devastating. At present we are losing approximately \$40/head and we cannot sustain those losses very long. We cannot afford any needless expenses because we have to pay for feed and payroll. Therefore please amend this permit in 2020 to help with expenses and the stress of additional unnecessary workload.
