

Total permitted animal capacity from all permits for this site:

2,000 beef feeders
2,000 beef finishers

In consideration of Decision Summary LA21050, Approval LA21050 is issued to:

Name: Poelman Farms Ltd. (the "permit holder")
Address: Box 125, Granum AB T0L 1A0
Contact person: Clinton Poelman

Permitted construction (already constructed and signed off in Approval LA15002):

- Catch basin – 61 m x 38 m x 2.7 m (updated dimensions)

Permitted construction (based on the submitted site plan):

- Feedlot pens – 213.4 m x 213.4 m (700 ft. x 700 ft.)

The permit holder shall comply with the requirements of the *Agricultural Operation Practices Act* (AOPA) and the regulations passed pursuant to that act.

The permit holder shall adhere to the descriptions contained in the filed application together with the site plan, engineering reports and other attached documents, unless otherwise noted in the following conditions.

The permit holder shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection in conditions #2.

The permit holder is responsible for all costs associated with monitoring, sampling, testing, recording and reporting requirements.

Construction conditions (feedlot pens)

1. Construction completion deadlines

The permit holder shall complete construction of the manure collection and storage portions of the new feedlot pens prior to November 30, 2024. Upon request, this deadline may be extended, in writing, by the NRCB.

2. Post construction inspections (prior to populating facility)

The permit holder shall not allow livestock or place manure in the new feedlot pens until the facility has been inspected by NRCB personnel and confirmation provided in writing, to have been constructed in accordance with the terms and conditions of this permit. The permit holder shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection.

Operating Conditions (brought forward from Approval LA15002)

Manure Handling and Application

3. Before livestock can be housed in any of the former swine facilities, the facilities must be converted to handle manure as a solid and this conversion must be confirmed by a site inspection and documented in writing by NRCB personnel.
4. There shall be no manure application on pasture, grass, or hay lands, nor on land within 1,500 feet (500 metres) of an occupied residence not owned by a consenting landowner.
5. Solid manure application shall be on frost-free, cultivated land only and shall be incorporated within 48 hours of land spreading.
6. There shall be no solid manure application on snow-covered ground.

This approval becomes effective immediately. The approval conditions will remain in effect unless amended in writing by the NRCB.

Approval LA15002 is hereby cancelled and is no longer in effect, unless Approval LA21050 is held invalid, in which case the previous permit will remain in effect.

April 1, 2022

(Original signed)

Joe Sonnenberg
Approval Officer

Approval LA21050 – Appendix

Existing permitted facilities

Facility	Dimensions (m)	From
Feedlot pens Catch basin	L shaped to total of 185 m x 176 m 61 m x 38 m x 2.7 m (adjusted this permit)	Approval LA15002
Swine barn Four bioshelters	13 m x 78 m Each 9 m x 26 m	Deemed permit and MD #151-00. NRCB condition carried forward does allow for these facilities to be used for solid manure storage following NRCB inspection.

Construction conditions (brought forward from Approval LA15002)

1. Construction completion deadlines

The permit holder shall complete construction of the manure collection and storage portions of the new feedlot pens prior to December 1, 2017. Upon request, this deadline may be extended, in writing, by the NRCB.

2. Construction completion reports

a. The permit holder shall provide the NRCB with a written construction completion report, done by a qualified third party, for the new feedlot pens. The report shall:

- Certify that the feedlot pens were constructed at the location specified in the site plan provided with the application;
- Provide the density test results and thickness of the constructed feedlot pen liner.

The permit holder shall not place animals in the feedlot pens until the report has been reviewed and accepted in writing by the NRCB.

b. A completion report confirming the catch basin liner material and construction procedures, done by a qualified third party, must be provided to the NRCB prior to manure entering the catch basin. The completion report must include: density test results of the liner and verification of the catch basin liner thickness.

3. Post construction inspections (prior to populating facilities)

The permit holder shall not allow livestock in the new feedlot pens until the facility has been inspected by NRCB personnel and confirmation provided in writing, to have been constructed in accordance with the terms and conditions of this permit. The permit holder shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection.
