

**Total permitted animal capacity from all permits for this site:**

36,000 chicken layers  
45,000 chicken pullets

---

In consideration of Decision Summary LA22018, Approval LA22018 is issued to:

Name: Southern Sky Hutterian Brethren (the “permit holder”)  
Address: Box 519, Magrath AB T0K 1J0  
Contact person: Amos P. Entz

**Permitted construction** (based on the submitted site plan):

- Layer barn – 96.6 m x 38.3 m with attached manure storage (21.3 m x 7.6 m)
- Pullet barn – 78 m x 24.6 m with attached manure storage (21.3 m x 7.6 m)

The permit holder shall comply with the requirements of the *Agricultural Operation Practices Act* (AOPA) and the regulations passed pursuant to that act.

The permit holder shall adhere to the descriptions contained in the filed application LA22018 together with the site plan, building plans, and other attached documents, unless otherwise noted in the following conditions.

The permit holder shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection in conditions #3 and 6.

**Construction conditions**

Chicken layer barn and attached manure storage!

Concrete (report and specifications)

1. The concrete used to construct the manure storage and collection system in the chicken layer barn and attached manure storage must have a minimum 28-day strength of 25 MPa. The permit holder shall provide a copy of the concrete supplier’s invoice or other proof to the NRCB to confirm the specifications of the concrete used in the construction. This document must be provided to the NRCB prior to the inspection referenced in condition 3 below or by a later date stated by the NRCB.

Construction completion deadline

2. The permit holder shall complete construction of the manure collection and storage portions of the chicken layer barn and attached manure storage prior to December 31, 2023. Upon request, this deadline may be extended by the NRCB in writing.

Post construction inspection

3. The permit holder shall not place manure or livestock in the chicken layer barn and attached manure storage until it has been inspected by NRCB personnel and determined by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.

Pullet barn and attached manure storage

Concrete (report and specifications)

4. The concrete used to construct the manure storage and collection system in the pullet barn and attached manure storage must have a minimum 28-day strength of 25 MPa. The permit holder shall provide a copy of the concrete supplier's invoice or other proof to the NRCB to confirm the specifications of the concrete used in the construction. This document must be provided to the NRCB prior to the inspection referenced in condition 3 below or by a later date stated by the NRCB.

Construction completion deadline

5. The permit holder shall complete construction of the manure collection and storage portions of the pullet barn and attached manure storage prior to December 31, 2023. Upon request, this deadline may be extended by the NRCB in writing.

Post construction inspection

6. The permit holder shall not place manure or livestock in the pullet barn and attached manure storage until it has been inspected by NRCB personnel and determined by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.

This approval becomes effective immediately. The approval conditions will remain in effect unless amended in writing by the NRCB.
