S ½ 16-32-26 W4M

Groundwater Monitoring Requirements

The purpose of this statement is to revise the groundwater monitoring requirements in Approval RA23004. Operating Condition 17 of Approval RA23004 reads:

The owner/operator shall conduct leak detection monitoring for the feedlot and catch basin, according to a groundwater monitoring system prescribed and authorized in writing, and as amended from time to time where appropriate, by the NRCB.

The NRCB has re-assessed the groundwater monitoring requirements, using results from an environmental risk screening conducted on April 10, 2013 for this facility.

Based on the risk screening result, the NRCB has determined that the groundwater monitoring requirements for this facility should be amended as follows:

Monitoring Frequency

Groundwater monitoring requirements are suspended

Monitoring Well Test Parameters

Not applicable, as monitoring is suspended

Monitoring Wells to be used for Monitoring

Not applicable, as monitoring is suspended

These monitoring requirements become effective on the date of this letter and supersede any previously issued monitoring requirements at this facility.
