

**Total permitted animal capacity from all permits for this site:
2,000 beef feeder calves**

In consideration of Decision Summary LA23034, Approval LA23034 is issued to:

Name: David Slingerland, operating as Tempest Red Angus, (the “permit holder”)
Address: Box 964, Coaldale AB T1M 1M8
Contact person: David Slingerland

Permitted construction (based on the submitted site plan):

- Three irregularly shaped pens C8, C9, & C10 (approximate dimensions C8: 35 m x 24 m, C9: 35 m x 43 m, and C10: 35 m x 30 m)
- Runoff catch basin (42 m x 28 m x 4 m deep)

Permitting existing pens

- Permitting existing (already constructed) pens (C1 – C7)

The permit holder shall comply with the requirements of the *Agricultural Operation Practices Act* (AOPA) and the regulations passed pursuant to that act.

The permit holder shall adhere to the descriptions contained in the filed application together with the site plan, engineering reports and other attached, unless otherwise noted in the following conditions.

The permit holder shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection in conditions 2 and 5.

The permit holder is responsible for all costs associated with monitoring, sampling, testing, recording and reporting requirements.

Construction conditions

Pens C8 – C10

1. Construction of pens C8, C9 and C10 must be completed by October 31, 2025. Upon request, this deadline may be extended by the NRCB in writing.
2. A post construction inspection must be conducted, and written permission given by the NRCB allowing use of the pens, prior to livestock or manure being allowed in these pens.

Runoff catch basin

3. If the water table is encountered during construction of the runoff catch basin, construction of the catch basin must stop immediately and the NRCB must be notified.

-
4. A report must be provided by a professional surveyor confirming:
- That the catch basin meets the required property line and road right-of-way setbacks
 - is constructed in the approved location
 - the dimensions of the catch basin

This report must be provided to the NRCB prior to the inspection required by condition 5.

5. A post construction inspection must be conducted, and written permission given by the NRCB allowing use of the catch basin, prior to runoff being allowed into the catch basin.
6. Construction of the runoff catch basin must be completed by October 31, 2025. Upon request, this deadline may be extended by the NRCB in writing.

Populating CFO pens

7. Population of the CFO pens can only take place once the runoff catch basin has been constructed and approved for use.

This approval becomes effective immediately. The approval conditions will remain in effect unless amended in writing by the NRCB.
