

Total permitted animal capacity from all permits for this site:

250 beef feeder calves

250 beef feeders

In consideration of Decision Summary RA23018, Registration RA23018 is issued to:

Name: Henk and Lizette Schrijver and New Mars Dairy Ltd. (the “co-permit holders”)
Address: RR 2 Millet, AB T0C 1Z0
Contact person: Henk Schrijver

Permitted construction (based on the submitted site plan):

- Heifer shed – 122 m x 20 m
- Livestock pen – 122 m x 36.5 m
- Catch basin – 30 m x 26 m x 2 m deep (aboveground)

The co-permit holders shall comply with the requirements of the *Agricultural Operation Practices Act* (AOPA) and the regulations passed pursuant to that act.

The co-permit holders shall adhere to the descriptions contained in the filed application Registration RA23018 together with the site plan, building plans, engineering reports and other attached documents unless otherwise noted in the following conditions.

The co-permit holders shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection in conditions 2, 5 and 8.

Construction conditions:

Catch basin

1. The co-permit holders shall provide the NRCB with written confirmation from a qualified third party that provides confirmation of the catch basin’s location and dimensions, including elevations above grade and side slopes, as well as an engineer’s completion report certifying that the catch basin was constructed with the same liner material as that used for hydraulic conductivity testing.
2. The co-permit holders shall not allow manure impacted runoff to enter the catch basin until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
3. The co-permit holders shall complete construction of the catch basin prior to November 30, 2026. Upon request, this deadline may be extended by the NRCB in writing.

Livestock pen

4. The co-permit holders shall provide an engineer's completion report certifying that the pen was constructed with the same liner material as that used for hydraulic conductivity testing and that the pen was constructed according to the proposed procedures and design specifications, including size and location.
5. The co-permit holders shall not place livestock or manure in the livestock pen until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
6. The co-permit holders shall complete construction of the livestock pen prior to November 30, 2026. Upon request, this deadline may be extended by the NRCB in writing.

Heifer shed

7. The concrete used to construct the liner of the manure collection and storage portion of the heifer shed must meet the specification for category D (solid manure – dry) in Technical Guideline Agdex 096-93 "Non-Engineered Concrete Liners for Manure Collection and Storage Areas." The co-permit holders shall provide documentation to confirm the specifications of the concrete used to construct the manure storage and collection portions of the heifer shed.
8. The co-permit holders shall not place livestock or manure in the heifer shed until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
9. The co-permit holders shall complete construction of the heifer shed prior to November 30, 2026. Upon request, this deadline may be extended by the NRCB in writing.

This registration becomes effective immediately. The registration conditions will remain in effect unless amended in writing by the NRCB.
