Dear Tom and Carol:

Re: CD 23-08 Conditions #1 and #2 Compliance Date Extension

On February 1, 2024, Tom requested an extension to the NRCB with regards to the February 15, 2024, and March 1, 2024 deadlines in conditions #1 and #2, respectively, of Compliance Directive CD 23-08. This is due to unexpected delays during the application process. Tom requested an extension to continue to have cattle in the unauthorized northern pens until May 31, 2024. Tom has been in contact with the NRCB on a regular basis in order to come into compliance with CD 23-08.

Due to the factors explained above, I am granting you an extension to **noon, May 31, 2024**, by which time you must be in compliance with CD 23-08, conditions #1 and #2. After this date if the conditions are not adhered to, you will be in non-compliance and the matter will be dealt with accordingly.

Yours truly,

(Original signed)
David Smejkal
Inspector, NRCB
