

Regarding Authorization RA24039
NW 10-37-27 W4M

Water Well Monitoring Requirements

The purpose of this statement is to outline the water well monitoring requirements in Authorization RA24039. Operating condition 10 of Authorization RA24039 reads:

“The permit holder shall sample and test raw groundwater on an annual basis, from water well ID # 102129, according to the water well monitoring requirements prescribed by the NRCB in writing (“Sampling for Water Well Monitoring” Fact Sheet). The NRCB may, based on the monitoring results and at its discretion, revise those requirements from time to time, in writing. (See RA24039 Water Well Monitoring Statement)”

The NRCB has assessed the water well monitoring requirements, using results from an environmental risk screening conducted on April 23, 2025, for this confined feeding operation.

Based on the screening results, the NRCB has determined that the water well monitoring requirements for this facility should be as follows:

Monitoring Frequency

Annually, with results submitted to the NRCB by July 31 of each year

Water Well Test Parameters

Chlorides and nitrate-nitrogen

Water Wells to be used for Monitoring

WW ID 102129

These monitoring requirements become effective on the date of this monitoring statement.

May 6, 2025
