

Regarding Approval RA24004
NW 23-42-27 W4M

Water Well Monitoring Requirements

The purpose of this statement is to outline the water well monitoring requirements in Approval RA24004. Operating condition 9 of Approval RA24004 reads:

“The co-permit holders shall sample and test raw groundwater on an annual basis, from water well ID’s 2088980 and 275663, according to the water well monitoring requirements prescribed by the NRCB in writing (“Sampling for Water Well Monitoring” Fact Sheet). The NRCB may, based on the monitoring results and at its discretion, revise those requirements in writing.”

The NRCB has assessed the water well monitoring requirements, using results from an environmental risk screening conducted on May 7, 2025, for this confined feeding operation.

Based on the screening results, the NRCB has determined that the water well monitoring requirements for this facility should be as follows:

Monitoring Frequency

Annually, with results submitted to the NRCB by November 30 of each year

Water Well Test Parameters

Chlorides and nitrate-nitrogen

Water Wells to be used for Monitoring

WW IDs 2088980 and 275663

These monitoring requirements become effective on the date of this monitoring statement.

June 4, 2025
