

Regarding LA25020  
SW 27-8-26 W4M

### **Water Well Monitoring Requirements**

The purpose of this statement is to outline the water well monitoring requirements in Authorization LA25020. Operating Condition #2 of Authorization LA25020 reads:

*“The permit holder shall sample and test raw groundwater, according to water well monitoring requirements prescribed by the NRCB in writing. The NRCB may, based on the monitoring results and at its discretion, revise those requirements from time to time, in writing.”*

The NRCB has granted a variance for the calf pen approved in Authorization LA25020.

As a precautionary measure, the NRCB has determined that the water well monitoring requirements for this CFO should be as follows:

#### **Monitoring Frequency**

Annually, with results submitted to the NRCB by July 31 of each year

#### **Water Well Test Parameters**

Chlorides and nitrate-nitrogen

#### **Water Wells to be used for Monitoring**

Water well ID 9681624 (located on the east site of the CFO, 24 m north of the calf pen) and Water well ID 103526 (located in the backyard of the residence)

This monitoring requirement becomes effective on the date of this letter and supersedes any previously issued monitoring requirements at this facility.
